Executive Summary

This report updates the status of implementation, impact, and costs of the Enhanced Heavily Indebted Poor Country (HIPC) Initiative and the Multilateral Debt Relief Initiative (MDRI).¹

Debt relief provided under the Initiatives has substantially alleviated debt burdens in recipient countries. Aided by continued flexibility on the part of IDA and the Fund, substantial progress has been achieved under the Initiatives since the last report, and a number of post-decision-point countries have already benefited from debt relief.

- Since September 2008, two countries reached the decision-point and qualified for HIPC Initiative assistance, and three countries reached the completion-point and qualified for irrevocable debt relief from the HIPC Initiative and the MDRI.
- In total, 35 (out of 40) HIPCs have qualified for HIPC Initiative assistance, of which 26 have reached the completion-point.
- A number of interim HIPCs are making progress, and are expected to reach the completion-point in the next 12–18 months.
- Assistance committed to the 35 post-decision-point HIPCs represents on average about 40 percent of these countries' 2008 GDP, and after the full delivery of debt relief, will help to reduce their debt burden by about 80 percent.

However, a number of challenges remain in order to fully implement the Initiatives.

- For the remaining pre-decision and several interim HIPCs to reach completion point, they will need to strengthen their policies and institutions, underpinned by continued support from the international community.
- Another challenge is to ensure that HIPCs get full debt relief from all their creditors. These include smaller multilateral creditors, non-Paris Club bilateral official creditors, and private creditors.
- A final challenge will be to ensure that the HIPC Initiative and the MDRI are fully financed. Although resources are adequate to deliver debt relief committed to most HIPCs, additional funds would be needed to provide debt relief to protracted arrears cases, and for countries that may become eligible for HIPC Initiative debt relief in the future.

Notwithstanding debt relief, maintaining debt sustainability beyond the completion-point is a concern for many HIPCs, and the current global crisis has exacerbated such concerns. However, staff's analysis does not indicate a risk of a major debt crisis in HIPCs. Nonetheless, HIPCs need to implement sound borrowing policies and strengthen their capacity to manage their public debt—two areas where the Bank and the Fund have already been assisting their low-income members.

¹ Henceforth, for brevity references to the enhanced HIPC Initiative will drop the word "enhanced."

I. Introduction²

1. This report reviews the implementation of the Heavily Indebted Poor Country (HIPC) Initiative and the Multilateral Debt Relief Initiative (MDRI). Section II reports on the progress made in the implementation of both initiatives since the publication of the 2008 *Status of Implementation* report,³ while Section III updates the estimated costs of debt relief. Section IV discusses the main remaining challenges and Section V reviews the debt sustainability outlook of HIPCs in light of the global financial and economic crisis.

II. Progress in the Implementation of the HIPC Initiative and MDRI

- 2. Significant progress has been made in the past year, with five countries reaching key milestones:
- Reached Completion-point: Burundi (January 2009), Central African Republic and Haiti (June 2009) have reached their respective completion points and qualified for irrevocable debt relief.
- Reached Decision-point: Togo (November 2008) and Côte d'Ivoire (March 2009) have reached their respective decision points and begun receiving interim debt relief.
- A total of 35 countries (out of 40)⁴ are now past their decision point, of which 26 are past their completion point (Table 1).

² This paper was prepared by Paul Moreno-Lopez, Luca Bandiera, Mona Prasad, and Signe Zeikate (World Bank); and Bhaswar Mukhopadhyay, Kadima Kalonji, François Painchaud, Anna Unigovskaya, Jayendu De and Shannon Mockler (IMF).

³_Heavily Indebted Poor Countries (HIPC) Initiative and Multilateral Debt Relief Initiative (MDRI) - Status of Implementation (September 12, 2008).

⁴ The total number of HIPCs (i.e., countries that are potentially eligible for debt relief and may wish to avail themselves of the HIPC Initiative) decreased from 41 to 40 countries after the Nepalese authorities informed the IMF and the IDA that Nepal does not wish to avail itself of debt relief under the HIPC Initiative and MDRI.

| Eritrea | Somalia | | | | | | |

^{1/} Countries that have qualified for irrevocable debt relief under the HIPC Initiative.

3/ Countries that are potentially eligible and may wish to avail themselves of the HIPC Initiative or MDRI. 4/ In February 2009, the Nepalese authorities communicated to IDA and the IMF that Nepal had decided not to avail itself of debt relief under the HIPC Initiative. Accordingly, Nepal has been removed from the list. 5/The Kyrgyz authorities indicated in early 2007 that they did not wish to avail themselves of debt relief under the HIPC Initiative but subsequently expressed interest in the MDRI. Based on the latest available data, however, indebtedness indicators were estimated to be below the applicable HIPC Initiative thresholds, while income levels were estimated to be above the IMF MDRI thresholds

- 3. While preserving the core principles of the HIPC initiative, IDA and the IMF have continued to make use of the flexibility available in the framework.⁵ This has allowed HIPCs to receive early debt relief by taking into account individual country situations.
- Pre-decision-point arrears clearance operations: Major multilateral creditors, including the African Development Bank (AfDB) and IDA, provided grants in support of arrears clearance operations for Togo and Côte d'Ivoire, which facilitated their reaching the decision point. In both countries, early (i.e. pre-decision point)

⁵ See section II.B of the 2008 Status of Implementation report for a review of the HIPC cases in which flexibility was exercised in the past.

^{2/} Countries that have qualified for assistance under the HIPC Initiative (i.e., reached decision point), but have not yet reached completion point.

⁶ In Togo, IDA provided an exceptional allocation of US\$146 million through a development policy operation, on grant terms, which was used to finance the arrears clearance to IDA. The AfDB provided US\$24 million, 99 percent on grant terms from its Fragile States Facility, to finance arrears clearance to AfDB. In Côte d'Ivoire, a similar grant-financing mechanism applied to half of the arrears to IDA (US\$271 million) and two-(continued)

- clearance of arrears was made possible by the HIPC Initiative's provision that allows the grant element of the clearance of arrears to count towards HIPC Initiative debt relief.
- Establishment of a track record of reforms and economic stability: Côte d'Ivoire, after emerging from years of civil conflict with significantly weakened institutional and administrative capacity, was able to build a track record towards the decision point with the implementation of programs supported by two consecutive Emergency Post-Conflict Assistance (EPCA) purchases.
- Progress towards completion-point triggers: Judgment has continued to be used in this area. In the cases of Burundi and Haiti, while some triggers had been only partially implemented, the Boards decided that sufficient progress had been made towards the underlying objectives.
- Preparation and implementation of poverty reduction strategies: Togo reached the decision point on the basis of an Interim-Poverty Reduction Strategy Paper (I-PRSP). In a country with limited administrative capacity, debt relief could have been significantly delayed had a full PRSP been required.
- 4. **Debt relief provided under the Initiatives has substantially alleviated debt burdens in recipient countries.** The overall assistance committed to the 35 post-decision-point HIPCs under the Initiatives represents on average about 40⁷ percent of these countries' 2008 GDP. The debt burden for these countries is expected to be reduced by about 80 percent, compared to pre-decision-point levels, owing to this debt relief, together with relief under traditional mechanisms and additional ("beyond HIPC") relief from Paris Club creditors (Figure 1).

thirds of the arrears to the AfDB (US\$357 million, which is in excess of the required HIPC relief of US\$200 million).

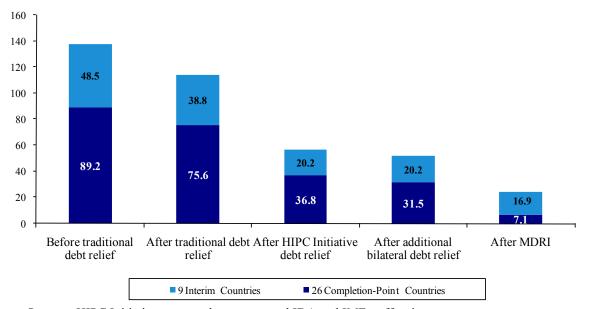

⁷ Compared to last year's report, the ratio of nominal debt relief committed in percent of GDP is lower by 10 percentage points, due to GDP growth and smaller nominal debt relief ratios for the two additional countries (Côte d'Ivoire and Togo) that reached decision point.

⁸ Debt relief committed under the Initiatives amounts to around US\$124 billion in nominal terms, of which about US\$52 billion are under the MDRI (including projected assistance under the MDRI to interim HIPCs).

9

Note: Estimates based on decision-point debt stocks.

2009.

5. Beyond debt relief, IDA and the IMF are providing other forms of assistance to help countries maintain debt sustainability. Specifically, such assistance has taken the following forms:

• Scaling up of debt management technical assistance to Low-Income Countries (LICs) and IDA-only countries through the Debt Management Facility (DMF). As of end-July 2009, Debt Management Performance Assessments (DeMPAs) were carried out in 33 countries, including 21 HIPCs. These assessments will help country

⁹ These efforts are being supported by financing from the Debt Management Facility, a grant facility financed by a multi-donor trust fund managed by The World Bank, established in November 2008. The DMF helps strengthen debt management policies and institutions in eligible countries by financing the systematic application of the World Bank's Debt Management Performance Assessment (DeMPA) tool. It also supports World Bank participation in technical assistance efforts to facilitate the country-led application of a toolkit for formulating and implementing a Medium-Term Debt Management Strategy (MTDS). The Fund intends to establish a debt-related Topical Trust Fund to help provide resources to support the Fund's involvement in this work. See "Managing Public Debt: Formulating Strategies and Strengthening Institutional Capacity", March,

¹⁰ A methodology for identifying the strengths and weaknesses of debt management operations through a set of indicators spanning the full range of government debt management functions. See *Economic Policy and Debt*.

authorities identify areas where technical assistance might be required to achieve a satisfactory level of capacity. Technical assistance in implementing the Medium-Term Debt Strategy (MTDS) toolkit¹¹ has been provided to six countries since the last Status of Implementation report.

