### **Independent Auditors' Report**

To the Board of Governors of the International Monetary Fund Washington, DC

We have audited the accompanying consolidated balance sheets of the General Department of the International Monetary Fund and subsidiary (the "Department") as of April 30, 2007 and 2006, and related consolidated statements of income, changes in reserves and resources, and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Department's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the General Department of the International Monetary Fund at April 30, 2007 and 2006, and the results of their operations and their cash flows for the years then ended in conformity with International Financial Reporting Standards.

Our audits were conducted for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The supplemental schedules listed on pages 17 to 22 are presented for the purpose of additional analysis and are not a required part of the basic consolidated financial statements. These schedules are the responsibility of the Department's management. Such schedules have been subjected to the auditing procedures applied in our audits of the basic consolidated financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic consolidated financial statements taken as a whole.

### General Department Notes to the consolidated financial statements for the years ended April 30, 2007, and 2006

#### 1. Purpose and organization

The International Monetary Fund (IMF) is an international organization of 185 member countries. It was established to promote international monetary cooperation and exchange stability and to maintain orderly exchange arrangements among members; to facilitate the expansion and balanced growth of international trade, and contribute thereby to the promotion and maintenance of high levels of employment; and to provide temporary financial assistance under adequate safeguards to member countries to assist in solving their balance of payments problems in a manner consistent with the provisions of the IMF's Articles of Agreement. The IMF conducts its operations and transactions through the General Department and the Special Drawing Rights Department (the SDR Department). The General Department consists of the General Resources Account (GRA), the Special Disbursement Account (SDA), including the Multilateral Debt Relief Initiative-I Trust (MDRI-I Trust), for which the IMF is the Trustee and over which the SDA has substantial control, and the Investment Account. The IMF also administers trusts and accounts established to perform financial and technical services and financial operations consistent with the purposes of the IMF. The resources of these trusts and accounts are contributed by members or the IMF through the SDA. The financial statements of the MDRI-I Trust are consolidated with those of the General Department. The General Department does not have the power to govern the financial and operating polices of the SDR Department, or the trusts it administers as trustee, so as to derive benefits from their activities, and the financial statements of these entities are therefore presented separately.

#### General Resources Account

The GRA holds the general resources of the IMF. Its resources reflect the payment of quota subscriptions, use and repayment of IMF credit, collection of charges on the use of credit, payment of remuneration on creditor positions, borrowings, and payment of interest and repayment of borrowings.

#### Special Disbursement Account

The assets and resources of the SDA are held separately from the GRA and the Investment Account of the General Department. The SDA is the vehicle for receiving and investing profits from the sale of the IMF's gold and for making transfers to other accounts for special purposes authorized in the Articles, in particular for financial assistance on special terms to lowincome member countries.

The SDA also holds claims receivable from outstanding loans extended under the Structural Adjustment Facility (SAF) and repayments of loans to the Trust Fund (in liquidation). Repayments of principal and interest from SAF loans and resources derived from the termination of the Trust Fund are transferred from the SDA to the Reserve Account of the Poverty Reduction and Growth Facility and Exogenous Shocks Facility Trust (PRGF-ESF Trust), which is administered separately by the IMF as Trustee.

The Multilateral Debt Relief Initiative (MDRI) provides full debt relief to low-income member countries. For this purpose, the MDRI-I and MDRI-II Trusts were established on January 5, 2006, to provide grant assistance under the MDRI. The financial statements of the MDRI-II Trust are presented separately. Subsequent to the adoption of the MDRI, the resources held in the SDA were transferred to the MDRI-I Trust, the PRGF-HIPC Trust, and the PRGF-ESF Trust Subsidy Account (Note 11).

#### Investment Account

On April 28, 2006, the Executive Board of the IMF approved the establishment of the Investment Account within the General Department and authorized the transfer of currencies from the GRA in an amount equivalent to the total amount of the General and Special Reserves of the GRA on April 30, 2006. The transfer of SDR 5,960 million was made in June 2006. The objective of the Investment Account is to allow for the investment of a portion of the IMF's assets so as to generate income that may be used to help meet the expenses of conducting its business.

### 2. Summary of significant accounting policies

#### Basis of accounting

The consolidated financial statements of the General Department are prepared in accordance with International Financial Reporting Standards (IFRS). The consolidated financial statements include the accounts of the GRA, the SDA, the Investment Account, and the MDRI-I Trust, an entity that is determined to be substantially controlled by the SDA owing primarily to the existence of the Trustee's power to terminate the Trust and the SDA's claim to the Trust's entire residual assets upon termination as long as there are no contributor resources in the Trust. All transactions and balances between these entities have been eliminated during the consolidation. Specific accounting principles and disclosure practices, as set out below, are in accordance with and comply with IFRS and have been applied consistently for all periods presented.

# Use of estimates

The preparation of consolidated financial statements requires the IMF's management to make estimates and assumptions that affect the reported amounts of assets and liabilities, such as investments and net pension plan assets, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors, such as historical experience and current and expected economic conditions and, in some cases, actuarial techniques. Actual results could differ from those estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Unit of account

The functional and presentation currency of the IMF is the SDR. The value of the SDR is determined by the IMF each day by summing the values in

U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in November 2005, and the new composition of the SDR valuation basket became effective on January 1, 2006. The currencies in the basket as of April 30, 2007, and 2006 and their amounts were as follows:

| Currency       | Amount  |
|----------------|---------|
| Euro           | 0.4100  |
| Japanese yen   | 18.4000 |
| Pound sterling | 0.0903  |
| U.S. dollar    | 0.6320  |

As of April 30, 2007, one SDR was equal to 1.52418 U.S. dollars (one SDR was equal to 1.47106 U.S. dollars as of April 30, 2006).

# Currencies

Currencies consist of members' currencies and debt securities held by the IMF. Each member has the option of substituting non-negotiable and non-interest-bearing securities for the IMF's holdings of its currency that exceed  $\frac{1}{4}$  of 1 percent of the member's quota. These securities are encashable by the IMF on demand.

Each member is required to pay in full its quota subscription (both the initial quota subscription upon becoming a member and any subsequent quota increase) partly in its own currency, and partly (normally 25 percent) in usable currencies of other members prescribed by the IMF or SDRs. The only exception was the quota increase of 1978, which was paid entirely in members' own currencies.

Usable currencies consist of currencies of member countries considered by the IMF to have strong balance of payments and reserve positions. These currencies are included in the IMF's Financial Transactions Plan (FTP) to finance purchases and other transfers of the IMF. Participation in the FTP is reviewed on a quarterly basis. Usable currencies and SDR holdings readily available to finance IMF operations and transactions are considered cash equivalents. Other currencies consist of non-usable currencies of member countries not included in the FTP and, therefore, are not considered cash equivalents for financial statement presentation purposes. The changes in usable currencies result from the IMF's transactions (purchases and repurchases) where a member's currency is exchanged for another member's currency, or from the inclusion/exclusion of a member's currency in the FTP.

Currencies, including debt securities, are valued in terms of the SDR on the basis of the currency/SDR exchange rate determined for each currency. Each member is obligated to maintain, in terms of the SDR, the value of the balances of its currency, including its securities, held by the IMF in the GRA. This requirement is referred to as the maintenance-of-value obligation. All currencies are revalued periodically in terms of the SDR, including at each financial year end. Whenever the IMF revalues its holdings of a member's currency, a receivable or a payable is established for the amount required to maintain the SDR value of the IMF's holdings of that currency. The currency balances in the balance sheet include these receivables and payables.

# Credit outstanding

The IMF provides balance of payments assistance in accordance with established policies by selling to members, in exchange for their own currencies, SDRs or currencies of other members. When members make purchases, they incur obligations to repurchase the IMF's holdings of their currencies arising from the purchases within specified periods by payments in SDRs or other currencies, as determined by the IMF.

The repurchase policies of the IMF are intended to ensure the revolving character of its resources. Purchases of currencies from the GRA are subject to repurchase obligations, which can differ depending on the policy or facility under which purchases are made. In keeping with a long-standing principle of the IMF that its resources should be repaid as soon as the balance of payments and reserve position improve, members in a position to do so are entitled to make repurchases at any time; otherwise they are expected to make repurchases under predetermined time-based expectation schedules. However, if a member's external position is not sufficiently strong, it may request that repurchases on the expectation schedule be extended to the original obligation schedule. A member is considered overdue only after failure to make a payment on the repurchase obligation schedule.

# Overdue obligations and the burden sharing mechanism

It is the policy of the IMF to exclude from current income charges on the use of the Fund's general resources from members that are six months or more overdue in meeting any financial obligation to the IMF. The IMF fully recovers this lost income under the burden sharing mechanism, through adjustments, in the current period, to the rates of charge and remuneration. Members that have borne the financial consequences of overdue charges receive refunds to the extent that overdue charges that had given rise to burden sharing adjustments are subsequently settled.

An impairment loss would be recognized if there is objective evidence of impairment as a result of a past event that occurred after initial recognition, and is determined as the difference between the outstanding credit's carrying value and the present value of the estimated future cash flows. No impairment losses have been recognized.

# First Special Contingent Account

In view of the risk resulting from overdue obligations, the IMF accumulates balances in the first Special Contingent Account (SCA-1) by collecting resources under the burden sharing mechanism through adjustments to the rates of charge and remuneration. Losses arising from overdue principal, if realized, would be charged against the SCA-1. The IMF has not realized any losses on overdue financial obligations. Balances in the SCA-1 are refundable to the members that shared the cost of its financing in proportion to their contributions when there are no outstanding overdue repurchases and charges, or at such earlier time as the IMF may decide.

# SDR holdings

Although SDRs are not allocated to the IMF, the IMF may acquire, hold, and dispose of SDRs through the GRA. The IMF receives SDRs from members in the settlement of their financial obligations to the IMF and uses SDRs in transactions and operations with members. The IMF earns interest on its SDR holdings at the same rate as all other holders of SDRs.

### Investments

#### Financial assets at fair value through profit or loss

In accordance with its investment guidelines, the IMF's investments are managed and their performance is measured on a fair value basis. The IMF

has designated its investments in fixed-income securities, other than fixedterm deposits, as financial assets held at fair value through profit or loss. Such designation may be made only upon initial recognition and cannot subsequently be changed. The designated assets are carried at fair value on the balance sheet with the change in fair value included in the income statement in the period in which they arise.

#### Recognition

Investments are recognized on the trade date at which the IMF becomes a party to the contractual provisions of the instrument.

#### Derecognition

Investments are derecognized when the contractual rights to the cash flows from the asset expire, or in transactions where substantially all the risks and rewards of ownership of the investment are transferred.

#### Fair value measurement

The determination of the fair values of the investments, other than fixedterm deposits, is based on quoted market prices for financial instruments traded in active markets. The carrying amount of fixed-term deposits, which typically have maturities of 12 months or less, approximates the fair value.

#### Investment income

Investment income comprises interest income, realized gains and losses, and unrealized gains and losses, including currency valuation differences arising from exchange rate movements against the SDR.

#### Gold holdings

The IMF acquired the majority of its gold holdings from quota subscriptions and financial transactions prior to the date of the Second Amendment of the Articles of Agreement (April 1, 1978). The IMF also acquired gold through the settlement of obligations by members in 1992 and 1999 (see Note 10). The gold holdings are an important element in strengthening the IMF's overall financial position and serve as supplementary resources available to support the IMF's liquidity position. The IMF may also mobilize its gold holdings to assist in the financing of concessional balance of payments assistance to low-income member countries.

The Articles of Agreement limit the use of gold in the IMF's operations and transactions. Any use provided for in the Articles requires a decision adopted by an 85 percent majority of the total voting power. Under the Articles, the IMF may sell gold outright on the basis of prevailing market prices but cannot engage in any other gold transactions, such as loans, leases, swaps, or the use of gold as collateral. In addition, the IMF does not have the authority to buy gold, but it may accept payments from a member in gold instead of SDRs or currencies in any operation or transaction under the IMF's Articles at prevailing market prices.

