# Session 2.3. IMF-Supported Programs: Case Study of Mongolia

IMF lending in brief

#### **IMF** Lending Facilities

- \* Loans to countries with actual or potential balance of payments problems.
  - \* IMF does not lend for specific projects, as do development banks
- \* Typically used to **rebuild reserves**, **pay for imports**, **restore conditions for growth**. Can also be used for budget support.
  - Lending instruments tailored to specific needs—short vs. longer-term problems; immediate financing needs or precautionary; LIC vs other.
    - Non-concessional lending includes Stand-by Arrangements (SBA),
       Extended Fund Facility (EFF), and precautionary facilities (FCL, PLL)
      - \* Concessional lending facilities for LICs.
        - \* IMF first in line for repayment

#### Trivia quiz

Which country was the first recipient of IMF financing?

- France
- Argentina
- United Kingdom
  - \* Ghana

#### Answer: France, in May 1947

# IMF lending at a glance

# Financial Program Comprehensive set of coordinated economic policies Credibility / market expectations Macroeconomic stability

# The process

- \* **Inception.** Member country makes a *request* for financial assistance
- Blueprint. Area department staff assess underlying problems and outline key elements of a program in a briefing paper
- \* Internal review process. Review departments and management sign off.
  - Negotiation. Agreed program—policies, financing and conditions— a compromise between staff and authorities. Reflected in country memorandum (MEP) and specific targets and policies
    - \* Board approval. Based on Staff Report approved by Management
      - Monitoring. Regular reviews based on conditions and broader assessment of policies. Time for program adjustments to be made.

## These guys again....

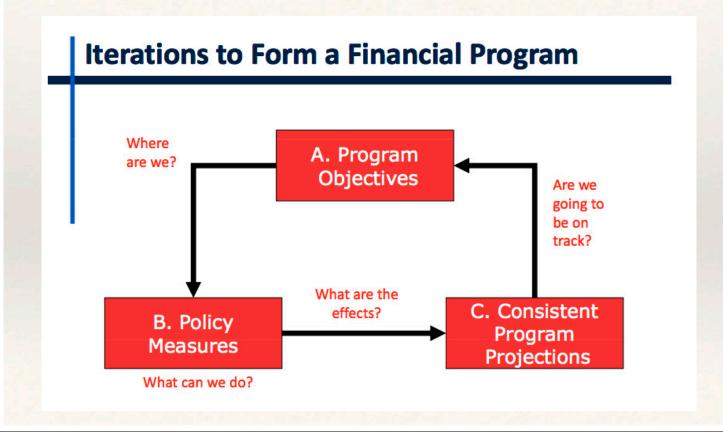

## Programs: Typical starting points

- \* Fiscal crisis: Unsustainable debt and/or financing needs
  - Lack of access to financial markets
- \* External crisis: Low/rapidly declining international reserves
  - Incompatible macro and exchange rate policies
    - Sudden stop/reversal of capital inflows
  - \* Financial sector crisis: Balance sheet vulnerabilities
- Limited policy options: Countercyclical monetary/fiscal policy not feasible, tradeoff between XR and interest rate

#### Conditionality

- \* Countries agree to follow policies to **overcome problems** that led it to seek financial assistance.
  - \* Conditions must be macro-critical
  - \* Conditions also aim to **ensure repayment**—revolving nature of Fund.
  - Compliance ensured via **reviews** and evaluated on basis of prior actions, quantitative criteria and structural benchmarks.
- Quantitative targets (PCs) typically include measures of fiscal deficit, domestic credit (NDA) by central bank.
- Number and scope of structural conditions reduced since 2009. Structural PCs eliminated in 2009
  - Waivers and adjustments common