- Efforts to promote the use of the Debt Sustainability Framework (DSF) are also continuing ¹². The Fund and the Bank have continued DSF outreach activities by organizing three workshops for country authorities from low-income countries, including HIPCs. Since 2006, outreach efforts have been successful in enhancing coordination among creditors ¹³ and promoting better understanding of the DSF among debtors as a guide for their borrowing decisions. In addition, IDA's non-concessional borrowing policy (NCBP) stresses the importance of sound debt management, improved debt reporting, and, if warranted by debt sustainability concerns, a reduction in the volume of IDA financing and adjustment to IDA lending terms. ¹⁴
- 6. Concomitant with progress under the Initiative, HIPCs were able to increase their poverty reducing expenditure. For the 35 post-decision-point HIPCs, poverty reducing expenditure between 2001 and 2008 increased by 2 percentage points of GDP, on average, while debt service obligations declined by the same order of magnitude (Figure 2, and Table 1 in the Appendix).
- 7. **Despite these positive developments, post-completion-point HIPCs have made uneven progress towards meeting their MDGs**. With the exception of improvements in primary education and ensuring gender equality, more than half of post-completion-point

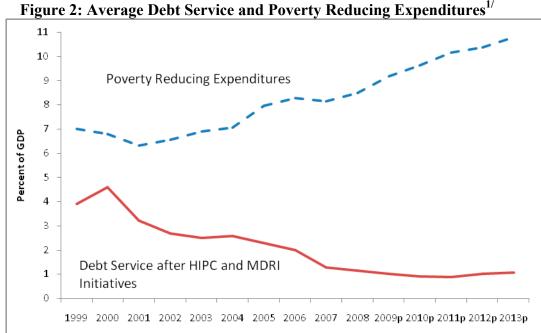

¹¹ The available toolkit includes a Guidance Note, a template for strategy documentation, and a quantitative tool for cost-risk analysis, with a User's Guide. See *Managing Public Debt-Formulating Strategies and Strengthening Institutional Capacity* and *Economic Policy and Debt*.

¹² See "A Review of Some Aspects of the Low-Income Country Debt Sustainability Framework", August 2009.

¹³ First, an increasing number of MDBs (AfDB, AsDB, IaDB and IFAD) incorporate elements of the DSF into their own financing terms or take into account DSF risk ratings. Second, the new AfDB policy on non-concessional debt accumulation mirrors the IDA's Non Concessional Borrowing Policy (NCBP). Third, the OECD Working Group on Export Credits and Guarantees adopted a set of sustainable lending guidelines in January 2008, which include an agreement to adhere to IDA and IMF concessionality requirements in low-income countries. Finally, Bank and IMF staff have also attended various meetings with private creditors to share information on the DSF.

¹⁴ To end-July 2009, eight countries that had contracted debt with a lower than required grant element were assessed under the IDA's NCBP. The results of the assessments reflected the case-by-case approach adopted within the parameters set out in the framework. Thus far, there have been three exceptions to the NCBP (Mali, Rwanda and Senegal), two cases of hardening of the terms (Angola and Ghana) to reflect the countries' increased market access, and two preliminary exceptions (Mauritania and DRC).

HIPCs are unlikely to meet their MDGs (See Table 3 in Annex I).¹⁵ Progress has been slowest in fragile states, which present difficult political and governance challenges for effective delivery of development finance and services.¹⁶

Sources: HIPC documents; and IMF staff estimates.

¹/Prior to 2008, figures represent debt-service paid, and thereafter, debt-service figures are projected. For detailed country data refer to Appendix Table 2.

III. AN UPDATE ON THE COSTS OF THE HIPC INITIATIVE AND THE MDRI

8. The total cost of HIPC Initiative debt relief to creditors is estimated at US\$74 billion in end-2008 NPV terms (Table 2). More than half of the cost, or US\$39 billion, represents irrevocable debt relief to the 26 post-completion-point countries. The cost for the 9 interim countries amounts to US\$19 billion, an increase of around 9 percent from last year. This is mainly on account of Côte d'Ivoire, whose estimated cost of HIPC Initiative relief amounted to US\$3 billion in end-2008 NPV terms. The cost of HIPC Initiative debt relief to the remaining five pre-decision-point HIPCs is estimated at US\$17 billion, most of which is accounted for by two countries—Sudan and Somalia. Topping-up

_

¹⁵ Compared to results achieved in the five Latin American HIPCs, sub-Saharan African (SSA) HIPCs lag behind particularly in reducing child mortality and ensuring gender equality. However, SSA HIPCs fare better in improving access to education and controlling the spread of HIV/AIDS and other diseases.

¹⁶ See "Global Monitoring Report 2009", The World Bank and the IMF.

12

assistance (provided so far to six HIPCs) represents less than 3 percent of the total HIPC Initiative cost.¹⁷

9. Multilateral (45 percent) and Paris Club (36 percent) creditors bear the largest shares of the total cost of the HIPC Initiative (Table 2). Among multilateral creditors, the heaviest burdens are borne by IDA (20 percent), the IMF (9 percent) and the AfDB Group (7 percent). The share of total cost borne by multilateral creditors is higher for post-completion-point countries (55 percent) than for interim countries (36 percent) or predecision-point countries (32 percent). Looking ahead, Paris Club creditors will be called upon to deliver a larger share of relief to interim countries, estimated at 47 percent, compared to about one-third for post-completion-point and pre-decision-point countries. For non-Paris Club and commercial creditors, their share of total costs is estimated to be highest in pre-decision-point countries (34 percent) (Table 3).

10. With respect to MDRI, the total cost to the four participating creditors is estimated at US\$29 billion in end-2008 NPV terms. About 85 percent has already been

¹⁷ These include Burkina Faso, Ethiopia, Malawi, Niger, Rwanda, and São Tomé and Principe.

-

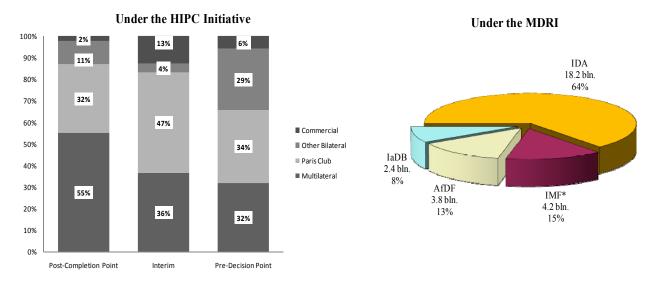

^{1/} Total costs as reported in Table 2 of "HIPC Initiative and MDRI: Status of Implementation, September 2008", discounted to end-2008 terms. Cost calculations exclude Nepal

^{2/}Since August 2008, Burundi, the Central A frican Republic, and Haiti reached completion point; Togo and Cote d'Ivoire reached the decision point, Nepale se authorities communicated to IDA and the IMF that Nepal had decided not to a vail itself of debt relief under the HIPC Initia tive.

delivered to the 26 post-completion-point countries (Table 3), and two non-HIPCs (Cambodia and Tajikistan) by the IMF. Two thirds of the total estimated MDRI cost will be borne by IDA, with the share of the IMF, AfDF and IaDB amounting to 15, 13, and 8 percent, respectively (Figure 3).

IV. REMAINING CHALLENGES

11. While recent progress under the Initiatives has been encouraging, three important challenges remain to be met to fulfill the objectives of the Initiatives.

A. Taking Remaining Countries through the HIPC Initiative Process

12. Many of the pre-completion-point countries have suffered from common challenges related to preserving peace and stability, improving governance, and delivering basic services that have undermined their economic development. ¹⁸ Addressing their debt-related

^{1/} These countries have qualified for MDRI relief. Figures are based on actual disbursements and commitments.

^{2/} Estimates are preliminary and subject to various assumptions, including the timing of HIPC decision and completion points, and, where applicable, of arrears clearance.

^{3/} The estimated costs for IMF reflect the stock of debt eligible for MDRI relief, which is the debt outstanding (principal only) as of end-2004 and that has not been repaid by the member and is not covered by HIPC assistance at the time of the debt relief (EBS/05/158 Revision 1.12/1)

^{4/} IMF MDRI assistance to Cambodia and Tajikistan.

^{5/} Includes IMF MDRI assistance to Burundi and Central African Republic.

All but one of the remaining 14 pre-completion-point HIPCs are considered fragile states according to the definition adopted by the World Bank. For the purposes of this report, fragile states are IDA-eligible countries with an average Country Performance and Institutional Assessment (CPIA) rating of 3.2 and below. However, different organizations use different parameters to assess fragility, in general combining aspects of the capacity (continued)

vulnerabilities through the HIPC Initiative and MDRI relief will be an important step to overcome their development challenges.¹⁹

13. A number of countries are well placed to make significant progress under the Initiative during the next 12-18 months (Annex I).

- Interim countries at an advanced stage: Afghanistan, Liberia, and the Republic of Congo are well placed to reach their completion points—their Poverty Reduction and Growth Facility (PRGF) supported programs are on track, they have developed and implemented poverty reduction strategies for at least one year, and have made significant progress in implementing their floating completion-point triggers.
- Interim countries at a less advanced stage: Togo and Côte d'Ivoire are at earlier stages of implementation of their completion-point triggers, and are also making progress as their PRGF-supported programs are on track.
- *Pre-decision-point countries:* Comoros' request for a PRGF-supported program is expected to be considered by the Executive Board of the Fund by end-September.²⁰ Successful implementation of the program should lay the basis for reaching the decision point in the first half of 2010.
- 14. The remaining interim countries have been at that stage longer than any others (Figure 4). This is in contrast to the relatively short interim periods in countries that reached the completion point within the past 12 months, and points to the challenges ahead in sustaining progress under the Initiatives.

and accountability of institutions with indicators related to risk of conflict. See "*IDA15*: *Operational Approaches and Financing in Fragile States*", June 2007.