In accordance with the provisions of the Articles, whenever the IMF sells gold held on the date of the Second Amendment of the IMF's Articles of Agreement (April 1, 1978), the portion of the proceeds equal to the historical cost must be placed in the GRA. Any portion of the proceeds in excess of the historical cost will be held in the SDA or transferred to the Investment Account. The IMF may also sell gold held on the date of the Second Amendment to those members that were members on August 31, 1975, in proportion to their quotas on that date, in exchange for their own currencies at the historical cost.

The IMF values its gold holdings at historical cost using the specific identification method.

#### Other assets

Other assets include primarily fixed assets, net pension plan assets, and net assets for other post-retirement benefits.

Tangible and intangible fixed assets with a cost in excess of a threshold amount are capitalized at cost and depreciated or amortized over the estimated useful lives of the assets, using the straight-line method. Buildings, equipment, and furniture are depreciated over 30, 3, and 7 years, respectively. Software is amortized over 3 to 5 years.

The IMF operates two defined benefit pension plans and provides postretirement benefits to staff. The pension plans are funded by payments from staff and the IMF, taking into account the recommendations of independent actuaries. Assets of the pension plans are held in separate trustee-managed funds. The IMF also established a Retired Staff Benefits Investment Account (RSBIA) to hold and invest funds set aside to finance the cost of post-retirement employee benefits. The assets of the RSBIA are administered by the IMF. Pension plans and other post-retirement assets are measured at fair value as of the balance sheet date. Pension costs and expected costs of the post-retirement medical and life insurance benefits are determined using the Projected Unit Credit Method, which measures the present value of the estimated future cash outflows, using yields on high-quality corporate bonds that have maturities approximating the terms of the defined benefit obligation. Valuations of these obligations are carried out annually by independent actuaries.

### Special Disbursement Account

#### Contributions to Administered Accounts

In connection with the implementation of the MDRI, the IMF transferred the resources of the SDA to the MDRI-I Trust, the PRGF-ESF Trust Subsidy Account, and the PRGF-HIPC Trust during the financial year ended April 30, 2006. The transfers were intended to benefit these trusts and there is no expectation of repayment, and they were recognized as contributions in the income statement for that financial year.

#### SAF Loans

SAF loans provided financial assistance to low-income members at an interest rate of  $\frac{1}{2}$  of 1 percent per annum for a period of 10 years. The last SAF loan disbursement was made in 1995. Currently there is one member with overdue repayment obligations under SAF loans. Repayments of all SAF loans are transferred to the PRGF-ESF Trust Reserve Account when received. Allowances for loan losses would be established if and when there is objective evidence that an impairment loss on loans has been incurred.

#### Reserve tranche position

A member's reserve tranche in the IMF is equivalent to its quota less the IMF's holdings of its currency, excluding holdings that reflect the member's use of IMF credit. Reserve tranches result from quota payments, part of which are to be made in reserve assets, and the use of the member's currency in the IMF's transactions or operations. A member's reserve tranche is considered a part of its external reserves and a liquid claim against the IMF. The member may draw on the reserve tranche at any time when it

represents that it has a balance of payments need. Reserve tranche purchases are not subject to repurchase obligations or charges.

# Quotas

Each member is assigned a quota expressed in SDRs that forms the basis of its financial and organizational relationship with the IMF. A member's quota is related to, but not strictly determined by, economic factors such as national income, the value of external trade and payments, and the level of official reserves. Quotas determine members' subscriptions to the IMF, relative voting power, access to financing, and share in SDR allocations. Should a member withdraw from the Fund, quota subscriptions are repayable to the extent they are not needed to settle other net obligations of the member to the IMF.

The IMF conducts general reviews of all members' quotas every five years and assesses the adequacy of quotas in terms of members' needs for conditional liquidity and the IMF's ability to finance those needs. A general review also allows for adjustments of members' quotas to reflect changes in their relative positions in the world economy.

In September 2006, the IMF approved ad hoc quota increases for China, Korea, Mexico, and Turkey of SDR 1,720.9 million, SDR 1,293.7 million, SDR 567.0 million, and SDR 227.3 million, respectively. Following their quota subscription payments, the new quotas for China, Korea, and Turkey became effective during the financial year ended April 30, 2007. Mexico made its quota payment on May 21, 2007. Montenegro joined the IMF in January 2007 and its initial quota was SDR 27.5 million.

# Reserves of the General Resources Account

The IMF's reserves, consisting of the General Reserve and the Special Reserve, provide it with protection against financial risk of a general nature. The General Reserve may be used to meet capital losses or operational deficits or for distribution. The Articles of Agreement permit the IMF to use the Special Reserve for any purpose for which it may use the General Reserve except distribution.

The IMF determines annually what part of its net income (if any) will be retained and placed to the General Reserve or the Special Reserve, and what part, if any, will be distributed. The net loss for the financial year ended April 30, 2007, has been charged against the Special Reserve. The investment income of the Investment Account for the financial year ended April 30, 2007, is to be transferred to the General Resources Account for meeting expenses of conducting the business of the IMF. For the financial year ended April 30, 2006, after meeting the cost of administering the PRGF-ESF Trust, net operational income generated from surcharges on purchases under the Supplemental Reserve Facility (SRF), the credit tranches, and the Extended Fund Facility (EFF) has been placed to the General Reserve. The remainder of the net loss was charged against the Special Reserve.

# SDR interest rate

The SDR interest rate is determined weekly by reference to a combined market interest rate, which is a weighted average of yields on short-term instruments in the capital markets of the euro area, Japan, the United Kingdom, and the United States.

# Charges

The IMF levies periodic charges on members' use of GRA credit. The basic rate of charge is set at the beginning of each financial year as the SDR inter-

est rate plus a margin expressed in basis points determined by the Executive Board. Under the burden sharing mechanism (see Note 14), the basic rate of charge is increased (i) to offset the effect on the IMF's income of the nonpayment of charges and (ii) to finance the additions to the SCA-1.

A surcharge progressing from 300 to 500 basis points above the rate of charge applies to the use of credit under the SRF. In addition, credit outstanding exceeding 200 percent of quota resulting from purchases in the credit tranches and under the EFF (other than those under the SRF) after November 28, 2000, is subject to a surcharge of 100 basis points, and credit in excess of 300 percent of quota, to a surcharge of 200 basis points. Special charges are levied on members' currency holdings that are not repurchased when due and on overdue charges. Special charges do not apply to members that are six months or more overdue to the IMF. A service charge is levied by the IMF on all purchases except reserve tranche purchases. A refundable commitment fee is charged on Stand-By and Extended Arrangements. At the expiration or cancellation of an arrangement, the unrefunded portion of the commitment fee is recognized as current income.

# Remuneration

The IMF pays interest, referred to as remuneration, on a member's reserve tranche position. A portion of the reserve tranche is unremunerated and is equal to 25 percent of the member's quota on April 1, 1978 (that part of the quota that was paid in gold prior to the Second Amendment of the Fund's Articles). For a member that joined the Fund after that date, the unremunerated reserve tranche is the same percentage of its initial quota as the average unremunerated reserve tranche was as a percentage of the quotas of all other members when the new member joined the Fund. The unremunerated reserve tranche remains fixed for each member in nominal terms, but, because of subsequent quota increases, it is now significantly lower when expressed as a percentage of quota. The average is equal to 3.7 percent of quota at April 30, 2007 (3.8 percent of quota at April 30, 2006), but the actual percentage is different for each member.

The rate of remuneration, which is equivalent to the effective interest rate, is equal to the SDR interest rate adjusted downward to finance a share of the nonpayment of charges and additions to the SCA-1 under the burden sharing mechanism (see Note 14).

# Adoption of New International Financial Reporting Standards

In December 2004, the International Accounting Standards Board (IASB) issued an amendment to IAS 19, "Employee Benefits, Actuarial Gains and Losses, Group Plans, and Disclosures." The amended IAS 19 provides an additional option for recognizing actuarial gains and losses and requires additional disclosures on the plan assets held by employee benefit plans as well as further disclosure on the net periodic cost and reconciliation of the funded status. The revised standard was adopted by the IMF in financial year 2007 and had no impact on the reported financial position and results of operations.

In August 2005, the IASB issued a new standard, IFRS 7 "Financial Instruments: Disclosures," which requires enhanced quantitative and qualitative risk disclosures for all major categories of financial instruments. IFRS 7 will become effective for financial year 2008, and its implementation is not expected to have an impact on the General Department's financial position or results of operations.

# Provisions

Provisions are recognized when the IMF has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are measured at the present value of the amounts that are expected to be paid to settle the obligations.

# Contingencies

Possible obligations of the IMF, the existence of which will be confirmed only by the occurrence or non-occurrence of uncertain future events not wholly within the control of the IMF, and present obligations of the IMF where it is not probable that an outflow of economic benefits will be required to settle the obligation or where the amount of the obligation cannot be measured reliably are not recognized in the balance sheet but are disclosed in the notes to the financial statements.

Possible assets of the IMF, the existence of which will be confirmed only by the occurrence or non-occurrence of uncertain future events not wholly within the control of the IMF, are not recognized in the balance sheet and are disclosed only in the notes to the financial statements where an inflow of economic benefits is probable.

### 3. Risk management

In providing financial assistance to member countries and conducting its operations, the IMF is exposed to various types of operational and financial risks, including credit, interest rate, exchange rate, liquidity, and income risks. The principal risk facing the IMF is credit risk resulting from its unique role in the international monetary system. The measures in place to mitigate financial risks faced by the IMF are reviewed, beginning in financial year 2007, on an annual basis as part of the comprehensive risk assessment exercise that also covers strategic and core mission risks.

# Credit risk

#### Credit outstanding

Credit risk refers to potential losses on the credit outstanding owing to the inability, or unwillingness, of member countries to make repurchases. Credit risk is inherent since the IMF generally provides financing when other sources are not available to a member and has limited ability to diversify its loan portfolio. As a result, credit concentration is high (see Note 4).

The IMF's credit risk mitigating measures comprise policies on access limits; program design and monitoring, including conditionality attached to its financing; early repurchase policies; and preventative, precautionary, and remedial measures to cope with the financial consequences of protracted arrears.

The IMF has established access limits, including limits on overall access to resources in the GRA, as well as limits on access to the credit tranches under the EFF. The overall limit is currently set at an annual limit of 100 percent of a member's quota, with a cumulative limit of 300 percent of a member's quota. Access in excess of these limits can be granted in exceptional circumstances (exceptional access cases) subject to certain procedural requirements and substantive criteria that have been adopted by the Executive Board. The IMF generally provides financial assistance to members in the context of a program that is designed to help the member overcome its balance of payments difficulties during the program period. IMF assistance is normally disbursed in tranches and subject to conditionality in the form of performance criteria and periodic reviews. To ensure the integrity of data provided to the Fund in the context of access to Fund resources and compliance with performance criteria, the IMF may apply remedies for misreporting by member countries by expecting early repurchases for non-complying purchases.

In accordance with the Articles of Agreement, member countries using IMF resources are expected to make early repurchases as their balance of payments and reserve positions improve. Moreover, members are expected to make repurchases resulting from purchases in the credit tranches or under the Compensatory Financing Facility made after November 20, 2000, under predetermined expectation schedules ahead of the obligation date to preserve the revolving character of the IMF's resources and reduce the duration of IMF credit exposure.

The IMF maintains precautionary balances consisting of its reserves and the SCA-1 to cover possible overdue principal and losses in income, and to preserve the IMF's reputation as a prudent financial organization. A target level of precautionary balances is determined by taking into consideration the amount of credit in protracted arrears and a margin for risk associated with credit in good standing. The Executive Board decided that, in the current circumstances, the IMF should aim at precautionary balances in an amount of SDR 10 billion. As of April 30, 2007, and 2006, precautionary balances amounted to SDR 7.6 billion. In addition, the burden sharing arrangement for overdue charges is another risk-mitigating mechanism unique to the IMF, whereby the financial risk from such charges is passed on to creditor and debtor members and allows for the strengthening of the IMF's overall financial position.