#### A flexible framework

# How much financing? Quotas and access

Annual and Cumulative Normal Access Limits by Facility as a percent of quota

	Curren	t Limits	Previous Limits		
Non-Concessional	Annual	Cumulative	Annual	Cumulative	
SBA/EFF	145	435	200	600	
RFI	37.5	75	75	150	
PLL	200	500	500	1000	
Concessional					
SCF/ECF	75	225	150	450	
RCF					
Normal	18.75	75	37.5	150	
Shocks	37.5	75	75	150	

# What's in a program staff report?

- Analysis of the country economy and imbalances
  - Case for program: Type, length, access, phasing
- Policy content of program—overall strategy and individual policies
- Letter of intent/Memorandum of Economic Policies
  from country authorities
  - Conditionality: Performance criteria, prior actions, benchmarks

## Putting it all together

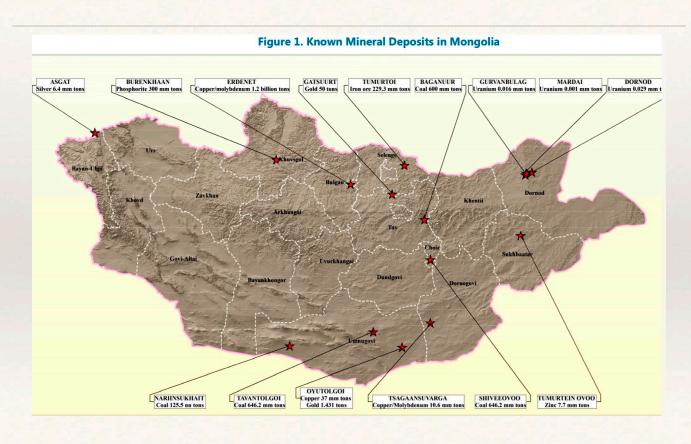

From Serbia 2014 Program Staff Report

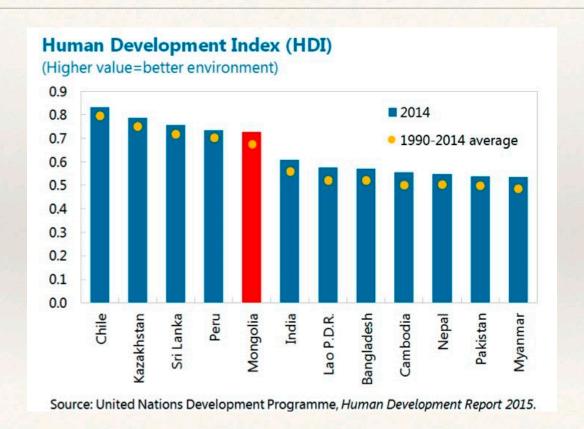

Case study: Mongolia