¹⁹ Additionally, building institutional capacity, including through the strengthening of public financial management (PFM) systems will be key to ensuring more effective and efficient use of the resources freed-up by debt relief.

²⁰ On July 23, 2009, the Executive Board of the IMF approved wide-ranging reforms of Low-Income Country (LIC) lending facilities that will become effective once contributors to the PRGF-ESF Trust consent to the changes. Once effective, the PRGF will be automatically converted into the Extended Credit Facility (ECF). This paper, however, continues to refer to prospective long-term arrangements as PRGFs.

Sources: HIPCs decision and completion point documents.

15. Nonetheless, in some of these countries, the prospects for progress under the Initiatives have recently improved.

- Guinea-Bissau experienced many years of conflict, but has since implemented a
 program with the IMF supported by EPCA purchases that could pave the way for a
 PRGF arrangement in the future. The PRSP's annual progress report is expected by
 end-2009.
- The Democratic Republic of Congo (DRC), which underwent years of internal conflict, is at an advanced stage in its discussions with the IMF on a PRGF-supported program. A final agreement may be reached in the coming months once pending issues related to large nonconcessional borrowing are resolved.
- In Chad, years of conflict and political instability, together with external financing from oil revenues, contributed to slow progress towards the completion point. However, following the decline in oil prices and emerging budgetary pressures,

agreement was reached on a IMF staff-monitored program (SMP) covering April-October 2009 which, with suitable implementation of the SMP, may be followed by a PRGF arrangement.

16. The main obstacles to the remaining countries' progress under the HIPC Initiative continue to be primarily of a political and/or security nature.

- Guinea, which had implemented most of its completion-point triggers, suffered a setback after a military coup in December 2008. The new regime does not currently enjoy broad international recognition. This has led to the suspension of discussions for the finalization of the second review of the PRGF-supported program and of the HIPC completion point, and several key financial assistance programs from other major development partners have been suspended.²¹
- Somalia and Sudan, afflicted by internal division and conflict, have protracted arrears to multilateral institutions. They will need to mobilize resources to clear their arrears prior to reaching their decision point.²² Mobilizing such resources will be challenging, given the size of arrears.
- Eritrea's authorities indicated in 2008 discussions that they would consider seeking HIPC Initiative assistance once the security situation improves.
- 17. The Kyrgyz Republic has not expressed a willingness to avail itself of debt relief under the HIPC Initiative. Based on the latest available data, however, debt indicators were estimated to be below the applicable HIPC Initiative thresholds.

B. Ensuring the Full Participation of All Creditors

18. It is critical that all creditors deliver their share of debt relief to significantly alleviate the debt burdens of the remaining HIPCs. This is consistent with the objective of the Initiative to share equitably the burden of relief among all creditors. Large multilateral and Paris Club creditors have provided their full share of debt relief. Accordingly, the discussion below focuses on other creditors.

-

²¹ The authorities issued the second PRSP in August 2007, and a Joint Staff Assessment Note (JSAN) was prepared and presented to the Board in December 2007. The first Annual Performance Review of the PRSP-II was issued in October 2008.

²² As of end-December 2008, Somalia's arrears to IDA and the IMF amount to US\$192 million and US\$373 million. Sudan's arrears to IDA and the IMF total US\$508 million and US\$1,532 million.

Small Multilateral Creditors

- 19. **Nearly all multilateral creditors have committed to delivering HIPC Initiative debt relief at completion point.** In addition to the largest four creditors²³ (Table 3), another 20 multilateral creditors, accounting for 14 percent of total HIPC assistance costs, have committed to deliver debt relief to all HIPCs at completion point.²⁴ Six of these creditors also provide debt relief in the interim period through debt service reduction or rescheduling of arrears and maturities falling due.²⁵ However, another eight multilateral creditors, representing less than 0.5 percent of estimated HIPCs costs, have not yet indicated their intention to provide relief under the HIPC Initiative.²⁶
- 20. **Efforts at monitoring debt relief provided by smaller multilateral creditors are ongoing.** A survey carried out in 2009 by the World Bank, to which seven of the smaller multilateral creditors²⁷ responded, indicates that such creditors have delivered half or more of their committed debt relief to completion-point countries. Staffs are working with their counterparts in the remaining multilateral development banks (MDBs), representing HIPC costs amounting to about 5 percent of the total committed to post-completion-point HIPCs, to increase responses and institutionalize the tracking mechanism.

Non-Paris Club Official Bilateral Creditors

21. Progress in the delivery of debt relief by non-Paris Club bilateral creditors has been limited since last year's report. ²⁸ The share of HIPC Initiative debt relief delivered by

²⁴ See Table 5 in the Appendix for a complete list of multilateral creditors.

²³ IDA, IMF, AfDB and IaDB.

²⁵ These creditors are the European Union, the European Investment Bank, the Arab Bank for Economic Development in Africa, Central American Bank for Economic Integration (to Honduras only), Islamic Development Bank and OPEC Fund for International Development.

²⁶ These creditors are: Bank of Central African States (BEAC), Central African States Development Bank (BDEAC), the Economic Community of West African States (ECOWAS), Eastern and Southern African Trade and Development Bank (PTA Bank), Development Bank of Great Lake States (BDEGL), Fund of Aid and of Loans Guarantee of the Agreement Council (FEGECE), Fondo Centroamericano de Estabilización Monetaria (FOCEM), and the Islamic Fund for Solidarity and Economic Development (FSID).

²⁷ These creditors are the Northern Development Fund (NDF), Nordic Investment Bank (NIB), European Union (EU), European Investment Bank (EIB), Islamic Development Bank (IsDB), Central American Bank for Economic Integration (CABEI), and International Fund for Agricultural Development (IFAD). For details of the amounts of committed and delivered relief under the HIPC Initiative to post-completion point countries by each MDB, see Table 5 in the Appendix.

²⁸ Includes Argentina, Brazil, the Republic of Korea, Kuwait, Mexico, Morocco, Portugal, South Africa, and Trinidad and Tobago, which are associated members of the Paris Club. As such, these countries participate in negotiation sessions of the Paris Club on a case-by-case basis.

these creditors, which represents about 13 percent of the total cost, remains low, at around 35–40 percent (Appendix Table 15). Major developments include the cancellation of claims by Algeria on the Central African Republic and the provision of its full share of debt relief to Nicaragua; China's delivery of debt relief to Burundi and the Central African Republic;²⁹ and the full provision of debt relief by Oman to Senegal, and by Portugal to São Tomé and Príncipe.

Commercial Creditors

- 22. Commercial creditors account for 6 percent of the total cost of debt relief to be provided to the 35 post-decision-point HIPCs. Commercial creditors' share of the cost estimates of debt relief to be provided to post-decision-point-HIPCs has been increasing primarily because those creditors account for over 30 percent of total HIPC debt relief to Côte d'Ivoire.
- 23. Commercial creditors have improved their overall provision of debt relief through significant debt relief provided to Côte d'Ivoire and Liberia. London Club creditors, accounting for nearly one-third of total HIPC assistance to Côte d'Ivoire, have already provided their expected debt relief through a rescheduling agreement signed in 1998. In April 2009, commercial creditors provided full debt relief to Liberia under a debt buyback operation supported by the Debt Reduction Facility (DRF) of IDA and contributions from bilateral donors, which helped extinguish US\$1.2 billion of commercial debt at a deep discount (97 percent of face value).
- 24. Litigation by commercial creditors, which had been an impediment to the delivery of full debt relief to HIPCs, appears to be less of a problem now, according to information provided by HIPCs' authorities.³¹ Early engagement with commercial creditors, including through DRF operations, helped reduce the number of outstanding litigation cases against HIPCs from 33 to 14 cases over the past year.³² This large reduction in litigations

²⁹ China's delivery of debt relief occurred in 2007 for both Burundi and the Central African Republic (before they reached their completion point).

³¹ Surveys were sent to country authorities requesting data on litigations. More than half of those surveyed responded (25 HIPC countries out of 40), which is broadly similar to last year's response rate. The results of the survey are broadly comparable to those from a survey undertaken by the Institute of International Finance (see IIF/EMTA Study on Creditor Litigation against Sovereigns).

³⁰ Debt relief by commercial creditors to Côte d'Ivoire was not previously accounted for until Côte d'Ivoire reached its decision point under the HIPC Initiative in March 2009.

³² The 2008 *Status of Implementation Report* indicated that 54 court cases had been filed by commercial creditors against 12 HIPCs over the past decade. Of these 54 cases, 33 were still active (i.e. not settled) at the time of the publication of the report. Since then, the number of active litigation cases has declined to 14.

mostly reflects the impact of recent DRF operations in Nicaragua and Liberia, as well as out-of-court settlements by Cameroon, the Republic of Congo, Sierra Leone and Zambia.³³ Furthermore, a joint litigation by five creditors against Nicaragua was dropped.