#### Investments

Credit risk on investments represents the potential loss that the IMF may incur if obligators and counterparties default on their contractual obligations. Credit risk is minimized by limiting eligible investments to financial instruments rated A or higher by a major credit rating agency.

#### Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. The IMF's cost structure and its income position are interest-rate driven. Fluctuations in interest rates could widen or narrow the spread between the rate of charge on credit outstanding and the rate of remuneration paid to member countries with remunerated reserve tranche positions. To minimize the effect of interest rate fluctuations on income, the IMF links the rate of charge directly, by a fixed margin, to the SDR interest rate (which is equal to the rate of remuneration).

Interest rate risk on investments is mitigated by limiting the duration of the portfolio to strike a balance between returns and the volatility arising from changes in market interest rates.

#### Exchange rate risk

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on an entity's financial position and cash flows. The IMF uses the SDR as the unit of account and conducts its transactions in terms of the SDR. It has no exchange rate risk exposure on its holdings of members' currencies since, under the Articles

of Agreement, members are required to maintain the value of such holdings in terms of the SDR. Any depreciation/appreciation in their currency vis-à-vis the SDR gives rise to a currency valuation adjustment receivable or payable that must be settled on an annual basis and that is included in the stock of the IMF's currency holdings. Therefore, the value of the IMF's currency holdings does not fluctuate in SDR terms.

Exchange rate risk on investments is managed by investing in financial instruments denominated in SDRs or in constituent currencies of the SDR with the weight of each currency adjusted to reflect its weight in the SDR basket. Since the financial instruments included in the portfolio will change in value over time and generate cash flows, the weight of each currency in the portfolio will differ slightly from the weights in the SDR basket. This risk is mitigated through regular rebalancing of the portfolio.

The IMF has other assets and liabilities, such as trade receivables and payables, denominated in currencies other than SDRs and makes administrative payments largely in U.S. dollars, but the exchange rate risk exposure is very limited.

# Liquidity risk

Liquidity risk is the risk of non-availability of resources to meet the IMF's financing needs and obligations. The IMF must have usable resources available to meet members' demand for credit. While the IMF's resources are revolving, uncertainties in timing and amount of credit extended to members during financial crises expose the IMF to liquidity risk. Moreover, the IMF must also stand ready to meet the potential demands from members drawing upon their reserve tranche positions, which have no fixed maturity and are part of members' reserves.

The IMF manages its liquidity risk not by matching the maturity of assets and liabilities but by closely scrutinizing developments in its liquidity position, especially as they relate to the adequacy of quotabased resources to meet liquidity needs. The Articles of Agreement require the IMF to conduct a general review of members' quotas at intervals of no more than five years in order to assess the adequacy of quota-based resources to meet members' demand for IMF financing. The last general review (the twelfth) was completed in January 2003 with no proposed quota increase. In January 2007, the IMF initiated the thirteenth general review, to be completed in January 2008. Should the available quota-based resources be inadequate to meet financing needs, the IMF may activate its standing credit lines totaling SDR 34 billion under the General Arrangements to Borrow and the New Arrangements to Borrow, and its associated agreement with Saudi Arabia for an additional SDR 1.5 billion.

The IMF also monitors its liquidity position over a shorter term, using objective criteria such as the forward commitment capacity for the next twelve-month period. (Schedule 2 provides the IMF's available resources and liquidity position.)

Liquidity risk on investments is limited by investing in readily marketable obligations of international financial organizations and short- and medium-term financial instruments.

# Income risk

The IMF has been relying principally on income from charges levied on outstanding credit to meet its operating costs. The level of IMF lending has declined significantly, and the IMF faces potential annual income

shortfalls in the medium term. In May 2006, the Managing Director appointed a committee of well-known experts to study sustainable financing options for the IMF. The committee's report was publicly released at end-January 2007. The committee recommended that the IMF broaden its income sources so they are better aligned with its diverse activities. Work has commenced, based on the committee's report, on the development of a new income model aimed at broadening the IMF's income base.

# **Operational risk**

Operational risk includes risk of loss attributable to errors or omissions because of failures in executing or processing transactions, inadequate controls, human factors, and/or failures in underlying support systems.

The IMF mitigates operational risk by (i) identifying key operational risks, (ii) maintaining a system of internal controls, (iii) documenting policies and procedures on administrative and accounting and reporting processes, and (iv) conducting internal audits to ensure accurate processing of transactions and minimize the possibility of undetected errors. The design and effectiveness of controls are evaluated continuously and improvements are implemented on a timely basis. The results of the internal evaluation of the effectiveness of internal controls are reported by the Office of Internal Audit and Inspection to the External Audit Committee, which also exercises oversight over the external audit of the IMF's accounts and its controls.

The IMF has adopted a Code of Ethics to promote the highest standards of ethics among its staff, including senior management and members of the Executive Board. The Code of Ethics, enforced by the Ethics Officer, is supplemented by procedures for the reporting and investigation of irregularities and improprieties, including fraudulent acts.

# 4. Credit and loans outstanding

Credit outstanding in the GRA and SAF loans in the SDA are carried at amortized cost.

Changes in the outstanding use of IMF credit under the various facilities of the GRA were as follows:

|                                     | April 30,<br>2005 |       |             | April 30,<br>2006 | Pur-<br>chases | Repur-<br>chases | April 30,<br>2007 |
|-------------------------------------|-------------------|-------|-------------|-------------------|----------------|------------------|-------------------|
|                                     |                   |       | (In mi      | illions of S      | SDRs)          |                  |                   |
| Credit tranches                     | 35,458            | 1,967 | (26,108)    | 11,317            | 2,270          | (7,382)          | 6,205             |
| Extended Fund<br>Facility           | 9,365             | 189   | (2,077)     | 7,477             | 2              | (6,762)          | 717               |
| Supplemental<br>Reserve<br>Facility | 4,569             | _     | (4,569)     | _                 | _              | _                | _                 |
| Systemic<br>Transformation          | 10                |       | (10)        |                   |                |                  |                   |
| Facility<br>Enlarged access         | 18<br>271         | _     | (18)<br>(3) | 268               | _              | (6)              | 262               |
| Compensatory and<br>Contingency     | 1                 |       | (0)         |                   |                |                  |                   |
| Financing Facili                    | ty 84             | _     | —           | 84                | _              | (5)              | 79                |
| Supplementary<br>Financing Facilit  | ty89              |       | (8)         | 81                |                | (11)             | 70                |
| Total credit<br>outstanding         | 49,854            | 2,156 | (32,783)    | 19,227            | 2,272          | (14,166)         | 7,333             |

Repurchases for the financial year ended April 30, 2007, include repurchase of SDR 11 million financed by grant assistance under the Multilateral Debt Relief Initiative (MDRI) (SDR 90 million for the year ended April 30, 2006). As of April 30, 2007, none of the members with outstanding GRA credit was eligible for MDRI grant assistance.

The following repurchases were made by members during the financial years ended April 30:

|                         | 2007         | 2006       |
|-------------------------|--------------|------------|
|                         | (In million: | s of SDRs) |
| Early repurchases       | 7,086        | 21,968     |
| Repurchase expectations | 928          | 2,910      |
| Repurchase obligations  | 6,152        | 7,905      |
| Total repurchases       | 14,166       | 32,783     |
|                         |              |            |

There were no extensions of repurchases from the expectation to the obligation schedule during the financial year ended April 30, 2007 (for the financial year ended April 30, 2006, Argentina, Dominica, the former Yugoslav Republic of Macedonia, Turkey, and Uruguay's requests to extend their repurchase expectations were approved for SDR 1,683 million, SDR 1 million, SDR 18 million, SDR 2,521 million, and SDR 541 million, respectively).

As of April 30, 2007, and 2006, outstanding and overdue SAF loans amounted to SDR 9 million.

Scheduled repurchases in the GRA and repayment of SAF loans in the SDA are summarized below:

| Financial year<br>ending April 30 | General Resources<br>Account | Special Disbursement<br>Account |
|-----------------------------------|------------------------------|---------------------------------|
|                                   | (1                           | n millions of SDRs)             |
| 2008                              | 2,413                        | _                               |
| 2009                              | 1,923                        | _                               |
| 2010                              | 1,912                        | _                               |
| 2011                              | 496                          | _                               |
| 2012                              | 26                           | _                               |

# 5. Multilateral Debt Relief Initiative

Under the MDRI, effective January 5, 2006, debt relief is provided to qualifying Heavily Indebted Poor Countries (HIPCs) and non-HIPCs with annual per capita income of \$380 or less, and to qualifying HIPCs with an annual per capita income of more than \$380. Grant assistance from the MDRI Trusts (together with assistance under the HIPC Initiative) provides debt relief to cover the full stock of debt owed to the IMF as of December 31, 2004, that remains outstanding at the time the member qualifies for such relief.

During the financial year ended April 30, 2007, debt relief amounting to SDR 189 million under the MDRI was granted to 4 members (SDR 2,503 million to 20 members for the financial year ended April 30, 2006), allowing for early repayment of outstanding credit in the GRA of SDR 11 million and PRGF-ESF Trust loans of SDR 178 million (SDR 90 million and SDR 2,413 million for the financial year ended April 30, 2006, respectively). MDRI grant assistance provided from resources held in the MDRI-I Trust amounted to SDR 92 million and SDR 1,120 million for the financial years ended April 30, 2007, and 2006, respectively. All HIPC member countries are entitled to receive MDRI assistance upon reaching the completion point under the HIPC Initiative. Since the stock of debt owed to the IMF as of December 31, 2004, decreases over time, the actual debt eligible for MDRI assistance for the remaining qualifying HIPCs depends on the timing of their completion points. The IMF periodically reviews the qualification of members for MDRI debt relief as these members make progress toward reaching the completion point under the HIPC Initiative.

MDRI grant assistance to the remaining eligible members is subject to the availability of resources and is accrued when it is probable that a liability has been incurred and the amount of such grant assistance can be reasonably estimated. The liability recorded in the MDRI-I Trust amounted to SDR 299 million and SDR 380 million as of April 30, 2007, and 2006, respectively, and is based on the evaluation of currently available facts with respect to each individual eligible member. It includes factors such as progress made toward reaching the completion point under the HIPC Initiative and the capacity to meet the macroeconomic performance and other objective criteria after reaching the completion point. As the qualification of members for MDRI debt relief is assessed, the amounts recorded are reviewed periodically and adjusted to reflect additional information that becomes available.

The reconciliation of accrued MDRI grant assistance for the financial year ended April 30, 2007, and from inception to April 30, 2006, is as follows:

|                          | Financial<br>year 2007 | Inception to<br>April 30, 2006 |
|--------------------------|------------------------|--------------------------------|
|                          | (In milli              | ons of SDRs)                   |
| Beginning of year/period | 380                    | _                              |
| Additions                | 11                     | 381                            |
| Amounts utilized         | (92)                   | —                              |
| Reversals                | —                      | (1)                            |
| End of year/period       | 299                    | 380                            |

# 6. Currencies

Net changes in the IMF's holdings of members' currencies for the financial years ended April 30, 2007, and 2006 were as follows:

|  | April 30,<br>2005 | Net<br>change | April 30,<br>2006 | Net<br>change | April 30,<br>2007 |
|--|-------------------|---------------|-------------------|---------------|-------------------|
|  |                   | (In n         | nillions of S     | DRs)          |                   |
| Members' quotas  | 213,478           |               | 213,478           | 3,270         | 216,748           |
| Members' outstanding use<br>of IMF credit in the GRA<br>Members' reserve tranche | 49,854            | (30,627)      | 19,227            | (11,894)      | 7,333             |
| positions in the GRA   | (49,849)          | 28,023        | (21,826)          | 6,830         | (14,996)          |
| Administrative currency<br>balances  | 3                 | (3)           |                   | 5             | 5                 |
| Total currencies   | 213,486           | (2,607)       | 210,879           | (1,789)       | 209,090           |
|  |                   |               |                   |               |                   |

Receivables and payables arising from valuation adjustments at April 30, 2007, when all holdings of currencies of members were last revalued, amounted to SDR 6,654 million and SDR 4,667 million, respectively (SDR 4,103 million and SDR 7,074 million, respectively, at April 30, 2006). Settlements of these receivables or payables are required to be made by members promptly after the end of each financial year.

