

COURSE STRUCTURE AND STANDARD SYLLABUS

Course Topic: Inclusive Growth and Structural Policies

Course Title: Macroeconomic Management in Resource-Rich Countries (MRC)

Course Description: This course, presented by the IMF's Institute for Capacity Development, focuses on macroeconomic policy issues and challenges faced by resource-rich countries (RRCs). The course provides participants with an understanding of: the macroeconomics of growth and diversification; managing fiscal policy; macroeconomic policy coordination; and managing public-sector assets; in RRCs. The course uses lectures, hands-on workshops, debates, case studies, and various online modules to achieve the following objectives.

Course Objectives: Upon completion of this course, participants should be able to:

- Analyze economic performance in resource-rich countries, in particular, in terms of growth, diversification, inclusiveness, and sustainability.
- Design fiscal frameworks, in particular, applying appropriate fiscal benchmarks to determine whether to consume, save, or invest the proceeds from the sale of natural resources.
- Identify the appropriate macroeconomic policy response to commodity price shocks.
- Ensure greater transparency in the management of natural resources, and develop appropriate institutional structures for Sovereign Wealth Funds.

Target Audience: Mid- to senior-level officials from central banks, ministries of finance and other relevant government agencies involved in the design and execution of policies in resource-rich countries.

Qualifications: Participants are expected to have an advanced degree in economics or equivalent experience. Participants may be required to complete online modules prior to the start of the course.

Performance Evaluation: Two multiple-choice quizzes will be given, one at the beginning of the course and another at the end, to ascertain participants' progress.

Topics (Core Units)

1. Introduction to the course

Part I. The Macroeconomics of Growth and Diversification in Resource-Rich Countries

2. Commodity markets
3. Economic growth and natural resources

4. Economic diversification and natural resources
5. Natural resources and inclusive growth

Part II. Managing Fiscal Policy in Resource-Rich Countries

6. Fiscal regimes in resource-rich countries
7. Simple fiscal benchmarks: How much to extract, consume and save?
8. Fiscal frameworks in resource-rich countries
9. Case studies of fiscal frameworks
10. Energy subsidy reform

Part III. Macroeconomic Policy Coordination in Resource-Rich Countries

11. Monetary and exchange rate regimes in resource-rich countries
12. Macroeconomic and financial policies to deal with resource flows

Part IV. Managing Public-Sector Assets in Resource-Rich Countries

13. Sovereign Wealth Funds
14. Transparency in the management of natural resources

Topics (*Auxiliary units*): Regional customization

The core units are designed to be offered in all regions. Auxiliary units may be customized to the region where the course is delivered, and may feature country-specific examples.

A1. (For Headquarters) A conversation with IMF mission chiefs and TA providers on resource-rich countries.

A2. (For CEF) Expand the discussion of Sovereign Wealth Funds (SWF) to allow for a more thorough treatment of central-bank reserve management, in countries where the central bank acts like a SWF.

A3. (For JVI) Trip to OPEC HQ or other activities.

A4. Guest lecturers from the region (from RTACs, resident representatives, experts, the authorities; may for instance present the IMF's *Regional Economic Outlook*)

COURSE PROGRAM

MACROECONOMIC MANAGEMENT IN RESOURCE RICH COUNTRIES

Day 1

15 minutes	Opening Session: Introductory Remarks
45 minutes	Initial Test
1.5 hours	Introduction to the Course <ul style="list-style-type: none"> • Natural resources: definition, size, traits, importance • The resource curse and the political economy of resource management • Managing macroeconomic policy in Resource-Rich Countries (RRCs)
1.5 hours	Commodity Markets <ul style="list-style-type: none"> • A historical analysis of commodity markets • Characteristics of commodity prices and sub-soil reserves • Recent evolution and outlook for commodity markets: prices and quantities
1.5 hours	Workshop: Commodity Markets <ul style="list-style-type: none"> • Commodity prices and commodity revenues: volatility, fiscal and balance of payment dependence • Natural resources: exhaustibility, proven reserves, governance indicators • Oil price uncertainty: Learning to read price fan charts and stochastic commodity price simulations

Day 2

3 hours	Economic Growth and Natural Resources
	<ul style="list-style-type: none"> • Theories of growth, and evidence in RRCs • Key drivers of growth and role of resource abundance • How to promote and sustain growth in RRCs

3 hours	Workshop: Economic Growth and Natural Resources
	<ul style="list-style-type: none"> • Growth and its determinants: understanding cross-country growth regressions • Potential output: Growth accounting and other methods • Natural resource abundance and choice of economic policies, institutions, quality of human capital, TFP growth, and structural reforms