- 25. While recent developments are encouraging, the threat of new litigation remains. New lawsuits have been initiated last year against the DRC, Sierra Leone, Sudan and Zambia. DRF operations under preparation, including those for the DRC and Sierra Leone, may help reach a settlement agreement to the extent that the litigating creditors participate in the buyback operations. Additional support for HIPCs facing litigation will be available from the African Legal Support Facility³⁴ which was formally launched by the African Development Bank on June 29, 2009.
- 26. **Initiatives are underway in some donor countries to introduce legislation curtailing the scope of litigation against HIPCs.** In both the United States and the United Kingdom, options are being considered to introduce legislation to limit non-participating creditors' ability to seek awards from HIPCs via the courts in the U.S. and U.K. To this end, the U.K. Government has launched a consultation on legislation that would limit the proportion of debts previously contracted by a HIPC that a creditor could reclaim under U.K. law. The U.S. Congress is considering similar proposals. In May 2008, a law to this effect was also introduced in Belgium. The U.S. Congress is considering similar proposals.

C. Ensuring Financing of the HIPC Initiative and MDRI

- 27. At the World Bank, the Debt Relief Trust Fund (DRTF) and IDA are sufficiently resourced to cover debt relief costs under the HIPC Initiative over the IDA15 commitment period (FY09-11). Based on current commitments, it is expected that future IDA replenishments would include sufficient resources to finance IDA's cost of debt relief under the Initiatives.
- The DRTF, in addition to supporting the regional and multilateral creditors in providing HIPC debt relief to eligible HIPCs, may utilize received donor contributions for arrears clearance operations of IDA, as well as possible

³³ For Nicaragua, these are litigations settled in September and December 2008 as part of the DRF supported operation of October 2007.

³⁴ On December 15, 2008, 29 countries and one international organization ratified the Agreement creating the Facility hosted by the AfDB, thereby enabling it to come into force. See <u>African Legal Support Facility</u>.

³⁵ See Ensuring effective debt relief for poor countries: a consultation on legislation.

³⁶ See the "Stop VULTURE Funds" Bill introduced in June 2009 as H.R. 2932.

³⁷ See http://reflex.raadvst-consetat.be/reflex/pdf/Mbbs/2008/05/16/109374.pdf.

contributions from IBRD net income to meet any remaining structural gap in the MDRI financing framework. To mid July 2009, donors have pledged close to US\$4 billion to the DRTF to support the eligible regional and sub-regional creditors, and have contributed more than US\$3.8 billion in the form of cash and promissory notes (See Appendix table 10). The Trust Fund has disbursed more than US\$2.8 billion to these creditors to support their provision of debt relief to eligible HIPCs. 40

- *IDA resources* to finance debt relief under the Initiatives for the IDA 15 commitment period (FY09-11) include donor contributions amounting to SDR 1.1 billion for HIPC relief and SDR 4.1 billion for debt forgiveness under the MDRI. In IDA 15, donors also committed SDR 0.9 billion to finance the full cost of arrears clearance by eligible countries to IDA and the IBRD through the DRTF.⁴¹
- 28. For the IMF, available resources are estimated to be sufficient to cover the projected cost of debt relief to all the remaining HIPCs, except the protracted arrears cases of Somalia and Sudan. Because there was no provision for debt relief to Somalia and Sudan under the original HIPC/MDRI financing framework, additional resources would be needed when these countries are ready to embark on the HIPC Initiative (see paragraph 8 above). Additional resources would also need to be mobilized to finance debt relief to any new countries that may be found eligible for the HIPC Initiative and the MDRI.

V. DEBT SUSTAINABILITY

29. **Debt relief provided under the Initiatives has considerably reduced debt vulnerabilities in post-completion-point countries.** Debt vulnerabilities in post-completion-point HIPCs—as measured by the distribution of Debt Sustainability Framework (DSF, Box 1) risk ratings—are on average much lower than in pre-completion-point HIPCs. The comparison with non-HIPCs is also favorable (Table 4). However, a few post-completion-point countries remain vulnerable to debt-related problems. Five are still

³⁸ Following the receipt of written consent from donors to the HIPC Trust Fund to widen the scope of the Trust Fund, the Executive Directors of IBRD and IDA, on October 6, 2008, approved the resolutions to amend the scope of the HIPC Trust Fund and to change the name of the HIPC Trust Fund to "**Debt Relief Trust Fund**".

³⁹ Table 10 in the Appendix excludes donors' contributions earmarked for IDA provided in the context of IDA14 and IDA15.

⁴⁰ Regional and sub-regional eligible creditors include: AfDB, BOAD (West African Development Bank), CABEI (Central American Bank for Economic Integration), CAF (Corporación Andina de Fomento), CDB (Caribbean Development Bank), CMCF (CARICOM Multilateral Clearing Facility), EADB (East African Development Bank), FONPLATA (Fund for the Financial Development of the River Plata Basin), IaDB, IFAD (International Fund for Agricultural Development), and NDF (Nordic Development Fund).

⁴¹ To date, the Trust Fund has received and reimbursed approximately US\$2.9 billion to IDA out of allocations from IBRD's net income and creditor-specific contributions made by donors to the Debt Relief Trust Fund.

characterized as being at a high risk of debt distress.⁴² It should be noted that these risk ratings are based on the most recent DSAs endorsed by the Boards which have generally been undertaken during the last year. For many such DSAs, the underlying macroeconomic framework may not fully reflect the adverse impacts of the ongoing global financial crisis.

Box 1: Debt Sustainability Framework

The objective of the joint Fund-Bank debt sustainability framework (DSF), which was introduced in 2005, is to support low-income countries (LICs) in their efforts to achieve their development goals without creating future debt problems.¹

The debt sustainability analysis (DSA) under the DSF focuses on five debt burden indicators in order to assess the risk of external public debt distress, namely: (i) present value (PV) of debt-to-GDP; (ii) PV of debt-to-exports; (iii) PV of debt-to-revenues; (iv) debt service-to-revenues; and (v) debt service-to-exports.

A risk of debt distress rating is derived by reviewing the evolution of debt burden indicators compared to their indicative policy-dependant debt-burden thresholds under a baseline scenario, alternative scenarios and stress tests. Countries can be classified as: (i) low risk; (ii) moderate risk; (iii) high risk; or (iv) in debt distress.

The thresholds depend on a country's quality of policies and institutions as measured by the three-year average of the Country Policy and Institutional Assessment (CPIA) index, compiled annually by the World Bank. ²

30. **Recent global developments pose additional challenges for all HIPCs, including post-completion-point countries.** In particular, the global economic downturn is expected to have a strong negative effect on low-income countries through exports, FDI, remittances and (possibly) aid flows. The adverse impact on economic activity and government revenues is expected to lead to increased budgetary and external financing gaps in many countries. ⁴³ As a result, it is anticipated that debt burden indicators in all LICs will deteriorate, although the magnitude of the deterioration will depend on the persistence of the downturn and the degree of macroeconomic adjustment.

See "Staff Guidance Note on the Application of the Joint Fund-Bank Debt Sustainability Framework for Low-Income Countries", IMF/The World Bank, 2008.

² The indicative policy-dependant thresholds correspond to probabilities of debt distress ranging between 18 and 22 percent for CPIA ratings of 3.25, 3.5 and 3.75 (the benchmarks set for weak, moderate and strong performers, respectively).

⁴² This compares to four countries last year – Burkina Faso, Gambia, São Tomé and Príncipe and Rwanda. While Rwanda's rating was upgraded to moderate in the past year, the list now also includes Burundi and Haiti, two HIPCs that reached their completion point in 2009.

⁴³ See *The Implications of the Global Financial Crisis for Low Income Countries*, IMF, February 2009; and *Global Development Finance*, The World Bank, 2009.

Table 4. Distribution of risk of debt distress by country groupings¹

| | | (iı | roup) | | |
|---|------------------------|------|----------|------|------------------|
| ountry Groupings | Number of Countries | Low | Moderate | High | In debt distress |
| II LICs 2/ | 70 | 30.0 | 34.3 | 22.9 | 12.9 |
| Non-HIPCs and completion point HIPCs | 57 | 36.8 | 38.6 | 21.1 | 3.5 |
| Non-HIPCs | 31 | 35.5 | 35.5 | 22.6 | 6.5 |
| Completion point HIPCs | 26 | 38.5 | 42.3 | 19.2 | 0.0 |
| Other HIPCs (pre-completion point HIPCs) 3/ | 13 | 0.0 | 15.4 | 30.8 | 53.8 |
| Interim countries | 9 | 0.0 | 11.1 | 33.3 | 55.6 |
| Pre-decision point countries | 4 | 0.0 | 25.0 | 25.0 | 50.0 |

^{1/}Based on debt sustainability analyses available as of end-July 2009.

31. Staffs have analyzed the impact of the crisis on debt vulnerabilities in HIPCs using a two-pronged approach.

- Where a member's DSA was issued to the Boards recently (i.e., after end-May 2009), the analysis is based on the DSA. 44
- In all other cases, the impact of the crisis on debt vulnerabilities is simulated by updating the most recent DSA using the macroeconomic projections contained in the August WEO submission (see Box 2).⁴⁵

32. The criteria used in the simulations to define the impact of the crisis on countries' debt vulnerabilities depend on their initial risk ratings.

Countries presently rated to be at low or moderate risk of external debt distress are
judged to be vulnerable to adverse debt developments if the analysis indicates the
possibility of a rating downgrade. However, such developments signal a
deterioration in the long-term debt outlook of these countries, rather than an
impending debt crisis.

^{2/} Excludes 8 PRGF-eligible countries (Azerbaijan, India, Kiribati, Maldives, Pakistan, Somalia, Timor Leste and Uzbekistan), for which LIC DSAs are unavailable or were not produced because countries had significant market access.

^{3/} Excludes Somalia, as no DSA is available.