# 7. Investments

Investments are held in the Investment Account (SDR 6,235 million at April 30, 2007) and the MDRI-I Trust (SDR 301 million and SDR 384 million, at April 30, 2007, and 2006, respectively) and are managed by external investment managers. These investments comprise fixed-term deposits; short-term investments and fixedincome investments, which include domestic government bonds of the euro area, Japan, the United Kingdom, and the United States; and medium-term instruments issued by the Bank for International Settlements.

At April 30, investments consisted of the following:

|                         | 2007         | 2006     |
|-------------------------|--------------|----------|
|                         | (In millions | of SDRs) |
| Short-term investments  | 251          | 26       |
| Fixed-term deposits     | 287          | 358      |
| Fixed-income securities | 5,998        | —        |
| Total investments       | 6,536        | 384      |

At April 30, the maturities of the investments were as follows:

|                  | 2007         | 2006       |
|------------------|--------------|------------|
|                  | (In millions | s of SDRs) |
| Less than 1 year | 745          | 384        |
| 1–3 years        | 5,479        |            |
| 3–5 years        | 248          | _          |
| Over 5 years     | 64           |            |
| Total            | 6,536        | 384        |

### Investment income

Investment income comprised the following for the financial years ended April 30:

|                   | 2007         | 2006     |
|-------------------|--------------|----------|
|                   | (In millions | of SDRs) |
| Interest income   | 193          | 49       |
| Realized gains    | 5            | _        |
| Realized losses   | (5)          | _        |
| Unrealized gains  | 7            | _        |
| Unrealized losses | (7)          | _        |
| Total             | 193          | 49       |

### 8. Interest and charges

As of April 30, 2007, the total holdings on which the IMF levies charges amounted to SDR 7,333 million (SDR 19,227 million as of April 30, 2006). For the financial years ended April 30, 2007, and 2006, the basic rate of charge was set at a fixed margin of 108 basis points above the SDR interest rate. The average adjusted rate of charge before applicable surcharges for the financial year ended April 30, 2007, was 5.28 percent (4.18 percent for the financial year ended April 30, 2006).

|  | 2007        | 2006       |
|--|-------------|------------|
|  | (In million | s of SDRs) |
| Periodic charges                       | 1,190       | 1,308      |
| Amount paid through burden sharing     | (889)       | (859)      |
| Unpaid charges                         | (186)       | (186)      |
|  | 115         | 263        |
| Interest receivable                    | 27          | 32         |
| Total interest and charges receivables | 142         | 295        |

Interest and periodic charges consisted of the following for the years ended April 30:

|  | 2007        | 2006        |
|--|-------------|-------------|
|  | (In millior | ns of SDRs) |
| Interest and periodic charges              | 672         | 1,667       |
| Burden sharing adjustments, net of refunds | 15          | 5           |
| Total interest and charges                 | 687         | 1,672       |

Interest earned on SAF loans for the financial years ended April 30, 2007, and 2006 amounted to SDR 0.04 million and SDR 0.1 million, respectively.

Service charges and commitment fees on cancelled or expired arrangements amounted to SDR 16 million (SDR 23 million for the year ended April 30, 2006), and are included in other charges and income.

# 9. Other assets—fixed assets

Other assets include fixed assets, which at April 30, 2007, and 2006 amounted to SDR 302 million and SDR 313 million, respectively, and consisted of land, buildings, and equipment, furniture and software.

|   | Land | Buildings   | Other    | Total |
|---|------|-------------|----------|-------|
|   |      | (In million | s of SDR | ls)   |
| Cost                                      |      |             |          |       |
| Beginning of the year                     | 96   | 295         | 78       | 469   |
| Additions                                 | _    | —           | 11       | 11    |
| Disposals                                 | _    | _           | (4)      | (4)   |
| End of the year                           | 96   | 295         | 85       | 476   |
| Accumulated depreciation and amortization |      |             |          |       |
| Beginning of the year                     | _    | 122         | 34       | 156   |
| Additions                                 | _    | 10          | 12       | 22    |
| Disposals                                 | _    | _           | (4)      | (4)   |
| End of the year                           | _    | 132         | 42       | 174   |
| Net book value as at April 30, 2007       | 96   | 163         | 43       | 302   |
| Net book value as at April 30, 2006       | 96   | 173         | 44       | 313   |

### 10. Gold holdings

At April 30, 2007, and 2006, the IMF held 3,217,341 kilograms of gold, equal to 103,439,916 fine ounces of gold, at designated depositories. Gold holdings were valued at a historical cost of SDR 5,852 million as of April 30, 2007, and 2006.

|   |                | ost       |                          |
|---|----------------|-----------|--------------------------|
|   | Ounces         | Per ounce | Total                    |
|   | (In millions)  | (In SDRs) | (In millions<br>of SDRs) |

| Total   | 103.439        |           | 5,852                    |

As of April 30, 2007, the market value of the IMF's holdings of gold was SDR 45.9 billion (SDR 45.3 billion at April 30, 2006).

# **11. Special Disbursement Account**

#### Contributions to Administered Accounts

Assets in the SDA can be used for special purposes authorized in the Articles of Agreement, including providing financial assistance on special terms to low-income member countries.

Proceeds from the repayment of SAF loans and Trust Fund loans and excess resources from the Supplementary Financing Facility Subsidy Account are transferred from the SDA to the PRGF-ESF Trust as contributions. These contributions amounted to SDR 0.2 million and SDR 37 million during the financial years ended April 30, 2007, and 2006, respectively. The accumulated investment earnings in the SDA are available for financing the PRGF-HIPC Trust on an as-needed basis. No contributions were made from the SDA to the PRGF-HIPC Trust during the financial year ended April 30, 2007 (contributions amounted to SDR 63 million during the financial year ended April 30, 2006).

Following the implementation of the MDRI, effective January 5, 2006, the resources held in the SDA were contributed to other accounts during financial year 2006 as follows:

|                                | (In millions of SDRs) |
|--------------------------------|-----------------------|
| PRGF-HIPC Trust Account        | 530                   |
| MDRI-I Trust                   | 1,500                 |
| PRGF-ESF Trust Subsidy Account | 470                   |
| Total                          | 2,500                 |

### Trust Fund

The IMF is the Trustee of the Trust Fund, which was established in 1976 to provide balance of payments assistance on concessional terms to eligible members that qualify for assistance. The Trust Fund is in liquidation.

In 1980, the IMF, as Trustee, decided that, upon the completion of the final loan disbursements, the Trust Fund would be terminated as of April 30, 1981. Since that date, the activities of the Trust Fund have been confined to the conclusion of its affairs. The Trust Fund has no assets other than claims receivable, including interest and special charges, from Liberia, Somalia, and Sudan amounting to SDR 118 million at April 30, 2007, and 2006. All interest is deferred. Cash receipts on these loans are to be transferred to the SDA from where they are transferred to the Reserve Account of the PRGF-ESF Trust.

### 12. Borrowings

Under the General Arrangements to Borrow (GAB) and an associated agreement with Saudi Arabia, the IMF may borrow up to SDR 18.5 billion

when supplementary resources are needed, in particular, to forestall or to cope with an impairment of the international monetary system. The GAB became effective on October 24, 1962, and has been renewed through December 25, 2008. Interest on borrowings under the GAB is set at a rate equal to the SDR interest rate.

Under the New Arrangements to Borrow (NAB), the IMF may borrow up to SDR 34 billion of supplementary resources. The NAB is the facility of first and principal recourse, but it does not replace the GAB, which will remain in force. Outstanding drawings and commitments under these two borrowing arrangements are limited to a combined total of SDR 34 billion. The NAB became effective for a five-year period on November 17, 1998, and has been renewed through November 16, 2008. Interest on borrowings under the NAB is payable to the participants at the SDR interest rate or any such higher rate as may be agreed between the IMF and participants representing 80 percent of the total credit arrangements. There was no balance outstanding as at April 30, 2007, and 2006 under the GAB or the NAB.

# 13. Arrangements

An arrangement is a decision of the IMF that gives a member the assurance that the IMF stands ready to provide SDRs or usable currencies during a specified period and up to a specified amount, in accordance with the terms of the arrangement. At April 30, 2007, the undrawn balances under the 7 arrangements that were in effect in the GRA amounted to SDR 3,911 million (SDR 7,539 million under 11 arrangements at April 30, 2006; see Schedule 3).

# 14. Burden sharing and the Special Contingent Account

Under the burden sharing mechanism, the basic rate of charge is increased and the rate of remuneration is adjusted downward to offset the effect on the IMF's income of the nonpayment of charges and also to finance the additions to the SCA-1.

Cumulative charges, net of settlements, that have resulted in adjustments to charges and remuneration since May 1, 1986 (the date the burden sharing mechanism was adopted) amounted to SDR 889 million at April 30, 2007 (SDR 859 million at April 30, 2006). The cumulative refunds for the same period, resulting from the settlements of overdue charges for which burden sharing adjustments have been made, amounted to SDR 1,089 million at April 30, 2007, and 2006, respectively.

The SCA-1 is financed by adjustments to the rate of charge and the rate of remuneration. Balances in the SCA-1 are to be distributed to the members that shared the cost of its financing when there are no outstanding overdue repurchases and charges, or at such earlier time as the IMF may decide. Amounts collected from members for the SCA-1 are akin to refundable cash deposits and are recorded as collections of cash and as a liability to those who paid it. Losses arising from overdue obligations, if realized, would be shared by members in proportion to their cumulative contributions to the SCA-1. For the financial years ended April 30, 2007, and 2006, the additions to the SCA-1 amounted to SDR 30 million and SDR 94 million, respectively.

# 15. Remuneration

At April 30, 2007, total creditor positions on which the IMF paid remuneration amounted to SDR 8,167 million (SDR 15,051 million at April 30, 2006). The average adjusted rate of remuneration for the financial year ended April 30, 2007, was 3.74 percent (2.68 percent for the financial year ended April 30, 2006). Remuneration consisted of the following for the years ended April 30:

|  | 2007         | 2006       |
|--|--------------|------------|
|  | (In millions | s of SDRs) |
| Remuneration                               | 499          | 833        |
| Burden sharing adjustments, net of refunds | (15)         | (5)        |
|  | 484          | 828        |
|  |              |            |

# 16. Administrative expenses

Administrative expenses, the majority of which were incurred in U.S. dollars, were as follows for the years ended April 30:

|   | 2007                  | 2006 |  |  |
|---|-----------------------|------|--|--|
|   | (In millions of SDRs) |      |  |  |
| Personnel   | 362                   | 355  |  |  |
| Pension and other long-term employee<br>benefits        | 81                    | 153  |  |  |
| Travel  | 68                    | 67   |  |  |
| Other   | 98                    | 118  |  |  |
| Total administrative expenses, net of<br>reimbursements | 609                   | 693  |  |  |

# 17. Pension and other post-retirement benefits

The IMF has a defined benefit Staff Retirement Plan (SRP) that covers substantially all eligible staff and a Supplemental Retirement Benefits Plan (SRBP) for selected participants of the SRP. Participants contribute 7 percent of their pensionable gross remuneration and the IMF contributes the remainder of the cost of funding the plans and pays the administrative costs of the plans. In addition, the IMF provides other employment and post-retirement benefits, including medical, life insurance, and other long-term benefits. In 1995, the IMF established a separate account, the Retired Staff Benefits Investment Account (RSBIA), to hold and invest resources set aside to fund the cost of the post-retirement benefits.