# The economic context: What were the problems?

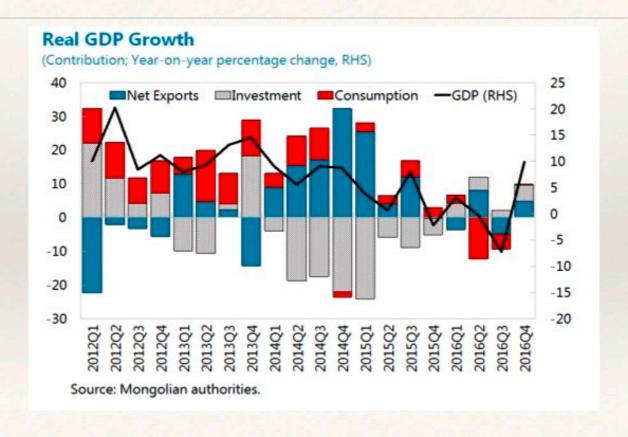

#### Resource rich but not diversified

# Impressive progress...at risk?

#### Boom and bust

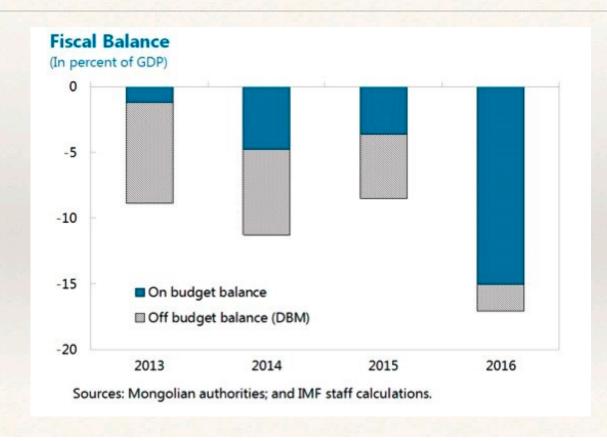

# Expansionary policies to cushion recession

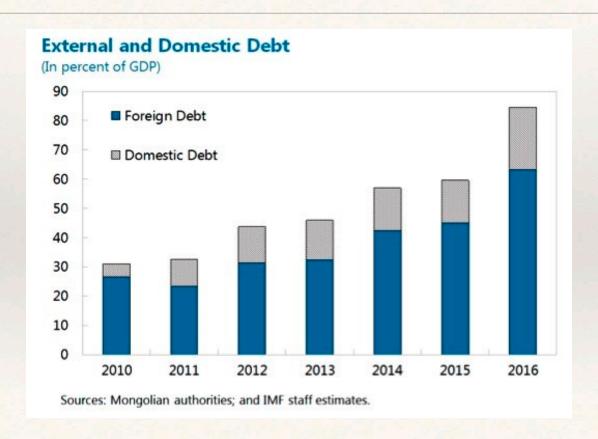

- Slower growth led to lower revenue
- Higher discretionary spending and interest spending
- Cyclically-adjusted deficit up sharply

Fiscal Accounts, 2015-26 (F	Percent of GI	OP)	
	2011-15		
	avg.	2015	2016
Revenue	29.6	25.1	23.7

pre-election programs			2.3
judicial settlement	57.5	(555)	0.6
arrears clearance		•••	1.2
underlying primary expenditure	36.4	30.7	32.7
Primary balance	-6.8	-5.6	-13.1
P.b. excluding one-off spending	-6.8	-5.6	-9.0
P.b. excluding one-off spending and rev. shortfall rel. to 2011-15 avg.	-6.8	-1.2	-3.1
Cyclically adjusted primary balance	-7.6	-6.5	-12.8
CAPB excluding one-off spending	-7.6	-6.5	-8.7
Nonmineral primary balance	-12.2	-10.0	-15.6