⁴⁴ It is assumed that such DSAs are based on macroeconomic frameworks that capture the impact of the crisis more fully than projections underlying older DSAs. Recent DSAs were done for Benin, Burkina Faso, Cameroon, the Central African Republic, the Republic of Congo, Ghana, Haiti, Madagascar, Mozambique, Rwanda, and Senegal.

⁴⁵ While the last published WEO was issued in April 2009, Fund staff have submitted internal updates to those WEO country forecasts.

- For high-risk countries, a different yardstick needs to be used to identify countries
 most vulnerable to the crisis from a debt sustainability perspective. Specifically,
 such countries are deemed to be more vulnerable if at least two debt burden
 indicators experience a large and sustained breach of their DSF thresholds. Such
 developments in high-risk countries may point to more severe and pressing debtrelated problems.
- 33. Overall, the crisis is expected to have a significant impact on key macroeconomic aggregates in HIPCs. A comparison of the macroeconomic projections in recent DSAs and in the August WEO submission with the projections in older DSAs indicates, on average, a downward revision of nominal GDP by about 7 percent, exports by about 9 percent, and government revenue by 12 percent.
- 34. The staffs' analysis of the impact of the crisis does not suggest a risk of a major debt crisis in HIPCs, but points to an increase in debt vulnerabilities for a number of countries. 46, 47
- *High-risk countries*: Afghanistan, an interim HIPC, is likely to experience a large increase in its debt burden indicators.
- Moderate-risk countries: Five post-completion-point HIPCs could face increased debt vulnerabilities: Ethiopia, Malawi, Mauritania, Nicaragua, and Sierra Leone. For Ethiopia, Mauritania and Nicaragua the breach of DSA thresholds under the updated scenarios are temporary and/or limited.
- *Low-risk countries*: Mali, a post-completion-point country, could also face increased debt vulnerabilities. Nonetheless, while more vulnerable now, Mali's debt-related problems do not appear to be serious.
- 35. **High debt vulnerabilities in post-completion-point countries pose more serious problems than in pre-decision-point and interim countries.** For pre-decision-point countries, HIPC debt relief can be tailored to their specific circumstances, while HIPC debt relief committed at the decision-point to interim countries may be topped-up if the deterioration in debt indicators results from shocks beyond the country's control. In contrast,

⁴⁷ While the more recent DSAs typically show increased debt vulnerabilities, no country has experienced a deterioration of its risk rating. In the recent DSAs, only the Central African Republic has experienced a change in its risk of debt distress (improvement from high risk to moderate) after it received HIPC and MDRI debt relief.

_

⁴⁶ The increase for countries for which the analysis is based on simulations is in relation to the latest available DSAs, and for those where the analysis is based on a recently available DSA, the comparison is with the previous DSA.

these mechanisms are no longer available to address a deterioration in the debt outlook for post-completion-point countries.

36. These results have a number of important policy implications.

- Close monitoring of debt developments in high-risk post-completion countries will be needed to safeguard debt sustainability, and countries at higher risk will need to adopt particularly prudent fiscal and borrowing policies to reduce debt-related vulnerabilities.
- Donors and official creditors will need to provide HIPCs with highly concessional resources in order to maintain debt sustainability and avoid excessive adjustment in the more vulnerable countries. At the same time, tighter fiscal constraints in donor and creditor countries raise concerns over the availability of additional highly concessional resources. The lack of adequate concessional resources combined with a longer recession, could worsen further debt indicators and lead to the remergence of debt related problems in post-completion-point HIPCs who have exhausted all of the standard avenues of debt relief.
- It is imperative that efforts to improve debt management capacity be sustained (for both external and domestic public debt).

37. The Bank and the Fund are taking a number of steps to help countries that have been affected by the crisis.

• IDA has made highly concessional financing available for vulnerable countries. At the Fund, as part of the reform of its LIC financing facilities, the IMF's Board increased significantly the volume of concessional resources available for lending to LICs, approved temporary forgiveness of interest on all concessional loans through end-2011, as well as on all outstanding ENDA/EPCA credit through end-January 2012,⁴⁹ and adopted a more concessional interest rate structure for the medium term.⁵⁰

⁴⁸ The *2009 DAC Report on Aid Predictability: Survey of Donors' Forward Spending Plans 2009-2011* surveyed donors' participation in initiatives to mitigate the adverse impact of the crisis. The report indicates a number of bilateral and multilateral initiatives and highlights the importance of sustained and scaled-up resources to fill the public expenditure gap of low-income countries. At the same time, a survey of donors intentions indicated a frontloading of budget support expenditures in 2008, followed by declines in 2009-2011. The anticipated reductions in 2009-2011 could reflect short-term programming uncertainties or the impact of the crisis on donor's aid budgets.

⁴⁹ This becomes effective upon receipt of all contributors' consent.

⁵⁰ See <u>A New Architecture of Facilities for Low-Income Countries</u>, IMF, 2009.

- The Bank and the Fund have also continued to advocate to donors the importance of providing concessional financing for vulnerable countries and, more generally, of honoring prior commitments on aid to LICs.
- The staffs are providing LIC members policy and technical advice as regards the appropriate response to the crisis.
- The staffs also continue to provide technical assistance to improve debt management capacity and training in the use of the DSF, as mentioned above.

VI. CONCLUSIONS

- 38. Very significant progress has been achieved in implementing the HIPC Initiative and the MDRI. With 35 of 40 eligible countries reaching the decision point by end June-2009—of which 26 have reached the completion point—the HIPC Initiative has provided much needed debt relief to most HIPCs. A number of the remaining interim HIPCs are also well placed to progress towards completion point in the period ahead, and benefit from irrevocable debt relief under the Initiatives.
- 39. **Nonetheless, some important challenges remain in order to fully implement the Initiatives.** Some pre-decision point countries continue to be affected by severe political problems, while in a number of long-standing interim countries, the progress that has been achieved of late is still at a nascent stage. To reach the completion point, they will need to further strengthen their policies and institutions, and require continued support from the international community. In this regard, it is important for all creditors to provide their full share of HIPC debt relief, and for donors to ensure that the Bank and the Fund have adequate resources to provide their share of debt relief under the Initiatives to all eligible countries.
- 40. **Notwithstanding debt relief, maintaining debt sustainability beyond the completion-point remains an issue for many HIPCs.** The analysis conducted by the staff reveals that the current global crisis has exacerbated debt sustainability concerns for a number of countries, but the analysis does not indicate a risk of a major debt crisis in HIPCs. Nonetheless, HIPCs need to implement sound borrowing policies and strengthen their capacity to manage their public debt—two areas where the Bank and the Fund have already been assisting their low-income members.

Box 2. Simulation Methodology

The assessment of debt vulnerabilities is undertaken within a framework consistent with the DSF (Box 1). For every country, the assessment rests upon the evolution of the five DSF debt-burden indicators under baseline scenarios and stress tests, and the use of country-specific policy dependent debt-burden thresholds.

For every country, the starting point for the simulations is the most recent LIC DSA. This provides information on the evolution of: (i) the measures of capacity to repay (GDP, exports and government revenues); (ii) the variables used to assess the external financing needs (exports, imports, net FDI, and net current transfers) and the fiscal financing needs (government revenues, grants and primary non-interest expenditures); and (iii) the measures of indebtedness (PV of public and publicly guaranteed (PPG) external debt and debt service).

Two updated "baseline" scenarios are produced. These scenarios differ in terms of the source of the financing needs (external or fiscal) governing the evolution of the measures of indebtedness. In the first scenario (WEO fiscal scenario), the financing needs are defined as: government revenues + grants - expenditures. In the second scenario (WEO external scenario), the financing needs are defined as: exports + current transfers + net FDI – imports. A deterioration in financing needs compared to the initial LIC DSA is assumed to translate into additional external borrowing only if the country is running a deficit under the WEO scenario. Additional financing needs are assumed to be met exclusively through external borrowing in order to gauge the maximum impact on the vulnerability assessment (DSF thresholds relate to external debt).

Over the 2008-2014 period, the WEO country forecasts are used to update the evolution of the measures of capacity to repay and the variables affecting the financing needs (external and fiscal). More specifically, the WEO growth rates are used to update the level of the relevant LIC DSA variables. This methodology broadly preserves the internal consistency of the country-specific macroeconomic forecasts.

Over the 2015-2019 period, financing needs in the WEO scenarios return smoothly to their respective LIC DSA level (in percentage of GDP). Starting in 2015, under both scenarios, the measures of capacity to repay, net FDI, net transfers and grants grow at the same rate envisaged under the initial LIC DSA. Consistent with the methodology used in LIC DSAs, transitory shocks to growth are not reversed in later years, resulting in a permanent shock to the level of variables. Accordingly, compared to the initial LIC DSAs, the capacity to repay is likely to be lower in the simulations. The spending variables (government expenditures and imports) adjust to achieve the targeted financing needs.

Stress tests are not directly conducted in WEO scenarios. Instead, the response of debt burden indicators to standard DSF stress tests is assumed to be similar to the initial LIC DSA.

Risk ratings are not determined in this exercise. However, countries are deemed to be more vulnerable based on the following criteria:

- Countries initially classified as moderate risk of debt distress are deemed more vulnerable if they
 experience a breach of threshold under the "baseline" WEO scenarios.
- Countries initially classified as low risk of debt distress are deemed more vulnerable if they experience a
 breach of threshold under the stress tests or the baseline WEO scenarios.
- Countries initially classified as high risk of debt distress are deemed more vulnerable if at least two debt burden indicators are on average 15 percent higher than their thresholds.⁴

¹ See "Staff Guidance Note on the Application of the Joint Fund-Bank Debt Sustainability Framework for Low-Income Countries", IMF, 2008. See also "The Debt Sustainability framework for Low-Income Countries", Occasional Paper 266, IMF, 2008.