The defined benefit obligations are valued annually by independent actuaries. The latest actuarial valuations were carried out as at April 30, 2007, using the Projected Unit Credit Method.

The amounts recognized in the balance sheets are determined as follows:

|  |                       | 2007  |       |         |         |  |  |
|--|-----------------------|-------|-------|---------|---------|--|--|
|  | SRP                   | SRBP  | Other | Total   | Total   |  |  |
|  | (In millions of SDRs) |       |       |         |         |  |  |
| Fair value of plan assets  | 4,402                 | 14    | 512   | 4,928   | 4,468   |  |  |
| Present value of the defined<br>benefit obligation<br>Unrecognized actuarial | (3,176)               | (328) | (697) | (4,201) | (3,834) |  |  |
| (gains)/losses   | (410)                 | 57    | (54)  | (407)   | (341)   |  |  |
| Unrecognized prior service cost  |                       |       | 6     | 6       | 7       |  |  |
| Net balance sheets asset/<br>(liability)                                     | 816                   | (257) | (233) | 326     | 300     |  |  |

The IMF expects to contribute SDR 114 million to its defined benefit pension plans during the financial year ending April 30, 2008.

The reconciliation of the defined benefit obligation is as follows:

|   |       |       | 2006        |       |       |
|---|-------|-------|-------------|-------|-------|
|   | SRP   | SRBP  | Other       | Total | Total |
|   |       | (In n | nillions of | SDRs) |       |
| Defined benefit obligation at             |       |       |             |       |       |
| beginning of year                         | 2,983 | 279   | 572         | 3,834 | 3,720 |
| Current service cost                      | 97    | 29    | 39          | 165   | 179   |
| Interest cost                             | 190   | 19    | 37          | 246   | 218   |
| Staff contributions                       | 27    | 1     | _           | 28    | 29    |
| Benefits paid                             | (89)  | (8)   | (36)        | (133) | (126) |
| Actuarial loss/(gain)                     | 81    | 20    | 106         | 207   | (312) |
| Exchange differences                      | (113) | (12)  | (21)        | (146) | 126   |
| Defined benefit obligation at end of year | 3,176 | 328   | 697         | 4,201 | 3,834 |

The amounts recognized in the income statements are as follows:

|   |       | 2006  |             |       |       |
|---|-------|-------|-------------|-------|-------|
|   | SRP   | SRBP  | Other       | Total | Total |
|   |       | (In m | nillions of | SDRs) |       |
| Current service cost                                      | 97    | 29    | 39          | 165   | 179   |
| Interest cost   | 190   | 19    | 37          | 246   | 218   |
| Expected returns on assets                                | (300) | (1)   | (34)        | (335) | (263) |
| Amortization of actuarial<br>loss/(gain)                  | _     | 2     | 2           | 4     | 17    |
| Prior service cost  |       |       | 1           | 1     | 2     |
| Total (income)/expense recognized<br>in income statements | (13)  | 49    |             | 81    | 153   |
| Actual return on assets                                   |       |       |             | 622   | 855   |

The pension and other post-retirement benefits expenses recognized in the income statement include the amortization, over the estimated average remaining service lives of IMF staff, of actuarial gains and losses in excess of a corridor. The corridor is the larger of 10 percent of either the defined benefit obligation or the fair value of assets at the beginning of the financial year.

The reconciliation of fair value of assets is as follows:

|  |       | 20    | 07          |       | 2006  |
|--|-------|-------|-------------|-------|-------|
|  | SRP   | SRBP  | Other       | Total | Total |
|  |       | (In m | nillions of | SDRs) |       |
| Fair value of assets at beginning          |       |       |             |       |       |
| of year                                    | 4,003 | 7     | 458         | 4,468 | 3,504 |
| Expected return on assets                  | 300   | 1     | 34          | 335   | 263   |
| Gain on assets                             | 256   | _     | 31          | 287   | 592   |
| Employer contributions                     | 53    | 13    | 41          | 107   | 100   |
| Staff contributions                        | 27    | 1     | _           | 28    | 29    |
| Benefits paid                              | (89)  | (8)   | (36)        | (133) | (126) |
| Exchange differences                       | (148) | —     | (16)        | (164) | 106   |
| Actual fair value of assets at end of year | 4,402 | 14    | 512         | 4,928 | 4,468 |

The funded status and the experience adjustments for the current and previous four financial years are as follows:

|  | 2007             | 2006             | 2005             | 2004             | 2003             |
|--|------------------|------------------|------------------|------------------|------------------|
|  |                  | (In i            | millions o       | f SDRs)          |                  |
| Defined benefit obligation<br>Plan assets                    | (4,201)<br>4,928 | (3,834)<br>4,468 | (3,720)<br>3,504 | (3,570)<br>3,265 | (2,454)<br>2,747 |
| Surplus/(deficit) in the Plans<br>Experience adjustments on: | 727              | 634              | (216)            | (305)            | 293              |
| Plan liabilities   | (195)            | 312              | (45)             | (1,103)          | 495              |
| Plan assets<br>Exchange rates                                | 287<br>(19)      | 593<br>(17)      | 136<br>25        | 442<br>3         | (367)<br>(257)   |

The major categories of plan assets as a percentage of the total value of plan assets are as follows:

|                          | 2007    | 2006  |
|--------------------------|---------|-------|
|                          | (In per | cent) |
| Fixed income             | 17.8    | 14.9  |
| Equity                   | 62.7    | 66.4  |
| Real estate              | 2.4     | 2.6   |
| Private equity and other | 17.1    | 16.1  |
|                          | 100.0   | 100.0 |
|                          |         |       |

The principal actuarial assumptions used in the actuarial valuations were as follows:

|                                | 2007     | 2006     |
|--------------------------------|----------|----------|
|                                | (In perc | ent)     |
| Discount rate                  | 5.9      | 6.25     |
| Expected return on plan assets | 7.5      | 7.5      |
| Future salary increases        | 6.4-10.8 | 6.4–10.8 |
| Health-care trend rate         | 4.0-9.0  | 4.0-8.0  |

The expected return on plan assets is set by reference to historical returns on each of the main asset classes, current market indicators such as longterm bond yields, and the expected long-term strategic asset allocation of each plan.

The effects of the assumed health-care costs growth rates on the defined benefits plans are as follows:

|  | Increase of<br>1 percentage point | Decrease of<br>1 percentage point |  |  |  |  |
|--|-----------------------------------|-----------------------------------|--|--|--|--|
|  | (In millions of SDRs)             |                                   |  |  |  |  |
| Effect on the aggregate of the<br>service cost and interest cost<br>Effect on defined benefit obligation | 11<br>110                         | (8)<br>(86)                       |  |  |  |  |

# 18. Related-party transactions

The GRA conducts its transactions with the SDR Department on the same terms and conditions applicable to participants in the SDR Department. During the financial year ended April 30, 2007, the receipts (consisting of repurchases, charges, and interest on SDR holdings) and uses (consisting of purchases and remuneration) of SDRs by the GRA amounted to SDR 1,612 million (SDR 5,867 million for the financial year ended April 30, 2006) and SDR 2,655 million (SDR 2,801 million for the financial year ended April 30, 2006). As of April 30, 2007, and 2006, the GRA's SDR holdings amounted to SDR 2,598 million and SDR 3,641 million, respectively.

The administrative expenses of operating the SDR Department, the PRGF-ESF Trust, the PRGF-HIPC Trust, and the MDRI-I and MDRI-II Trusts are paid by the GRA. The SDR Department will reimburse the GRA SDR 1.0 million for the financial year ended April 30, 2007 (SDR 1.2 million for the financial year ended April 30, 2006). The MDRI-I Trust will reimburse the GRA SDR 2.3 million for the financial year ended April 30, 2007. The reimbursement for the financial year ended April 30, 2006, amounted to SDR 4.1 million. The IMF decided to forgo the reimbursements by the PRGF-ESF Trust to the GRA, amounting to SDR 48.0 million and SDR 50.9 million for the financial years ended April 30, 2007, and 2006, respectively. The PRGF-HIPC Trust and the MDRI-II Trust did not reimburse the GRA for the financial years ended April 30, 2007, and 2006. Schedule 1

| <i>Equals:</i> Usable resources <sup>3</sup>           | 163,587,477 | 154,773,280 |
| Less: Undrawn balances under GRA arrangements          | 3,910,787   | 7,539,069   |
| Equals: Uncommitted usable resources                   | 159,676,690 | 147,234,211 |
| <b>Plus:</b> Repurchases one year forward <sup>4</sup> | 1,203,967   | 7,005,607   |
| Less: Prudential balance <sup>5</sup>                  | 34,765,360  | 34,162,440  |
| Equals: One-year forward commitment capacity (FCC)     | 126,115,297 | 120,077,378 |
| Memorandum items                                       |             |             |
| Resources available under borrowing arrangements       | 34,000,000  | 34,000,000  |
| Quotas of members that finance IMF transactions        | 173,826,800 | 170,812,200 |
| Liquid liabilities                                     | 14,995,543  | 21,826,022  |

<sup>1</sup>Other assets reflect current assets (charges, interest, and other receivables) and other assets (which include capital assets such as land, buildings, and equipment), net of other liabilities including remuneration payable.

<sup>2</sup>Resources are regarded as non-usable if they cannot be used in the financing of the IMF's ongoing operations and transactions. These resources include (1) gold holdings, (2) currencies of members that are using IMF credit, (3) currencies of other members with relatively weak external positions, and (4) other assets.

<sup>3</sup>Usable resources consist of (1) holdings of currencies of members considered by the IMF as having balance of payments and reserve positions sufficiently strong for their currencies to be used in transfers, (2) SDR holdings, and (3) any unused amounts under credit lines that have been activated.

<sup>4</sup>Repurchases by member countries during the coming one-year period. It is assumed that repurchases would be made on an expectation basis for SRF, and on an obligation basis under all other facilities.

<sup>5</sup>Prudential balance is set at 20 percent of quotas of members that issue the currencies that are used in the financing of IMF transactions and any amounts activated under borrowing arrangements.

# **Independent Auditors' Report**

To the Board of Governors of the International Monetary Fund Washington, DC

We have audited the accompanying balance sheets of the SDR Department of the International Monetary Fund (the "Department") as of April 30, 2007 and 2006, and related statements of income, and cash flows for the years then ended. These financial statements are the responsibility of the Department's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the SDR Department of the International Monetary Fund at April 30, 2007 and 2006, and the results of its operations and its cash flows for the years then ended in conformity with International Financial Reporting Standards.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedules listed on pages 28 to 32 are presented for the purpose of additional analysis and are not a required part of the basic financial statements. These schedules are the responsibility of the Department's management. Such schedules have been subjected to the auditing procedures applied in our audits of the basic financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic financial statements taken as a whole.

# SDR Department Notes to the financial statements for the years ended April 30, 2007, and 2006

# 1. Nature of operations

The International Monetary Fund (IMF) conducts its operations and transactions through the General Department and the Special Drawing Rights Department (the SDR Department). The Special Drawing Right (SDR) is an international interest-bearing reserve asset created by the IMF following the First Amendment of the Articles of Agreement in 1969. All transactions and operations involving SDRs are conducted through the SDR Department. The SDR may be allocated by the IMF, as a supplement to existing reserve assets, to members participating in the SDR Department. Its value as a reserve asset derives, essentially, from the commitments of participants to hold and accept SDRs and to honor various obligations connected with its proper functioning as a reserve asset.

The resources of the SDR Department are held separately from the assets of all the other accounts of, or administered by, the IMF. They may not be used to meet the liabilities, obligations, or losses of the Fund incurred in the operations of the General Department or other accounts, except that the SDR Department reimburses the General Department for expenses incurred in conducting the business of the SDR Department.