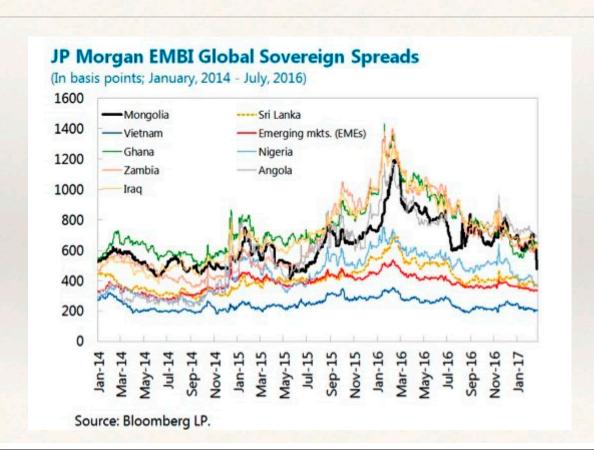

#### Fiscal deterioration

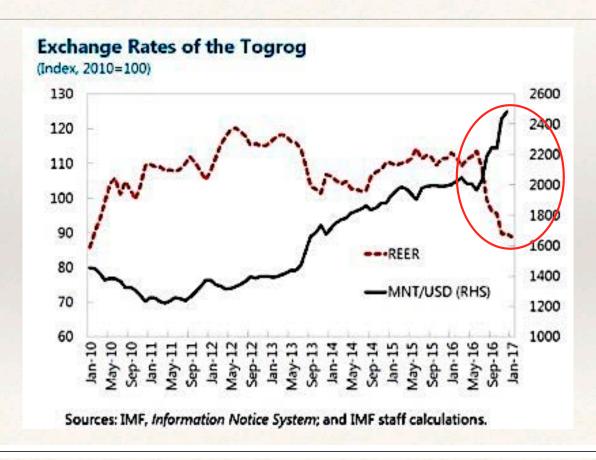

#### Unsustainable debt path

#### Rising sovereign spreads

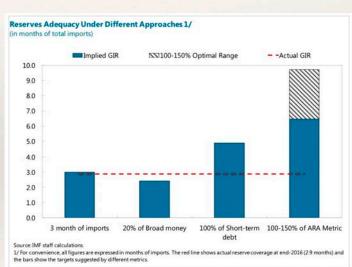

#### Currency under pressure

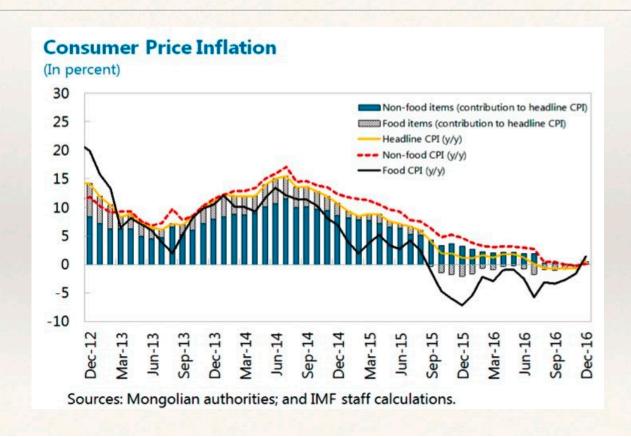

## **Enough reserves?**

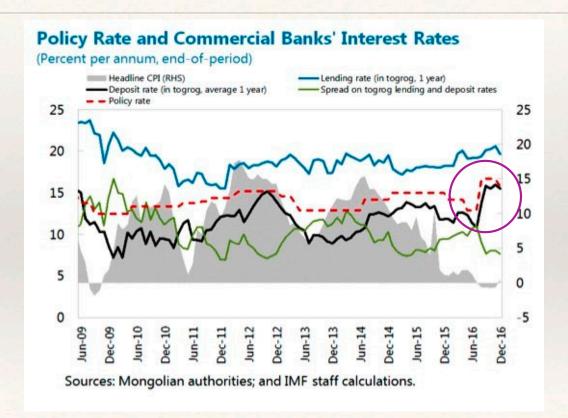

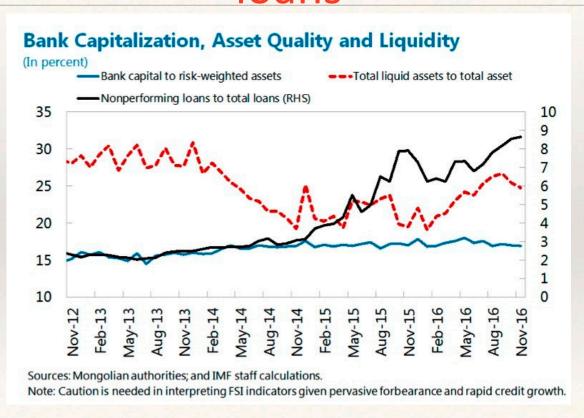

#### **Emerging deflation**

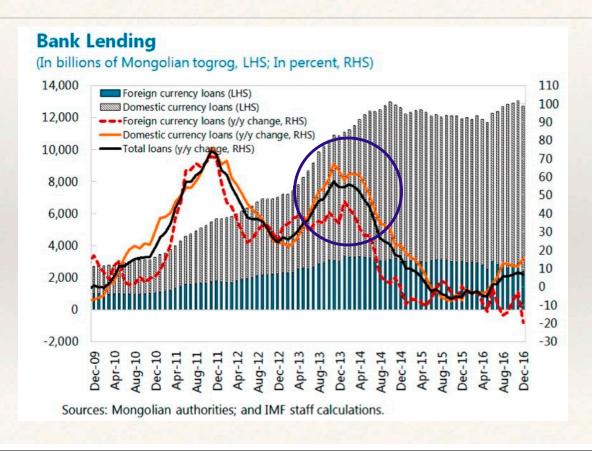

#### And high real interest rates

# Bank challenges: Rising bad loans

### Lending weak despite subsidies

## Program design

#### Key elements of the program

- Three-year arrangement (EFF)
- Access of 314 million (US\$434 million) or 435 percent of quota (max under normal access)
- Substantial concessional lending from financing partners and private sector creditor strategy
- Large fiscal adjustment to restore debt sustainability and stabilize external position
- Fiscal reforms to ensure adjustment durable. Steps to strengthen safety net and protect the most vulnerable
  - \* Market-determined exchange rate and prudent monetary policy—reserves buildup.
  - Measures to strengthen banking regulation and BoM governance, recapitalize banks
  - Structural reform to achieve sustained and inclusive growth— diversification, better business environment, increase FDI

#### As described here...

#### Appendix I. Letter of Intent

April 13, 2017 Ulaanbaatar

Ms. Christine Lagarde Managing Director International Monetary Fund Washington, D.C. 20431

Dear Ms. Lagarde