² This rule prevents borrowing by countries running surpluses in the LIC DSA and smaller surpluses in the WEO scenario. In the case where a country is running a surplus in the LIC DSA and a deficit in the WEO scenario, the country is assumed to borrow only the amount of the deficit.

³ Unlimited additional external financing is assumed to be available at a grant element of 45 percent. If external financing was obtained on less concessional terms, it would result in a greater deterioration of debt burden indicators. Conversely, if part of the fiscal financing needs are met with domestic borrowing, it would result in lower external debt burden indicators.

⁴ A 15 percent increase in debt burden indicators above their thresholds is consistent with an increase in the probability of debt distress of about 10 percent.

Annex I. Country Status Under the Enhanced HIPC Initiative

Table 1. HIPC Pre-Decision-Point Countries

| COUNTRY | RECENT POLITICAL DEVELOPMENTS | RISK OF DEBT DISTRESS AND DATE OF THE ASSESSMENT | PRSP STATUS | IMF PROGRAM AND MACROECONOMIC STATUS | DECISION- POINT DATE |
|--------------------|--|--|---|--|---------------------------|
| Comoros | Although some tensions between the Union and islands authorities remain, political conditions have markedly improved since the election of a pro-Union president on the island of Anjouan in June 2008. In May 2009 a constitutional amendment enhancing central government authority over budget and economic management was successfully approved through a fair and open national referendum. | In Debt Distress December 2008 | The PRSP is expected to be completed during the third quarter of 2009. | A six-month EPCA-supported program was approved by the Board in December 2008. Discussions on a new PRGF took place in June and July 2009, with Board consideration slated to take place in mid-September. | Tentatively Q2 of 2010 |
| Eritrea | Since independence in 1993, Eritrea has been ruled by the People's Front for Democracy and Justice. Relations with Sudan have improved, but border tensions with Ethiopia remain. Relations with Djibouti came under renewed stress as a result of border clashes in 2008. | High April 2008 | There is no recent PRSP, and no work ongoing towards its preparation. | There are no ongoing discussions for a Fund program. The 2009 Article IV mission is scheduled for September 2009. | Uncertain |
| Kyrgyz Republic | President Bakiyev was re-elected to a second term in the July 2009 elections. | Moderate May 2009 | The Boards endorsed the PRSP – called Country Development Strategy and its accompanying JSAN in June 2007. In 2009, the authorities completed an update of the PRSP, that extends it to 2011 and takes into consideration the external challenges facing the economy. | An 18-month arrangement under the Exogenous Shocks Facility (ESF) was approved in December 2008 to support the government's program to manage the impact of the various exogenous shocks that have hit the economy. The first review was successfully completed in May 2009. | No intention* |

^{*} The decision-point document was prepared in February 2007 but withdrawn at the request of the Government, based on its intention to not move to decision-point. Based on 2008 debt data, the Kyrgyz Republic remains well below the HIPC thresholds.

Table 1. HIPC Pre-Decision-Point Countries (concluded)

| COUNTRY | RECENT POLITICAL DEVELOPMENT | RISK OF DEBT DISTRESS AND DATE OF THE ASSESSMENT | PRSP STATUS | IMF PROGRAM AND MACROECONOMIC STATUS | DECISION-POINT DATE |
|---------|---|--|--|--|------------------------|
| Somalia | The political and security situation remains highly unsettled. Preparations for national elections are now focused on 2011. | N/A | There is no PRSP in place in Somalia and one is not expected in the near term. | Somalia has not had an IMF-supported program since 1987, the lack of economic data precludes an assessment of the macroeconomic situation and prospects for Fund re-engagement—either via surveillance or an arrangement—in the foreseeable future are minimal. | Uncertain |
| Sudan | Concerns on Darfur and on the stability of the Comprehensive Peace Agreement are still persistent. Local, legislative, and presidential elections have been postponed to February 2010. A referendum in Southern Sudan to decide on unity or secession is expected in 2011. | In Debt Distress November 2008 | The PRSP is expected to be completed sometime during 2009-2010. | An 18-month Staff Monitored Program (SMP) was negotiated for the period July 2009 through December 2010. Sudan has been hard- hit by the global crisis, largely via a sharp deterioration in its terms of trade. The objectives of the SMP are to restore macroeconomic stability and build up international reserves. | Uncertain |

Table 2A: Interim Countries: Summary by Country

| COUNTRY | P RSP STATUS | RISK OF DEBT DISTRESS AND DATE OF THE ASSESSMENT | IMF PROGRAM | COMPLETION- POINT DATE (PLANNED) |
|--|---|--|---|----------------------------------|
| Afghanistan | The first progress report for the PRSP, the Afghanistan National Development Strategy (ANDS) is expected to be finalized in July / August 2009. Key institutional steps have been taken to move forward with the ANDS implementation. | High August 2008 | A PRGF-supported program approved in June 2006 is on track, and the fifth review was completed in April 2009. The program has been extended to March 2010, to allow the authorities more time to implement pending reforms and reach the HIPC completion-point. | Q4 of 2009 |
| Cote D'Ivoire | A PRSP was prepared in a participatory manner and approved in February, 2009 covering the period from 2009 to 2015. | High March 2009 | A PRGF supported program was approved in March 2009. | 2010 |
| Chad | A new PRSP covering the period from 2008-2011 was approved in April, 2008. The first annual progress report on the implementation of the PRSP is under preparation. | Moderate January, 2009 | The last PRGF-supported program, approved in February 2005 and later extended to May 2008, expired without the completion of any review. In June 2009 the staff and the authorities reached agreement on a staff-monitored program covering April-October 2009. If implemented well, the SMP could be followed by an PRGF-supported arrangement. | 2010 |
| Republic of Congo | The PRSP was finalized in April 2008 and submitted, along with a JSAN, to the Executive Boards of the IMF and IDA in August 2008. The authorities recently completed the first Annual Progress Report on the PRSP, and a JSAN will be presented to the Executive Boards of the IMF and IDA later this year. | High June 2009 | The Fund's Executive Board approved a new 3-year PRGF arrangement for Congo in December 2008, and completed the first review of the arrangement in June 2009. | Q4 of 2009 |
| Democratic Republic of the Congo | The PRSP and corresponding JSAN were discussed in May and September 2007, respectively, by the IDA and IMF Boards. A PRSP progress report was completed in October 2008, and an updated PRSP for 2009-2010 is being finalized. | In Debt Distress August 2007 | Following mixed performance under the 2008 staff-monitored program (SMP), related in part to a terms of trade shock and security problems, the Fund's Board approved a disbursement under the rapid access component of the Exogenous Shocks Facility in March 2009. Ongoing discussions on a new three-year PRGF arrangement could be finalized once pending issues related to large nonconcessional borrowing are resolved. | 2010 |
| Guinea | The PRSP-II was issued in August 2007 and presented to the IDA and the IMF Boards in December 2007. The first Annual Performance Review of the PRSP-II was issued in October 2008. | In Debt Distress December 2007 | Discussions on the second review of the PRGF, approved in December 2007, were initiated in Conakry in September 2008 but could not be finalized because of the coup d'état that followed the death of President Conté in December 2008. | Unclear |

Table 2A: Interim Countries: Summary by Country (concluded)

| COUNTRY | PRSP STATUS | RISK OF DEBT DISTRESS AND DATE OF THE ASSESSMENT | IMF PROGRAM AND MACROECONOMIC STATUS | COMPLETION-POINT DATE (PLANNED) |
|------------------|--|--|--|---------------------------------|
| Guinea Bissau | A PRSP was approved in 2007 and presented to the IMF and the IDA Boards in April and May 2007 respectively. The first annual progress report is scheduled to be validated in September 2009. | In Debt Distress May 2009 | Notwithstanding a tight fiscal situation, performance under an EPCA-supported program, approved in January 2008, has been broadly satisfactory. A third disbursement under the EPCA was approved by the IMF Executive Board in June 2009. | 2010 |
| Liberia | A PRSP was approved in March 2008. The outline of the first annual progress report (APR) was presented in June 2009. The APR is expected to be completed by August 2009. | In Debt Distress April 2009 | In March 2008, the IMF Executive Board approved three- year arrangements under the EFF and the PRGF. The second review under the PRGF was completed in May 2009 and the third review is scheduled for November-December 2009. | Q1 of 2010 |
| Togo | Togo's I-PRSP was adopted in March 2008, and discussed by the Executive Boards of the IMF and IDA in April 2008. The full PRSP has been completed and work on the JSAN together with the Bank is on-going. | In Debt Distress November 2008 | In April 2008, the IMF's Executive Board approved Togo's first PRGF-supported program since the mid-1990s. The second review under the PRGF was successfully completed in April 2009. [The third review is scheduled for November-December 2009] | Q4 of 2010 |

Table 2B: Interim Countries: Status of Completion-Point Triggers

| COUNTRY | PRSP | MACROECONO | PUBLIC FINANCIAL | SOCIAL SECTOR | D EBT | GOVERNANCE/ | STRUCTURAL |
|----------------------|---|---------------|--|--|---------------|---|---|
| | | MIC STABILITY | MANAGEMENT | | MANAGEMENT | TRANSPARENCY/ | REFORMS |
| | | | (PFM) | | | ANTICORRUPTION | |
| Afghanistan | Good progress The review mission will take place in September, 2009 | Good progress | Completed | Regulations have to be passed with regard to the pension reform and the status of the military retires. Also HR departments in four ministries need to become fully functional and additional regulations still need to be passed. | Completed | Completed | Authorities agreed to develop regulations and guidelines for minerals extraction and establish a fully operational hydrocarbon/minin g cadastre. Cadastre is under preparation and regulations for minerals extraction have yet to be passed. |
| Cote D'Ivoire | Good progress | Good progress | Limited progress | Limited progress given recent DP date (March, 2009) | Good progress | Limited progress | Limited progress |
| Chad ⁵¹ | Partially completed | Weak progress | Slow progress The public expenditure tracking system for primary education is not functional and the computerization of the expenditure circuit remains to be completed. | Early progress has deteriorated. | N/A | Early progress has deteriorated. The implementation of the governance strategy and action plan needs to be accelerated. | N/A |
| Republic of Congo | Partially completed | Good progress | Partially Completed | Completed | Completed | Good progress | Good progress |

⁵¹ Assessment of progress in more recent years continues to be constrained by the lack of data covering 2006, 2007, and 2008.