At April 30, 2007, all members of the IMF were participants in the SDR Department. SDRs have been allocated by the IMF to members that are participants in the SDR Department at the time of the allocation in proportion to their quotas in the IMF. Six allocations have been made (in 1970, 1971, 1972, 1979, 1980, and 1981) for a total of SDR 21.4 billion. A proposed amendment of the IMF's Articles of Agreement was approved by the Board of Governors in January 1998 to allow for a special one-time allocation of SDRs equal to SDR 21.4 billion. The amendment will enter into force after three-fifths of the members having 85 percent of the total voting power have accepted it. As of April 30, 2007, 131 members representing 77.64 percent of the total voting power have accepted the proposed amendment. Upon termination of participation in, or liquidation of, the SDR Department, the IMF will provide to holders the currencies received from the participants in settlement of their obligations. The IMF is empowered to prescribe certain official entities as holders of SDRs; at April 30, 2007, and 2006, 15 institutions were prescribed as holders. Prescribed holders do not receive allocations.

The SDR is also used by a number of international and regional organizations as a unit of account or as the basis for their units of account. Several international conventions also use the SDR as a unit of account, notably those expressing liability limits for the international transport of goods and services.

#### Uses of SDRs

Participants and prescribed holders can use and receive SDRs in transactions and operations by agreement among themselves. Participants can also use SDRs in operations and transactions involving the General Resources Account, such as the payment of charges and repurchases. By designating participants to provide freely usable currency in exchange for SDRs, the IMF ensures that a participant can use its SDRs to obtain an equivalent amount of currency if it has a need because of its balance of payments, its reserve position, or developments in its reserves.

# General allocations and cancellations of SDRs

The IMF has the authority to provide unconditional liquidity through general allocations of SDRs to participants in the SDR Department in proportion to their quotas in the IMF. The IMF cannot allocate SDRs to itself or to other holders it prescribes. The Articles of Agreement also provide for the cancellation of SDRs, although to date there have been no cancellations. In its decisions on general allocations of SDRs, the IMF, as prescribed under its Articles, has sought to meet the long-term global need to supplement existing reserve assets in such a manner as will promote the attainment of the IMF's purposes and avoid economic stagnation and deflation, as well as excess demand and inflation.

# 2. Summary of significant accounting policies

# Basis of accounting

The financial statements of the SDR Department are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices, as set out below, are in accordance with and comply with IFRS and have been applied consistently for all periods presented.

#### Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors, such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

## Unit of account

The functional and presentation currency of the SDR Department is the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in November 2005 and the new composition of the SDR valuation basket became effective on January 1, 2006.

The currencies in the basket as of April 30, 2007, and 2006, and their amounts were as follows:

| Currency       | Amount  |
|----------------|---------|
| Euro           | 0.4100  |
| Japanese yen   | 18.4000 |
| Pound sterling | 0.0903  |
| U.S. dollar    | 0.6320  |

As of April 30, 2007, one SDR was equal to 1.52418 U.S. dollars (one SDR was equal to 1.47106 U.S. dollars as of April 30, 2006).

# Allocations and holdings

At April 30, 2007, and 2006, net cumulative allocations to participants totaled SDR 21.4 billion. Participants with holdings in excess of their allocations have established a net claim on the SDR Department, which is represented on the balance sheet as a liability. Participants with holdings below their allocations have used part of their allocations, which results in a net obligation to the SDR Department and is presented as an asset of the SDR Department. Participants' net SDR positions as of April 30, 2007, and 2006 were as follows:

|   |          | 2007                 |                      |          | 2006                 |                      |  |
|---|----------|----------------------|----------------------|----------|----------------------|----------------------|--|

| Net SDR positions                             | 3,003.2  | 7,713.2              | (4,710.0)            | 3,899.5  | 8,224.4              | (4,324.9)            |  |

A summary of SDR holdings is provided below:

|                                  | 2007        | 2006        |
|----------------------------------|-------------|-------------|
|                                  | (In millior | ns of SDRs) |
| Participants                     | 18,430.1    | 17,533.8    |
| General Resources Account        | 2,597.5     | 3,640.8     |
| Prescribed holders               | 446.1       | 296.5       |
|                                  | 21,473.7    | 21,471.1    |
| Less: Overdue charges receivable | 40.4        | 37.8        |
| Total holdings                   | 21,433.3    | 21,433.3    |

# Interest and charges

Interest is paid on holdings of SDRs. Charges are levied on each participant's net cumulative allocations plus any unpaid charges. Interest and charges are levied at the same rate and are settled by crediting and debiting the individual holdings accounts. The SDR Department is required to pay interest to each holder, whether or not sufficient SDRs are received to meet the payment of interest. If sufficient SDRs are not received because charges are overdue, additional SDRs are temporarily created. The rate of interest on the SDR is determined by reference to the combined market interest rate, which is a weighted average of yields or rates on short-term instruments in the capital markets of the euro area, Japan, the United Kingdom, and the United States. The combined market interest rate is calculated each Friday, using the yields or rates of that day. The SDR interest rate, which is set equal to the combined market interest rate, enters into effect on the following Monday and applies through the following Sunday. The average SDR interest rate was 3.97 percent for the financial year ended April 30, 2007 (2.92 percent for the financial year ended April 30, 2006).

# Administrative expenses

The expenses of conducting the business of the SDR Department are paid by the IMF from the General Resources Account, which is reimbursed by the SDR Department at the end of each financial year. For this purpose, the SDR Department levies an assessment on all participants in proportion to their net cumulative allocations (SDR 1.0 million and SDR 1.2 million for the financial years ended April 30, 2007, and 2006, respectively).

# **Overdue obligations**

An allowance for losses resulting from overdue SDR obligations would be created if the IMF expected a loss to be incurred; no losses have been, or are expected to be, incurred.

# 3. Overdue assessments and charges

At April 30, 2007, assessments and charges amounting to SDR 40.5 million were overdue to the SDR Department (SDR 37.8 million at April 30, 2006). At April 30, 2007, two members were six months or more overdue in meeting their financial obligations to the SDR Department (three members were overdue as at April 30, 2006).

Assessments and charges due from members that are six months or more overdue to the SDR Department were as follows as of April 30:

|                                 | 2007        | 2006       |
|---------------------------------|-------------|------------|
|                                 | (In million | s of SDRs) |
| Total                           | 40.5        | 37.8       |
| Overdue for six months or more  | 39.0        | 36.8       |
| Overdue for three years or more | 34.5        | 33.5       |

The amount and duration of arrears as of April 30, 2007, were as follows:

|         | Total   | Longest overdue<br>obligation |
|---------|---------|-------------------------------|
|         | (In mil | llions of SDRs)               |
| Liberia | 28.1    | April 1986                    |
| Somalia | 12.4    | February 1991                 |
| Total   | 40.5    |                               |
|         |         |                               |

Schedule 1

# **Independent Auditors' Report**

To the Board of Governors of the International Monetary Fund Washington, DC

We have audited the accompanying combined balance sheets of the Poverty Reduction and Growth Facility and Exogenous Shocks Facility Trust (formerly known as Poverty Reduction and Growth Facility Trust) (the "Trust") as of April 30, 2007 and 2006, and the related combined statements of income and changes in resources and of cash flows for the years then ended. These combined financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on these combined financial statements based on our audits.

We conducted our audits in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the combined financial position of the Poverty Reduction and Growth Facility and Exogenous Shocks Facility Trust at April 30, 2007 and 2006, and the combined results of their operations and their cash flows for the years then ended in conformity with International Financial Reporting Standards.

Our audits were conducted for the purpose of forming an opinion on the basic combined financial statements taken as a whole. The supplemental schedules listed on pages 41 to 45 are presented for the purpose of additional analysis and are not a required part of the basic combined financial statements. These schedules are the responsibility of the Trust's management. Such schedules have been subjected to the auditing procedures applied in our audits of the basic combined financial financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic financial statements taken as a whole.

# Poverty Reduction and Growth Facility and Exogenous Shocks Facility Trust

Notes to the combined financial statements as at April 30, 2007, and 2006

# 1. Nature of operations

The Poverty Reduction and Growth Facility Trust (the PRGF Trust), for which the IMF is Trustee, was established in December 1987 to provide loans on concessional terms to qualifying low-income country members. Assistance under the Poverty Reduction and Growth Facility (PRGF) is made available under three-year arrangements in support of macroeconomic and adjustment programs. Effective January 5, 2006, the PRGF Trust was renamed the Poverty Reduction and Growth Facility and Exogenous Shocks Facility Trust (the Trust) to also support programs under the Exogenous Shocks Facility (ESF) to facilitate member countries' adjustment to sudden and exogenous shocks. Programs under the ESF range from one to two years.

The operations of the Trust are conducted through the Loan Account, the Reserve Account, and three Subsidy Accounts—the PRGF-ESF Subsidy Account, the PRGF Subsidy Account, and the ESF Subsidy Account. The resources of the Trust are held separately from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts. Combining balance sheets and statements of income and changes in resources for the Trust are provided in Note 12 of these financial statements.

#### Loan Account

The resources of the Loan Account consist of the proceeds from borrowings, repayments of principal, and interest payments on loans extended by the Trust.

#### **Reserve Account**

The resources of the Reserve Account consist of amounts transferred by the IMF from the Special Disbursement Account and net earnings from investment of resources held in the Reserve Account.

The resources held in the Reserve Account are to be used by the Trustee in the event that borrowers' principal repayments and interest payments, together with the authorized interest subsidy, are insufficient to repay loan principal and interest on borrowings of the Loan Account. The Trustee reviews the adequacy of the Reserve Account regularly to determine whether sufficient resources are available to meet all obligations to the lenders to the Loan Account.

#### Subsidy Accounts

The resources held in the Subsidy Accounts consist of bilateral contributions to the Trust, including transfers of net earnings from the PRGF Administered Accounts, resources transferred by the IMF from the Special Disbursement Account, and net earnings from investment of Subsidy Accounts resources.

The resources available in the Subsidy Accounts are drawn by the Trustee to pay the difference, with respect to each interest period, between the interest due from the borrowers under the Trust and the interest due on Loan Account borrowings. The resources in the PRGF Subsidy Account are earmarked for PRGF loans only, while the resources in the ESF Subsidy Account are earmarked for ESF loans only. The PRGF-ESF Subsidy Account can be used for both PRGF and ESF loans.

To the extent that resources in the PRGF-ESF Subsidy Account and the PRGF Subsidy Account are insufficient for PRGF subsidy operations, the Trustee will transfer to the PRGF Subsidy Account resources in the PRGF-HIPC Trust Account not earmarked for debt relief under the Heavily Indebted Poor Countries (HIPC) Initiative.

# 2. Summary of significant accounting policies

## Basis of accounting

The financial statements of the PRGF-ESF Trust are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices, as set out below, are in accordance with and comply with IFRS and have been applied consistently for all periods presented.

# Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors, such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

# Unit of account

The functional and presentation currency of the Trust is the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in November 2005, and the new composition of the SDR valuation basket became effective on January 1, 2006. The currencies in the basket as of April 30, 2007, and 2006 and their amounts were as follows:

| Currency       | Amount  |
|----------------|---------|
| Euro           | 0.4100  |
| Japanese yen   | 18.4000 |
| Pound sterling | 0.0903  |
| U.S. dollar    | 0.6320  |

As of April 30, 2007, one SDR was equal to 1.52418 U.S. dollars (one SDR was equal to 1.47106 U.S. dollars as of April 30, 2006).

#### Foreign currency translation

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rates. Exchange differences arising from the settlement of transactions at rates different from those at the originating date of the transaction and unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities are included in the determination of net income.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other highly liquid short-term investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

#### Investments

#### Financial assets at fair value through profit or loss

Investments are managed by external investment managers and their performance is measured on a fair value basis. The Trust has designated its investments in fixed-income securities, other than fixed-term deposits, as financial assets held at fair value through profit or loss. Such designation may be made only upon initial recognition and cannot subsequently be changed. The designated assets are carried at fair value on the balance sheet with the change in fair value included in the income statement in the period in which they arise.