Mongolia is blessed with vast mineral resources, strong potential in agriculture and tourism, a talented workforce, and a vibrant democracy. Our long-run future is undoubtedly bright, but in recent years, we have been hit hard by the sharp decline of commodity prices and a collapse in foreign direct investment (FDI). Efforts to buffer the economy from these shocks succeeded in maintaining high growth for a while, but at the cost of higher public debt, a weaker external position, and declining asset quality at banks. As a result, market confidence waned and growth declined, leading to widespread hardship among the population and serious economic vulnerabilities.

We believe that the policies set forth in the MEFP are adequate to achieve the objectives of the program but are prepared to take further measures if necessary. We will consult with IMF staff on the implementation of the policies contained in the MEFP, and in advance of any revisions to these policies, in accordance with the IMF's policies on such consultation.

In keeping with our policy of transparency, we intend to make public the content of the IMF staff report, including this letter, the MEFP, the TMU, and the informational annex of the staff report. We therefore authorize IMF staff to publish these documents on the IMF website once the Executive Board has approved this EFF.

Sincerely yours,

B. Choijilsuren

N. Bayartsaikhan Governor, Bank of Mongolia

#### Attachment I. Memorandum of Economic and Financial Policies April 13, 2017

This Memorandum of Economic and Financial Policies (MEFP) provides context regarding Mongolia's economy, describes recent developments and the outlook, and then presents our program of policy adjustment and structural reforms, to be supported by an extended arrangement under the IMF's Extended Fund Facility (EFF).