Table 2B: Interim Countries: Status of Completion-Point Triggers (concluded)

| COUNTRY | PRSP | MACROECONOMIC STABILITY | PUBLIC FINANCIAL MANAGEMENT (PFM) | SOCIAL SECTOR | DEBT MANAGEMENT | GOVERNANCE/ TRANSPARENCY/ ANTICORRUPTION | STRUCTURAL REFORMS |
|------------------------------------|------------------------|--|---|---|---|---|-----------------------|
| Democratic Republic of Congo | Partially completed | Good progress Pending issues: the Chinese EXIM bank loans impact on the country's DSA. | Good progress | Little progress with the allocation of budgetary savings from HIPC debt relief to priority sectors. | Good progress | Good progress | N/A |
| Guinea | Partially completed | Good progress Satisfactory implementation of the PRGF-supported program. | N/A | There are measurement issues regarding the triggers in the education and health sectors. | N/A | Good progress | N/A |
| Guinea Bissau | Partial progress | Limited Progress The country is currently under an EPCA program and could move to a PRGF later in 2009 if performance under the EPCA program is satisfactory. | Progress | Completed | N/A | Limited Progress Public procurement system reform needs to be extended across all ministries. Remedial measures need to be implemented to address the objectives of an outdated trigger ⁵² | N/A |
| Liberia | Completed | Good progress | Ongoing but delayed. PFM law was submitted to parliament in December 2008 and is now at the stage of the final discussion for approval. | Good progress | Good progress | Good progress | N/A |
| Togo | Good progress | Good progress | Good progress | Limited progress given recent DP date (November 2008) | Limited progress given recent DP date (November 2008) | Limited progress given recent DP date (November 2008) | Good progress |

⁵² The trigger called for the findings of an external audit of the 1997-99 budgets to be submitted to the Parliament and to form the basis of a corrective action.

Source: World Bank and IMF staff; and Global Monitoring Report, 2009.

The World Bank determines whether a country is on or off track to meet a given MDG by 2015 when at least two observations are available after 1990, with a sufficient number of years separating them. To do so, it compares the progress recorded thus far with that needed to reach the MDG, under the assumption that progress becomes increasingly difficult the closer countries get to the goal.

Annex II. Country Coverage, Data Sources, and Assumptions for the HIPC Initiative and MDRI Costing Exercise

Country Coverage

- The costing analysis for the 35 post-decision-point countries includes: Afghanistan, Benin, Bolivia, Burkina Faso, Burundi, Cameroon, Central African Republic, Chad, Côte d'Ivoire, Democratic Republic of the Congo, Republic of Congo, Ethiopia, The Gambia, Ghana, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Liberia, Madagascar, Malawi, Mali, Mauritania, Mozambique, Nicaragua, Niger, Rwanda, São Tomé and Príncipe, Senegal, Sierra Leone, Tanzania, Togo, Uganda, and Zambia.
- The costing analysis for the pre-decision-point countries is based on 4 HIPCs: Comoros, Eritrea, Somalia, and Sudan.⁵³

Data Sources

- Staff estimates are based on HIPC Initiative decision and completion-point documents for all 35 post-decision-point countries, and preliminary documents or estimates presented in "Heavily Indebted Poor Countries (HIPC Initiative) List of Ring-Fenced Countries that Meet the Income and Indebtedness Criteria at end-2004" for the 4 pre-decision-point HIPCs.
- Data was updated through end-July 2009.

Assumptions for the HIPC Initiative and MDRI Costing Exercise

- Calculations of total costs include costs under the original and enhanced HIPC Initiative frameworks and the MDRI.
- Cost estimates for the HIPC Initiative are based on debt data after full use of traditional debt-relief mechanisms.
- The following exchange rates have been used for the MDRI calculations:
 - o IDA and AfDF. The initial MDRI Trust Fund replenishment rate of 1.477380 US dollars per SDR was applied for the period FY07-08. Cost estimates for FY09 onward are based on the IDA15 foreign exchange reference rate of 1.524480 US dollars per SDR.
 - o IMF. The exchange rate of the date that debt relief was delivered, and, in cases where debt was not yet delivered, the rate as of end-December 2008 was used.
 - o IaDB. Currency units in US dollars at end-2006.

Update of Cost Estimates in Net Present Value Terms

The cost of HIPC Initiative assistance calculated in NPV terms at the time of the decision-point is discounted to end-2008 using the average interest rate applicable to the debt relief.

⁵³ Kyrgyz Republic is not included in cost estimates, as its indebtedness ratio at end-2007 is estimated at below the HIPC Initiative threshold.

This rate was estimated at 5.0 percent and corresponds to the implicit long-term interest rate of currencies that comprise the SDR basket over the period 2006-2008, calculated as a 6-month average of the Commercial Interest Reference Rate (CIRR) over this period, weighted by the participation of the currencies in the SDR basket. The same rate was used to calculate MDRI debt relief in end-2008 NPV terms.

Sources: HIPC country documents, and World Bank and IMF staff estimates.

^{1/} Data refer to 35 post-decision-point HIPCs, unless specified otherwise.

^{2/} Debt service paid covers 2001-2008, and debt service due covers 2009-2013. For post-completion point HIPCs, debt service due assumes full HIPC Initiative debt relief, additional debt relief, provided by some Paris Club Creditors on a voluntary basis, and MDRI. For pre-completion-point countries, debt service due includes interim debt relief and full HIPC Initiative and MDRI assistance expected at the projected completion point. See Appendix Table 2 for a detailed breakdown.

^{3/} Excludes Ethiopia, Malawi, and Zambia for which data is not avaiable.

^{4/} As defined in PRSPs; excludes Liberia and Malawi for which data is not available. In some countries, the definition of poverty-reducing expenditures has evolved over time to include more sectors.

Sources: HIPC country documents, and World Bank and IMF staff estimates.

Note: Data corresponding to years of decision and completion points under the enhanced HIPC Initiative are in thin and thick boxes, respectively.

^{1/} Debt service due after the full use of traditional debt relief and assistance under the enhanced HIPC Initiative.

For completion-point HIPCs, figures are after additional bilateral assistance beyond the HIPC Initiative.

^{2/} Debt service reflects some payments to commercial creditors and payments on moratorium interest not reflected in the completion point documents.

^{3/} Reached completion point in 2000.

^{4/} Reached decision point in 2000.

^{5/} Post completion point the authorities do not monitor the amount due after enhanced HIPC. Therefore this data is estimated by staff. 6/ Data reported on a fiscal year basis.

Sources: HIPC country documents, and World Bank and IMF staff estimates.

Note: Data corresponding to years of decision and completion points under the enhanced HIPC Initiative are in thin and thick boxes, respectively.

^{1/} The coverage of poverty-reducing expenditures varies across countries, but is generally consistent with the definition in the PRSP and the budget of each HIPC. In some countries, the definition of poverty-reducing expenditures has evolved over time to include more sectors; therefore, some of the increase in such spending over the 2001-2003 period may reflect changes in the definition. In the majority of countries expenditures on health and education are included but beyond that there are wide variations in the sectoral spending included.

^{2/} Data refer to health and education spending.

^{3/} Government refers to central government.

^{4/} Currently fiscal data reported by authorities does not allow monitoring of poverty reduction expenditures.

^{5/} Reached decision point in 2000.

^{6/} Reached completion point in 2000.

^{7/} Data reported on a fiscal year basis.

Sources: HIPC documents, and World Bank and IMF staff estimates.

^{1/} Committed debt relief under the assumption of full participation of creditors.

^{2/} Nominal MDRI costs include principal and interest foregone for all multilaterals participating in the Initiative, except IMF, which only include principal. The estimated costs for IMF reflect the stock of debt eligible for MDRI relief, which is the debt outstanding (principal only) as of end-2004 and that has not been repaid by the member and is not covered by HIPC assistance (EBS/05/158 Revision 1, 12/15/2005).

^{3/} Topping-up assistance and assistance provided under the original HIPC Initiative are expressed in NPV-terms as of the time of the decision point.

^{4/} No totals are shown because the amounts are in different NPV terms (according to the date of the decision point).

^{5/} Also reached completion point under the original HIPC Initiative. The assistance includes original debt relief.

^{6/} Assistance includes topping up at completion point.

^{7/} IMF MDRI debt relief to Cambodia and Tajikistan.

Sources: HIPC documents, and World Bank staff estimates.

^{1/} Total delivered HIPC assistance to end-2008.

^{2/} Nominal MDRI costs include principal and interest foregone.

^{3/} The total amounts shown are only indicative, as they represent the sum of individual commitments expressed in different NPV terms, corresponding to the time of the decision point of each HIPC.

^{4/} Also reached completion point under the original HIPC Initiative. The assistance includes original debt relief.

^{5/} The assistance includes topping-up at completion point.

^{6/} Countries that reached the interim period HIPC debt relief limit. For these countries, the committed assistance in nominal terms will be modified at completion point

Source: International Monetary Fund.

