¹Compound annual rate of change for employment and output per capita; arithmetic average for unemployment rate.

²National definitions of unemployment may vary.

³Excludes the Group of Seven (Canada, France, Germany, Italy, Japan, United Kingdom, United States) and euro area countries.

⁴Output per capita is in international dollars at purchasing power parity.

⁵Data calculated as the sum of individual euro area countries.

Note: The country group composites for fiscal data are calculated as the sum of the US dollar values for the relevant individual countries.

¹On a national income accounts basis except as indicated in notes. The methodology and specific assumptions for each country are discussed in Box A1.

²Figures reported by the national statistical agency are adjusted to exclude items related to the accrual-basis accounting of government employees' defined-benefit pension plans.

³Based on ESA95 methodology, according to which swap income is excluded.

⁴In 2015, if the conversion of government's remaining preference shares to ordinary shares in one bank were excluded, the fiscal balance would be -1.1 percent of GDP.

⁵General government. Data for 2013 and 2014 include 9.5 percent and 2.3 percent of GDP, respectively, in capital injections into banks and support for deposit redemptions in banks being wound down.

⁶Data cover the consolidated central government, including social security funds but excluding privatization.

⁷Data exclude total social contributions and payments, not only social security.

⁸Data are on a budget basis.

⁹Data are on a national income basis and exclude social security transactions.

¹⁰Excludes the Group of Seven (Canada, France, Germany, Italy, Japan, United Kingdom, United States) and euro area countries.

Note: The country group composites for fiscal data are calculated as the sum of the US dollar values for the relevant individual countries.

¹On a national income accounts basis. The structural balance position is defined as actual net lending/borrowing minus the effects of cyclical output from potential output, corrected for one-time and other factors, such as asset and commodity prices and output composition effects. Because of the margin of uncertainty that attaches to estimates of cyclical gaps and to tax and expenditure elasticities with respect to national income, indicators of structural budget positions should be interpreted as broad orders of magnitude. Moreover, it is important to note that changes in structural balances are not necessarily attributable to policy changes but may reflect the built-in momentum of existing expenditure programs. In the period beyond that for which specific consolidation programs exist, it is assumed that the structural deficit remains unchanged.

²Figures reported by the national statistical agency are adjusted to exclude items related to the accrual-basis accounting of government employees' defined-benefit pension plans.

³Excludes sizable one-time receipts from the sale of assets, including licenses. For Spain, includes adjustments beyond the output cycle.

⁴Excludes the Group of Seven (Canada, France, Germany, Italy, Japan, United Kingdom, United States) and euro area countries.

⁵Excludes oil and income on the Government Pension Fund—Global.

¹Apart from interest, debt service for a particular year includes amortization of short-term debt on an original-maturity basis outstanding at the end of the previous year, plus the portion of long-term debt outstanding at the end of the previous year maturing during the current year. The projections incorporate the impact of exceptional-financing items.

²Total debt at the end of the year in percent of exports of goods and services in the year indicated.

¹Excludes service payments to the IMF.

²Interest payments and amortization on total debt. Estimates through 2020 reflect debt-service payments actually made. Estimates for 2021 and 2022 take into account projected exceptional-financing items, including accumulation of arrears and rescheduling arrangements. In some cases, amortization on account of debt-reduction operations is included.