#### I. Context

- Mongolia has strong economic potential but faces a number of difficulties. We are blessed with large mineral reserves that are under active development, a well-educated population, and opportunities for economic diversification and greater regional integration in Asia. But when our new government took office in June, we inherited a very challenging economic situation, with stagnant growth, a weak balance of payments position, a large fiscal deficit and rising debt, and increasing vulnerabilities in the banking system.
- 2. These difficulties were partly caused by major external shocks. FDI fell from \$4½ billion in 2011 (more than 40 percent of GDP) to nearly zero in 2015, reflecting the end of the first phase of the Oyu Tolgoi (OT) copper and gold mine, a dispute over the second phase of that project, and adverse changes to the investment regime, and coal and copper export prices fell sharply. The effect was to drive export earnings and fiscal revenues sharply downward.
- 3. But policy errors also contributed. Mongolia failed to build up buffers during good times. And when conditions worsened, stimulus policies temporarily helped maintain high growth while exacerbating economic vulnerabilities by building up public debt, weakening the BOP further, undermining bank asset quality, and damaging investor confidence:
- Fiscal policy. For several years up to 2015, quasifiscal spending at the Development Bank of Mongolia (DBM) pushed the consolidated deficit up to around 10 percent of GDP. In 2016, spending in the run-up to the elections helped push the annual deficit (as defined by the IMF) up even further, to 17 percent of GDP.
- Monetary and exchange rate policy. The BOM implemented expansionary policies during 2012–14: the policy rate was cut substantially, and several new quasifiscal lending programs injected about 25 percent of GDP in new liquidity into the economy. These policies fostered a credit boom and fueled imports. While the togrog was allowed to weaken, there were extended periods during which the Bank of Mongolia (BOM) attempted to defend the currency, and reserves, which stood at over \$4 billion in 2012, fell to \$1.3 billion by end-2015. Depreciation also led to an increase in inflation, which later diminished as the economy began to slump.
- Financial sector policies. Loans funded by the BOM's easing programs were zero-riskweighted and exempted from limits on large exposures and industry concentration. In general, the supervisory framework was inadequate, with limited resources, frequent

Prior actions (to be completed before Board approval of the new arrangement)  Fiscal  Passage of a 2017 supplementary budget and a medium-term budget framework (2018-2020) consistent with program targets, and passage of all fiscal measures needed to support 2017 targets  Banking  BOM to launch the procurement procedure for AQRs by internationally reputable firms on banks based on terms of reference developed in consultation with IMF staff.  Monetary  Authorities to communicate to staff the discontinuation of any net BOM financing of the mortgage program as well as any quasi- fiscal lending e.g. to companies	Completion Date
Structural benchmarks	
Fiscal	end-August 2017
Establishment of a working group to review the tax structure and make recommendations to improve efficiency and equity including review of the investment, VAT, personal income tax, and economic entity tax laws with a view to enhance revenue, reduce complexity, and introduce progressivity in personal income tax, in consultation with IMF staff.	
Finalization and commencement of implementation by the General Department of Taxation (GDT) and tax offices of compliance improvement strategies for large, medium, small, and micro businesses that will include baseline performance measures and an automated monitoring and evaluation framework	end-April 2017
Submission to Parliament of a revised general taxation law that consolidates the common administrative provisions that apply to all tax types, promotes consistent administration of the tax system, and achieves an appropriate balance between taxpayers' interest and the powers of the tax authorities	end-October 2017
Submission to Parliament of legislation to create a simplified tax regime for micro and small businesses within the scope of IMF technical assistance recommendations.	end-October 2017
Passage of a 2018 budget in line with the program's fiscal path.	end-November 2017
Revision of the relevant budget laws and introduction of a new law to establish a fiscal council, in line with international best practice and IMF advice.	end-December 2017
Revision of the Integrated Budget Law and other relevant laws to restrict, effective 2018 onward, Parliament from increasing the aggregate expenditure envelope reflected in the budget presented by the Minister of Finance (including through a PAYGO provision).	end-November 2017
Submission of the tax working group's report to the Ministry of Finance.	end-December 2017

Table A2. Mongolia: Proposed Prior Actions and Structural Benchmarks

#### Table A2. Mongolia: Proposed Prior Actions and Structural Benchmarks (concluded)

The Child Money Program will be targeted to the poorest 40 percent of Mongolian households and the savings redirected toward the better-targeted Food Stamps program.