^{1/} Includes interest on amounts committed under the enhanced HIPC Initiative.

^{2/} Excludes remaining HIPC Initiative assistance delivered.

^{3/} Includes commitment under the original HIPC Initiative.

^{4/} Côte d'Ivoire reached its decision point under the original HIPC Initiative in 1998; but did not reach its completion point under the original HIPC Initiative, nor has it reached the decision point under the enhanced HIPC Initiative.

a/ On May 16, 2003, the EC-ACP Council, bringing together Ministers from African, Caribbean, and Pacific countries and EU Member States, approved a contribution of EUR 200 million.

This contribution was funded from resources already allocated to EC-ACP cooperation through the 8th and 9th replenishments of the European Development Fund.

b/ Most EU Member States pledges made at the October 2002 HIPC technical meeting included their share of an expected EC-ACP contribution. When the EC-ACP contribution was finalized in May 2003, bilateral pledges of EU members were adjusted, attributing the EC-ACP contribution based on each donor's share in EDF9. In addition, a number of donors made pledges after the October 2002 meeting or increased the amount of their pledges, including Canada, Finland, Greece, Korea, Norway, Russia and the United Kingdom.

c/ Many donors linked the level of their 2002 pledge to specific funding gap estimates or to other conditions such as additional funding for IFAD. These pledge conditions are noted on page 4 of the Chairman's summary of HIPC technical meeting on October 24, 2002.

d/ Contribution agreements have been signed covering the full amount of the donor's outstanding p ledge. Germany has signed agreements for XDR 35.06 mln. Of this amount, XDR 21.91 mln have been paid. France has signed agreements for EUR 26.20 mln. Of this amount, EUR 22.27 mln has been paid. Italy has signed agreements for USD 28.72 mln. Of this amount, USD 9.10 mln has been paid. Netherlands has signed agreements for USD 69.80. Of this amount, USD 49.80 mln has been paid. The remaining amount for respective donors is payable in 2009 and 2010 on an agreed schedule.

e/ Excludes contribution earmarked for IDA provided in the context of IDA14 and IDA15.

f/ Many donors have also provided debt relief through other initiatives and mechanisms including: the Debt Reduction Facility for IDA-only Countries (providing financing for commercial debt reduction efforts), specific country-held multilateral debt relief facilities, bilateral debt relief trust funds, and the Central American Emergency Trust Fund.

g/ This total includes (1) contributions of USD 80 million that were earmarked to IDA from Australia, Austria, Iceland, Italy, the Netherlands and New Zealand; and (2) contributions of USD 52 million that were earmarked to IFAD.

h/ Based on a funding gap of \$1 billion contingent on collective efforts to move to \$1 billion as needed and provided IFAD is included in the funding gap.

i/ Many donors linked the level of their pledge (from 2006 onwards) to their share of IDA14, ADF-X or their share in IFAD. Details of pledge conditions are reflected on page 3 of the Chairman's summary of HIPC technical meeting on November 19, 2006 and subsequent pledging meeting in Maputo during June 2007.

^{1/} Creditor invited on a case-by-case basis to participate in some Paris Club agreements.

^{2/} Not a Paris Club member. In some cases, IDA-administered European Economic Commission (EEC) loans (which are treated as Paris Club debt) are apportioned among

EEC members. Amounts listed for Luxembourg correspond to its portion of such EEC loans.

Source: Paris Club Secretariat.

^{1/}Columns (1) to (7) describe the additional debt relief provided following a specific methodology under bilateral initiatives and need to be read as a whole for each creditor. In column (1), "HIPCs" stands for eligible countries effectively qualifying for the HIPC process. A "100 percent" mention in the table indicates that the debt relief provided under the enhanced HIPC Initiative framework will be topped up to 100 percent through a bilateral initiative.

^{2/} Australia: post-cutoff date non-ODA relief to apply to debts incurred before a date to be finalized; timing details for both flow and stock relief are to be finalized.

^{3/} Denmark provides 100 percent cancellation of ODA loans and non-ODA credits contracted and disbursed before September 27, 1999.

^{4/} France: cancellation of 100 percent of debt service on pre-cutoff date commercial claims on the government as they fall due starting at decision point. Once countries have reached completion point, debt relief on ODA claims on the government will go to a special account and will be used for specific development projects.

^{5/}Finland: no post-Cutoff date claims

^{6/}Italy: cancellation of 100 percent of all debts (pre- and post-cutoff date, ODA and non-ODA) incurred before June 20,1999 (the Cologne Summit).

cancellation of the related amounts falling due in the interim period. At completion point, cancellation of the stock of remaining debt.

^{7/} The Netherlands: 100 percent ODA (pre- and post-cutoff date debt will be cancelled at decision point); for non-ODA: in some particular cases (Benin, Bolivia, Burkina Faso, Ethiopia, Ghana, Mali, Mozambique, Nicaragua, Rwanda, Tanzania, Uganda and Zambia), the Netherlands will write off 100 percent of the consolidated amounts on the flow at decision point; all other HIPCs will receive interim relief up to 90 percent reduction of the consolidated amounts. At completion point, all HIPCs will receive 100 per cent cancellation of the remaining stock of the pre-cutoff date debt.

^{8/} Norway has cancelled all ODA claims.

^{9/} Due to the current World Bank/IMF methodology for recalculating debt reduction needs at HIPC completion point, Norway has postponed the decisions on whether or not to grant 100% debt reduction until after HIPCs' completion point.

^{10/} Russia has no ODA claims

^{11/} Spain provides 100 percent cancellation of ODA and non-ODA claims contracted before January 1, 2004

^{12/} Sweden has no ODA claims.

^{13/} Switzerland has cancelled all ODA claims.

^{14/} In some particular cases (Central African Republic, Liberia, Republic of Congo, Sierra Leone, Togo), Switzerland will write off 100 percent of the remaining debt stock at completion point; all other HIPCs will receive debt relief according to Paris Club terms.

^{15/} United Kingdom: "beyond 100 percent" full write-off of all debts of HIPCs as of their decision points, and reimbursement at decision point of any debt service paid before the decision point.

^{16/} United States: cancellation of 100 percent of all debts (pre- and post-cutoff date, ODA and non-ODA) incurred before June 20, 1999 (the Cologne Summit).

At decision point, cancellation of accrued arrears and maturities falling due in the interim period. At completion point, cancellation of the stock of remaining eligible debt.

Sources: HIPC Country Documents; IMF staff estimates.

^{1/} Non-Paris Club creditors include those creditors that did not indicate their intention to participate in the Paris Club meeting at the time the completion point document for a particular country was being prepared.

Thus, the claims of some creditors that are not permanent members of the Club, but were invited by the Paris Club to participate in the completion point debt negotiation for a given country and signed the Paris Club Agreed Minutes at the end of this negotiation, are not considered in here.

^{2/} Listed as Yugoslavia in decision point documents.

^{3/} Excludes claims held by the Ceskoslovenska Obchodni Banka on Mozambique at the time of decision point.

^{4/} Guatemala's claims on Nicaragua were taken over by Spain in a debt swap. Spain has agreed to provide HIPC Initiative debt relief to Nicaragua on those claims.

Sources: HIPC documents; country authorities; and Fund and Bank staff estimates.

^{1/} Based on information received as of June 2009. The information covers only creditors that have claims on post-completion-point.

^{2/} Argentina, Brazil, the Republic of Korea, Kuwait, Mexico, Morocco, Portugal, South Africa, and Trinidad and Tobago are associated members of the Paris Club. As such, these countries participate in negotiation sessions of the Paris Club on a case-by-case basis, provided that certain conditiones are met. Generally, creditors participating in a negotiation session for a particular country are considered Paris Club members for the purpose of HIPC calculations.

^{3/} In these cases, there is only one debtor. Debtors have indicated that some relief has been provided but the information received is insufficient to quantify it.

^{4/} The debt relief estimates for China are based on debt cancellations data provided by debtors.

^{5/} Partition of HIPC loans outstanding at decision point and the associated debt relief among members of the Former Yugoslavia is being determined with the help of the authorities.

^{6/} Guatemala's claims on Nicaragua were taken over by Spain in a debt swap. Spain has agreed to provide HIPC debt relief to Nicaragua on those claims.

^{7/} In June 2003, India announced its intention to write off all non-export credit claims on HIPCs. However, several agreements remain unsigned.

^{8/} Debt relief estimates for Kuwait are based on detailed loan by loan information provided by the Kuwait Fund for Arab Economic Development (KFAED).

Source: 2009 Survey of Commercial Creditor Participation and Creditor Lawsuits against HIPCs.

^{1/} Commercial creditors lawsuits against HIPCs are reported without assessing the merits of these disputes. The information reported in this table reflects responses by the authorities to the survey, and it should not be considered a complete summary of all commercial creditor proceedings against HIPCs. The survey was responded by the authorities of 25 countries out of 40 surveyed in June 2009.

^{2/} Either original creditor or holder of current claim.

^{3/ &}quot;Judgment awarded" refers to cases in which the creditor has obtained a judgment against the HIPC but has not yet recovered the full payment on its claim.

^{4/} When possible, exchange rates at decision-point were used for reporting claims in U.S. dollars. Otherwise, average exchange rates were used.

^{5/} Excludes accumulated interest, charges, and penalties.

^{6/} Amount could include interest, charges, and penalties.

^{7/} Settlement amounts are not reported, as confidentiality agreements might be in place.

^{8/} Responses to previous surveys are carried to the following year unless there is new information indicating that a settlement has been reached.

^{9/} Claims against the Republic of Congo—which were already included in last year's report—have been revised upwards due to better data.