Day 3

1.5 hours	Economic Diversification and Natural Resources
	<ul style="list-style-type: none"> • What is economic diversification? • Why diversify? • How to diversify?
1.5 hours	Workshop: Economic Diversification and Natural Resources
	<ul style="list-style-type: none"> • Use diversification tools and analytics to ascertain extent of diversification in RRCs. • Explore growth implications of diversification • Discuss political economy constraints to diversification.
1.5 hours	Natural Resources and Inclusive Growth
	<ul style="list-style-type: none"> • Inclusive growth: Definition and measurement • Why is it relevant to RRCs? • What policies promote inclusive growth in RRCs?
1.5 hours	Participants' Debate
	Participants to be split into groups, and debate pros and cons of various current policy issues facing RRCs

Day 4

3 hours	Fiscal Regimes in Resource-Rich Countries
	<ul style="list-style-type: none"> • Key objectives of fiscal regimes for extractive industries • Types of fiscal regimes and international experience with different fiscal regimes • Evaluating and modeling fiscal regimes
1.5 hours	Workshop: Fiscal Terms for Resource Extraction
	<ul style="list-style-type: none"> • Reinforce concepts discussed during the lecture. • Optional prerequisite: online course on fiscal regimes.

1.5 hours	Simple Fiscal Benchmarks: How Much to Extract, Consume, and Save?
	<ul style="list-style-type: none"> • How much to extract? The Hotelling rule • Simple fiscal benchmarks and their limitations: theory and country experiences • Role of public investment

Day 5

1.5 hours	Fiscal Frameworks in Resource-Rich Countries
	<ul style="list-style-type: none"> • Fiscal frameworks: definition and building blocks • Managing volatility and exhaustibility: fiscal anchors, depletion horizon, the IMF's fiscal sustainability framework, and precautionary motives • Effective mobilization and use of resources: a broader tax base, scale and composition of spending, and role of fiscal institutions
3 hours	Workshop: Fiscal Sustainability—Fiscal Benchmarks and Fiscal Frameworks <ul style="list-style-type: none"> • Apply different fiscal frameworks (PIH, BIH, modified PIH, FSF, and commodity price rules supplemented with a fiscal anchor) to data from a fictitious country. • Analyze implications for fiscal aggregates (such as the deficit, government spending, and the government's net foreign asset position) under various shocks to oil prices, interest rate, reserves, and growth. • Optional prerequisite: online course on basics of fiscal aggregates for RRCs.
1.5 hours	Fiscal Frameworks: Case Studies: Botswana, Norway, Chile (optional: Timor-Leste, Mexico) <ul style="list-style-type: none"> • Botswana: Fiscal framework with a Golden rule • Norway: Fiscal framework with a BIH rule • Chile: Fiscal framework based on structural balance • Timor-Leste: Example of PIH • Mexico: Example of hedging commodity prices

Day 6

1.5 hours	Workshop: Fiscal Rules to Manage Resource Revenue Volatility <ul style="list-style-type: none"> • Calculating various structural commodity-price rules • Calculating structural primary expenditure and evolution of stabilization fund • Comparing volatility vs. size of stabilization fund across different rules
1.5 hours	Monetary and Exchange Rate Regimes in Resource-Rich Countries <ul style="list-style-type: none"> • Real exchange rate: concept and relevance in RRCs • Monetary policy frameworks and exchange rate regimes: which ones are appropriate in RRCs? • Dutch disease in RRCs and interaction with regime choice
1.5 hours	Macroeconomic and Financial Policies to Deal with Resource Flows <ul style="list-style-type: none"> • Macro policy toolkit for resource-rich countries • Policy mix and sources of vulnerabilities • Country examples
1.5 hours	Workshop: Case Study of Coordination of Monetary, Exchange Rate and Fiscal Policies <ul style="list-style-type: none"> • Analyze Russia's macroeconomic policies during a period of high world oil prices and a booming economy • Assess whether policy mix was appropriate • Regional customization: case study of Nigeria

Day 7

1.5 hours	Participants' Presentations: Fiscal Frameworks <ul style="list-style-type: none"> • Fiscal frameworks and fiscal regime for extractive industries in participants' countries
1.5 hours	Sovereign Wealth Funds (SWFs) <ul style="list-style-type: none"> • What form may SWFs take, and how do they differ from central-bank reserves? • Why might SWFs be desirable in RRCs? • Relationship to the budget • SWF's asset allocation

1.5 hours	Transparency in the Management of Natural Resources
	<ul style="list-style-type: none"> • What is transparency and why is important? • Key elements of resource revenue management chain • What are good practices & policies that promote transparency?
1.5 hours	Energy Subsidy Reform
	<ul style="list-style-type: none"> • Energy subsidies: definition, size, and implications • Barriers to subsidy reform, and issues in reform design • Country experiences

Day 8

1.5 hours	Quiz Game
	<ul style="list-style-type: none"> • Review course content
1.5 hours	Preparation of Participants' Final Presentations
3 hours	Preparation of Participants' Final Presentations

Day 9

3 hours	Preparation of Participants' Final Presentations
1.5 hours	Preparation of Participants' Final Presentations
1.5 hours	Course Evaluation and Final Test

Day 10

1.5 hours	Participants' Final Presentations
1.5 hours	Concluding Session and Presentation of Certificates
