

Takeaways from the panel

- ▶ Launching follow-up work on developing an *international micro data standard*; investigate what is feasible
 - ▶ Proposal to G20 DGI Global Conference
- ▶ Invite International Organisations and G20 economies to participate in the work. Data standard in the form of a self-commitment by countries – to be investigated
- ▶ Cooperation with INEXDA and other groups to identify, share and document good practices (e.g. access for research, private<>public cooperation, open data, non-statistical examples)
- ▶ Use of new architecture, tools and staff skills to facilitate the sharing of confidential data (different models ... e.g. privacy-preserving techniques and new encryption techniques) and promote efficiency
- ▶ Addressing national (and international?) legal issues on the exchange of confidential information
- ▶ Cooperation with major data holders (IT G20 Presidency - data access)
- ▶ Work needs to cover principles, enablers, users – elaborate the benefits of data sharing (to users, to respondents); privacy and cybersecurity assured