Submission to Parliament of a new Bank of Mongolia Law, to clarify the BOM's mandate, strengthen autonomy and governance, and improve operations, in consultation with IMF staff. end-November 2017

end-December 2017

Adoption of the new Bank of Mongolia Law.

end-March 2018

Amendment of the Banking Law and Bank of Mongolia Law and related secondary legislation, guided by IMF staff, to

end-November 2017

- improve the early intervention framework
- bring the bank resolution legislation, funding and cooperation framework up to best international standards in cooperation with MoF, DICOM
- ensure that BOM has adequate powers to request from banks additional capital and provisioning to enhance financial strength or to absorb existing and estimated future credit losses, including based on the diagnostic studies and the analysis of the business plans
- introduce power for BOM to apply levies on banks to cover the cost of supervision incl. AQRs
- strengthen shareholders', board members', and senior management's fit and proper requirements
- upgrade rules on banks' related party exposure and final beneficial owners

Amendment of DICOM law to bring it in line with IADI Core Principles for Effective Deposit Insurance Systems.

end-November 2017

Financial Stability Board (FSB) approval of an NPL resolution strategy. In consultation with other relevant ministries, the FSB will first establish a working group, and that group will: (i) identify and analyze impediments to debt resolution, in particular related to insolvency and enforcement laws, taxation issues, and legal and regulatory obstacles to NPL sales and outsourcing; and (ii) develop an NPL resolution strategy including milestones and a timetable for removal of identified impediments.

end-January 2018

BOM to carry out a review of related party exposures based on improved legislation

end-September 2018

BOM to adopt an amendment to its regulation on asset classification and provisioning in consultation with IMF staff

end-June 2017

Enact a law on the use of public funds

end-December 2017

#### **Mongolia: Projections** under **Program Policies**

- Slightly negative growth this year, rising sharply from 2019
- Primary surplus by 2020
- Public debt peaks in 2018
- MT inflation at 6.5 percent
- Rising credit growth
- Rising reserves coverage

## Critiques of Fund Programs

- Inadequate analysis, wrong policy advice
  - "One size fits all", not flexible
- Too much emphasis on adjustment vs. growth
- Not enough emphasis on who bears the burden
- \* Too intrusive, not enough emphasis on ownership
- Moral hazard—wrong incentives for countries and lenders

Do the critiques hold water? Have they been addressed?

#### Attachment II. Technical Memorandum of Understanding

This Technical Memorandum of Understanding (TMU) sets out the understandings between the Mongolian authorities and IMF staff regarding the definition of quantitative performance criteria (QPC) for the extended arrangement under the Extended Fund Facility (EFF). It sets out the QPC adjusters and data reporting requirements for the duration of the extended arrangement, as described in the authorities' Letter of Intent (LOI) dated April 13, 2017, and the attached Memorandum of Economic and Financial Policies (MEFP). The TMU also describes the methods to be used in assessing the program performance and the information requirements to ensure adequate monitoring of the targets.

#### **Quantitative Performance Criteria and Indicative Targets: Definition of Variables**

#### Test Dates

- Performance criteria for end-April 2017, end-June 2017, end-September 2017, and end-December 2017 have been established with respect to:
- Floors on the change in level of net international reserves of the Bank of Mongolia (BOM);
- Ceilings on the level of net domestic assets of the BOM;
- Floors on the level of primary balance of the general government;
- Ceilings on the contracting and/or guaranteeing by the general government or the BOM of new nonconcessional external debt maturing in one year or more; and
- Ceilings on stock of guarantees on external debt by the general government or the BOM.
- Performance criteria that are applicable on a continuous basis have been established with 3. respect to:
- Ceilings on the contracting and/or guaranteeing by the general government or the BOM of new nonconcessional external debt maturing in less than one year,
- Ceilings on the accumulation of new external payment arrears:
- Indicative targets have been established for end-April 2017, end-June 2017, end-September 2017, end-December 2017, with respect to:
- Ceilings on the level of reserve money.

#### **Definitions**

- For the purposes of the program the following definitions will be used: 5.
- The general government (GG) includes all units of budgetary central government, social security funds, extra-budgetary funds (including but not limited to the Stabilization Fund and the Future Development Heritage Fund), and local governments, and the Development Bank of Mongolia (DBM). Debts of other legally autonomous state-owned enterprises (SOEs) and BOM liabilities including the swap line with the People's Bank of China (PBOC) are excluded from the definition of the general government debt.