#### Recognition

Investments are recognized on the trade date at which the Trust becomes a party to the contractual provisions of the instrument.

#### Derecognition

Investments are derecognized when the contractual rights to the cash flows from the asset expire, or in transactions where substantially all the risks and rewards of ownership of the investment are transferred.

#### Fair value measurement

The determination of the fair values of the investments, other than fixedterm deposits, is based on quoted market prices for financial instruments traded in active markets. The carrying amount of fixed-term deposits, which typically have maturities of 12 months or less, approximates the fair value.

#### Investment income

Investment income comprises interest income, realized gains and losses, and unrealized gains and losses, including currency valuation differences arising from exchange rate movements against the SDR.

#### Loans

Loans in the Trust are initially recorded at the amount disbursed provided that the present value of the cash flows from stated interest due and the

Subsidy Accounts is equal to or exceeds the disbursed amount. Thereafter, the carrying value of the loans is amortized cost.

PRGF and ESF loans are repayable in 5½ to 10 years in semiannual installments. Interest on loans accrues at the stated interest rate of ½ of 1 percent per annum. It is the Trust's policy to exclude from income interest on loans that are six months or more overdue. At each balance sheet date, the loans are reviewed to determine whether there is objective evidence of loan impairment. If any such evidence exists, an impairment loss is recognized to the extent that the present value of estimated future cash flows falls below the carrying amount.

#### Contributions

Contributions are reflected as increases in resources after the achievement of specified conditions and are subject to bilateral agreements stipulating how the resources are to be used.

#### Transfers

Internal transfers of resources within the Trust are accounted for under the accrual method of accounting.

#### Administrative costs

The expenses of conducting the activities of the Trust are paid by the General Resources Account of the IMF and reimbursed by the Special Disbursement Account with resources from the PRGF-ESF Trust Reserve Account when and to the extent needed for such reimbursement.

# Adoption of new International Financial Reporting Standards

In August 2005, the International Accounting Standards Board (IASB) issued a new standard, IFRS 7 "Financial Instruments: Disclosures," which requires enhanced quantitative and qualitative risk disclosures for all major categories of financial instruments. IFRS 7 will become effective for financial year 2008, and its implementation is not expected to have an impact on the PRGF-ESF Trust's financial position or results of operations.

#### 3. Financial risk management

In providing financial assistance to eligible country members and conducting its operations, the Trust is exposed to various types of risks, including credit, interest rate, exchange rate, and liquidity risks.

Credit risk refers to potential losses on credit outstanding owing to the inability, or unwillingness, of member countries to make loan repayments. To mitigate credit risk, the amounts that eligible member countries may borrow under a PRGF and ESF arrangement are limited to 140 percent (in exceptional cases up to 185 percent) and 50 percent (in exceptional cases in excess of this limit), respectively, of their IMF quotas. Disbursements under PRGF and ESF arrangements are linked to performance criteria, and the IMF, as Trustee, conducts periodic reviews to ensure that such criteria are met. To protect the lenders to the Trust, resources are accumulated in the Reserve Account and are available to repay the lenders in the event of delays in repayment or nonpayment by borrowers. Credit risk on investments represents the potential loss that the Trust may incur if the obligors or counterparties default on their contractual obligations. Credit risk is minimized by

limiting eligible investments to marketable securities rated AA or higher by a major credit rating agency, and for deposits, the Trust may invest in obligations issued by institutions with a credit rating of A or higher.

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. Interest rate risk on the Trust's investments is managed by limiting the investment portfolio to a weightedaverage effective duration that does not exceed three years.

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on the Trust's financial position and cash flows. Exchange rate risk on the Trust's investments is managed by investing in securities denominated in SDRs or in the constituent currencies, with the same composition, of the SDR valuation basket.

Liquidity risk is the risk of non-availability of resources to meet the Trust's financing needs and obligations. The Trust conducts semiannual reviews to determine the adequacy of the resources accumulated in the Subsidy and Reserve Accounts to meet liquidity needs. Resources in the Subsidy Accounts are expected to exceed estimated needs based on the present level of loans outstanding, and the balance in the Reserve Account is projected to increase until it reaches the level sufficient to cover all outstanding PRGF-ESF Trust obligations to lenders. Liquidity risk on investments is limited by investing in readily marketable obligations of international financial organizations and short- and medium-term government securities.

#### 4. Investments

Investments consisted of the following at April 30:

|                         | 2007        | 2006         |
|-------------------------|-------------|--------------|
|                         | (In thousan | nds of SDRs) |
| Fixed-term deposits     | 834,641     | 1,838,961    |
| Fixed-income securities | 4,055,626   | 3,043,434    |
| Total                   | 4,890,267   | 4,882,395    |
|                         |             |              |

The maturities of the investments are as follows at April 30:

|                  | 2007        | 2006         |
|------------------|-------------|--------------|
|                  | (In thousar | nds of SDRs) |
| Less than 1 year | 828,341     | 4,571,089    |
| 1–3 years        | 3,784,756   | 298,294      |
| 3–5 years        | 237,793     | 2,257        |
| Over 5 years     | 39,377      | 10,755       |
| Total            | 4,890,267   | 4,882,395    |
|                  |             |              |

#### 5. Loans receivable

Resources of the Loan Account of the PRGF-ESF Trust are committed to qualifying members for a three-year period, upon approval by the Trustee of three-year PRGF arrangements or ESF arrangements with durations of one to two years in support of the members' macroeconomic and structural adjustment programs. Interest on the outstanding loans, which is repayable in 10 equal semi-installments beginning 51/2 years after disbursement, is set at the rate of 1/2 of 1 percent per annum.

At April 30, 2007, and 2006, the resources of the Loan Account included cumulative advances from the Reserve Account of SDR 75 million resulting from the nonpayment of principal by Zimbabwe.

Scheduled repayments of loans by borrowers, including Zimbabwe's overdue obligations, are summarized below:

| Period of repayment, |
|----------------------|
| financial year       |
| ending April 30      |

|                 | (In thousands of SDRs) |
|-----------------|------------------------|
| 2008            | 383,844                |
| 2009            | 411,712                |
| 2010            | 471,306                |
| 2011            | 534,989                |
| 2012            | 566,473                |
| 2013 and beyond | 1,341,513              |
| Overdue         | 74,951                 |
| Total           | 3,784,788              |

As of April 30, 2007, scheduled repayments of loans include loans totaling SDR 834 million due from members that are potentially eligible for debt relief under the HIPC Initiative and the Multilateral Debt Relief Initiative (MDRI).

As of April 30, use of credit in the Trust by the largest users was as follows:

|                               | 20   | 07    | 200     | 06    |
|-------------------------------|--|-------|---------|-------|
|                               | (In millions of SDRs and percent of<br>total PRGF-ESF credit)<br>922.1 24.4% 975.1 25.5% |       |         |       |
| Largest user of credit        | 922.1  | 24.4% | 975.1   | 25.5% |
| Three largest users of credit | 1,792.3  | 47.4% | 1,811.7 | 47.4% |
| Five largest users of credit  | 2,085.9  | 55.1% | 2,139.2 | 56.0% |

The five largest users of credit as of April 30, 2007, in descending order, were Pakistan, the Democratic Republic of the Congo, Bangladesh, Georgia, and Kenya. Outstanding credit by member is provided in Schedule 1.

#### 6. Borrowings

The Trust borrows on such terms and conditions as agreed between the Trustee and the lenders. The weighted average interest rate on borrowings was 3.42 percent per annum for the financial year ended April 30, 2007 (2.38 percent per annum for the financial year ended April 30, 2006). The principal amounts of the borrowings are repayable between 51/2 and 16 years after the first drawing.

During the financial year ended April 30, 2007, the PRGF-ESF Trust made early repayments of SDR 368 million (SDR 1,438 million for the financial year ended April 30, 2006) to lenders following the repayment of Trust loans by members that received MDRI debt relief.

Scheduled repayments of borrowings are summarized below:

| Period of repayment, |
|----------------------|
| financial year       |
| ending April 30      |

|                 | (In thousands of SDRs) |
|-----------------|------------------------|
| 2008            | 5,341                  |
| 2009            | 595,071                |
| 2010            | 611,068                |
| 2011            | 594,531                |
| 2012            | 623,886                |
| 2013 and beyond | 1,954,938              |
| Total           | 4,384,835              |
|                 |                        |

The following summarizes the borrowing agreements concluded as of April 30:

|                                  | Amount undrawn         |                     |  |
|----------------------------------|------------------------|---------------------|--|
|                                  | 2007                   | 2006                |  |
|                                  | (In thousands of SDRs) |                     |  |
| Loan Account<br>Subsidy Accounts | 3,216,657<br>38,754    | 3,690,736<br>49,148 |  |

#### 7. Multilateral Debt Relief Initiative

Under the MDRI, effective January 5, 2006, the IMF administers resources to provide debt relief to Heavily Indebted Poor Countries (HIPCs) and non-HIPCs with annual per capita income of \$380 or less and to HIPCs with annual per capita income of more than \$380.

Qualifying members at or below the per capita income threshold receive grant assistance from the MDRI-I Trust, which was funded initially by resources transferred from the Special Disbursement Account (SDR 1.5 billion). Grant assistance to the HIPCs with per capita income above the threshold is provided from the MDRI-II Trust by resources contributed by individual members. The initial contributions to the MDRI-II Trust were received through the transfer of a portion of members' contributions to the PRGF-ESF Trust Subsidy Account (SDR 1.12 billion). Grant assistance from the MDRI Trusts (together with assistance under the HIPC Initiative) provides debt relief to cover the full stock of debt owed to the IMF (including the PRGF-ESF Trust) as of December 31, 2004, that remains outstanding at the time the member qualifies for such relief.

For the financial year ended April 30, 2007, four HIPC members upon reaching the completion point received MDRI grant assistance of SDR 189 million to settle GRA and PRGF-ESF Trust obligations of SDR 11 million and SDR 178 million, respectively. Since the IMF adopted the MDRI, 22 HIPC members and 2 non-HIPC members received grant assistance totaling SDR 2,692 million. The eligible debt covered by the grant assistance included GRA and PRGF-ESF Trust obligations of SDR 101 million and SDR 2,591 million, respectively. No impairment loss has been recognized in the Loan Account.

Since the stock of debt owed to the IMF as of December 31, 2004, decreases over time, the actual debt eligible for MDRI assistance for the remaining potentially eligible members depends on the timing of their completion points. The qualification of members for MDRI debt relief is reviewed periodically as progress by these members toward reaching the completion point under the HIPC Initiative is being made.

#### 8. Investment income

Investment income comprised the following for the financial years ended April 30:

|                                   | 2007        | 2006        |
|-----------------------------------|-------------|-------------|
|                                   | (In thousan | ds of SDRs) |
| Interest income                   | 180,626     | 161,763     |
| Realized (losses)/gains, net      | (3,128)     | 16,620      |
| Unrealized gains/(losses), net    | 7,406       | (37,848)    |
| Exchange rate gains/(losses), net | 69          | (128)       |
| Total                             | 184,973     | 140,407     |
|                                   |             |             |

#### 9. Contributions

The Trustee accepts contributions for the Subsidy Accounts of the PRGF-ESF Trust on such terms and conditions as agreed between the Trustee and the contributors. At April 30, 2007, cumulative contributions amounted to SDR 3,075 million (SDR 2,983 million as of April 30, 2006).

#### 10. Commitments under loan arrangements

An arrangement under the PRGF or ESF is a decision that gives a member the assurance that the IMF as Trustee stands ready to provide foreign exchange or SDRs during a specified period and up to a specified amount in accordance with the terms of the decision. At April 30, 2007, undrawn balances under 29 loan arrangements amounted to SDR 592 million (SDR 736 million under 27 arrangements at April 30, 2006).

#### 11. Related party transactions

For the financial years ended April 30, 2007, and 2006, the Executive Board of the IMF decided to forgo the reimbursement by the Trust to the General Resources Account for the cost of administering the Trust. Such reimbursement would have amounted to SDR 48 million and SDR 51 million, respectively.

The cumulative contributions to the Trust from the IMF, through the Special Disbursement Account, as of April 30, 2007, and 2006 were as follows:

|                  | 2007        | 2006        |
|------------------|-------------|-------------|
|                  | (In thousan | ds of SDRs) |
| Reserve Account  | 2,862       | 2,667       |
| Subsidy Accounts | 870         | 870         |
| Total            | 3,732       | 3,537       |

The PRGF-ESF Subsidy Account also receives contributions from member countries that had placed deposits in the Poverty Reduction and Growth Facility Administered Accounts at low interest rates. Net investment income transferred from the Poverty Reduction and Growth Facility Administered Accounts to the PRGF-ESF Subsidy Account amounted to SDR 0.05 million and SDR 0.1 million for the financial years ended April 30, 2007, and 2006, respectively.

## 12. Combining balance sheets and statements of income and changes in resources

The balance sheets and statements of income and changes in resources of the PRGF-ESF Trust are presented below:

Note 12

#### Poverty Reduction and Growth Facility and Exogenous Shocks Facility Trust Combining balance sheets as at April 30, 2007, and 2006

#### **Independent Auditors' Report**

To the Board of Governors of the International Monetary Fund Washington, DC

We have audited the accompanying balance sheets as of April 30, 2007 and 2006, and the related statements of income and changes in resources and of cash flows for the years then ended of the following entities:

Poverty Reduction and Growth Facility Administered Accounts (the "Accounts")

- Austria
- Indonesia
- Portugal

These financial statements are the responsibility of Accounts' management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Accounts' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Poverty Reduction and Growth Facility Administered Accounts at April 30, 2007 and 2006, and the results of their operations and their cash flows for the years then ended in conformity with International Financial Reporting Standards.

The accompanying notes are an integral part of these financial statements.

#### Poverty Reduction and Growth Facility Administered Accounts Notes to the financial statements for the years ended April 30, 2007, and 2006

#### 1. Nature of operations

At the request of certain member countries, the IMF established the Poverty Reduction and Growth Facility Administered Accounts ("PRGF Administered Accounts" or "Administered Accounts") for the benefit of the PRGF-ESF Subsidy Account of the PRGF-ESF Trust and PRGF-HIPC Trust Account. The IMF is the Trustee of each of the Administered Accounts. The Administered Accounts comprise deposits made by contributors. The difference between interest earned by the Administered Accounts and the interest payable on deposits is transferred to the PRGF-ESF Subsidy Account of the PRGF-ESF Trust and PRGF-HIPC Trust Account.

The resources of each Administered Account are held separately from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

#### 2. Summary of significant accounting policies

#### Basis of accounting

The financial statements of the Administered Accounts are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices, as set out below, are in accordance with and comply with IFRS and have been applied consistently for all periods presented.

#### Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors, such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Unit of account

The functional and presentation currency of the Administered Accounts is the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in November 2005 and the new composition of the SDR valuation basket became effective on January 1, 2006. The currencies in the basket as of April 30, 2007, and 2006 and their amounts were as follows:

| Currency       | Amount  |
|----------------|---------|
| Euro           | 0.4100  |
| Japanese yen   | 18.4000 |
| Pound sterling | 0.0903  |
| U.S. dollar    | 0.6320  |

As of April 30, 2007, one SDR was equal to 1.52418 U.S. dollars (1.47106 U.S. dollars as of April 30, 2006).

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other highly liquid short-term investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

#### Investments

Investments consist of fixed-term deposits and their carrying amount approximates the fair value.

#### Administrative costs

The expenses of conducting the activities of the Administered Accounts are incurred and borne by the General Resources Account of the IMF.

# Adoption of new International Financial Reporting Standards

In August 2005, the International Accounting Standards Board (IASB) issued a new standard, IFRS 7 "Financial Instruments: Disclosures," which requires enhanced quantitative and qualitative risk disclosures for all major categories of financial instruments. IFRS 7 will become effective for financial year 2008, and its implementation is not expected to have an impact on the PRGF Administered Accounts' financial position or results of operations.

#### 3. Financial risk management

In conducting their operations, the PRGF Administered Accounts are exposed to various types of risks, including interest rate and exchange rate risks.

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. Interest rate risk on the PRGF Administered Accounts' investments is managed by limiting the investment portfolio to a weighted-average effective duration that does not exceed three years.

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on the PRGF Administered Accounts' financial position and cash flows. Exchange rate risk on the

investments is managed by investing in securities denominated in SDRs, or in the constituent currencies, with the same composition of the SDR valuation basket.

#### 4. Investments

Investments consisted of fixed-term deposits with maturities of less than one year as of April 30, 2007, and 2006.

Investment income comprised the following for the financial years ended April 30:

|                        | 2007         | 2006       |
|------------------------|--------------|------------|
|                        | (In thousand | s of SDRs) |
| Interest income        | 1,062        | 888        |
| Realized gains, net    |              | 51         |
| Unrealized losses, net |              | (69)       |
| Total                  | 1,062        | 870        |

#### 5. Deposits

#### Austria

The Administered Account Austria was established on December 27, 1988, for the administration of resources deposited in the account by the Austrian National Bank. Two deposits (one of SDR 60.0 million made on December 30, 1988, and one of SDR 50.0 million made on August 10, 1995) were to be repaid in ten equal semiannual installments beginning five and one-half years after the date of each deposit and ending at the end of the tenth year after the date of each deposits. The deposits bore interest at a rate of ½ of 1 percent a year. Both deposits from Austria have been repaid in full and the Account was closed during the financial year ended April 30, 2006.

#### Indonesia

The Administered Account Indonesia was established on June 30, 1994, for the administration of resources deposited in the account by Bank Indonesia. The deposit, totaling SDR 25 million, is to be repaid in one installment 10 years after the date the deposit was made. The interest payable on the deposit is equivalent to that obtained for the investment of the deposit less 2 percent a year. Upon maturity in June 2004, the deposit was reinvested for another 10 years (according to the amendment of the instrument), and investment income of 2 percent per annum (or any lesser amount if investment returns are below 2 percent) is to be transferred to the PRGF-HIPC Trust.

#### Portugal

The Administered Account Portugal was established on May 16, 1994, for the administration of resources deposited in the account by the Banco de Portugal (BdP). The BdP has made six annual deposits, each of SDR 2.2 million. Each deposit is to be repaid in five equal annual installments beginning six years after the date of the deposit and will be completed at the end of the tenth year after the date of the deposit. Each deposit bears interest at a rate of  $\frac{1}{2}$  of 1 percent a year.

#### 6. Related-party transactions

The difference between the income earned by the Administered Accounts on the amounts invested and the interest payable on the deposits of the Administered Accounts, net of any cost, is contributed to the PRGF-ESF Subsidy Account of the PRGF-ESF Trust and PRGF-HIPC Trust. For the financial years ended April 30, 2007, and 2006, net investment income from the Administered Accounts to the PRGF-ESF Subsidy Account amounted to SDR 0.05 million and SDR 0.1 million, respectively; contributions to the PRGF-HIPC Trust amounted to SDR 0.5 million in each financial year.

#### **Independent Auditors' Report**

To the Board of Governors of the International Monetary Fund Washington, DC

We have audited the accompanying combined balance sheets of the Poverty Reduction and Growth Facility-Heavily Indebted Poor Countries Trust and Related Accounts (the "Trust") as of April 30, 2007 and 2006, and the related combined statements of income and changes in resources and of cash flows for the years then ended. These combined financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on these combined financial statements based on our audits.

We conducted our audits in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the combined financial position of the Poverty Reduction and Growth Facility-Heavily Indebted Poor Countries Trust and Related Accounts at April 30, 2007 and 2006, and the combined results of their operations and their cash flows for the years then ended in conformity with International Financial Reporting Standards.

Our audits were conducted for the purpose of forming an opinion on the basic combined financial statements taken as a whole. The supplemental schedules listed on pages 59 to 62 are presented for the purpose of additional analysis and are not a required part of the basic combined financial statements. These schedules are the responsibility of the Trust's management. Such schedules have been subjected to the auditing procedures applied in our audits of the basic combined financial financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic financial statements taken as a whole.

#### PRGF-HIPC Trust and Related Accounts Notes to the combined financial statements for the years ended April 30, 2007, and 2006

#### 1. Nature of operations

The Trust for Special PRGF Operations for the Heavily Indebted Poor Countries and for Interim PRGF Subsidy Operations (the PRGF-HIPC Trust or the Trust) and Related Accounts comprise the PRGF-HIPC Trust Account, the Umbrella Account for HIPC Operations, and the Post-SCA-2 Administered Account. The IMF is the Trustee of the Trust and the related accounts. The PRGF-HIPC Trust Account comprises three subaccounts: the PRGF-HIPC, PRGF, and HIPC subaccounts. Combining balance sheets and income statements and changes in resources for each of these accounts are provided in Note 10. Transactions between the above accounts are eliminated on combination in the combined balance sheets and combined income statements and changes in resources.

#### **PRGF-HIPC Trust**

The PRGF-HIPC Trust was established on February 4, 1997, to provide balance of payments assistance to low-income developing members by making grants or loans to eligible members for the purpose of reducing their external debt burden and for interim PRGF subsidy purposes. The resources of the PRGF-HIPC Trust are held separately from the assets of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

The operations of the PRGF-HIPC Trust are conducted through the PRGF-HIPC Trust Account and the Umbrella Account for HIPC Operations.

#### PRGF-HIPC Trust Account and related accounts

The resources of the PRGF-HIPC Trust Account consist of grant contributions, borrowings, and other types of investments made by contributors; amounts transferred by the IMF from the Special Disbursement Account (SDA); and net earnings from investment of resources held in the PRGF-HIPC Trust Account.

The PRGF-HIPC subaccount holds resources that can finance either HIPC operations or interim PRGF subsidy operations; the PRGF subaccount holds resources earmarked for interim PRGF subsidy operations; and the HIPC subaccount holds resources earmarked for HIPC operations. PRGF-HIPC subaccount resources used to finance HIPC operations through the HIPC subaccount gave rise to interest-bearing balances between the two subaccounts, which were eliminated following the MDRI-related transfers (Note 8).

The resources held in the PRGF-HIPC Trust Account are to be used by the Trustee to make grants or loans to eligible members that qualify for assistance under the HIPC Initiative and for subsidizing the interest rate on interim PRGF operations to PRGF-eligible members.

#### Umbrella Account for HIPC Operations

The Umbrella Account for HIPC Operations (the Umbrella Account) receives and administers the proceeds of grants or loans made to

eligible members that qualify for assistance under the terms of the PRGF-HIPC Trust. Within the Umbrella Account, resources received are administered through the establishment of subaccounts for each eligible member upon the approval of disbursements under the PRGF-HIPC Trust.

The resources of a subaccount of the Umbrella Account consist of (1) amounts disbursed from the PRGF-HIPC Trust Account as grants or loans for the benefit of a member, and (2) net earnings from investment of the resources held in the subaccount.

The resources held in a subaccount of the Umbrella Account are to be used to repay the member's existing debt to the IMF (including as Trustee) in accordance with the schedule for using the proceeds of the Trust grants or loans agreed by the Trustee and the member.

#### Post-SCA-2 Administered Account

The Post-SCA-2 Administered Account, which is administered by the IMF on behalf of members, was established on December 8, 1999, for the temporary administration of resources transferred by members following the termination of the second Special Contingent Account (SCA-2) in the General Department of the IMF, prior to the final disposition of those resources.

Resources received from a member's cumulative SCA-2 contributions, together with the member's pro rata share of investment returns, shall be transferred to the PRGF-HIPC Trust or to the member, in accordance with the member's instructions. The assets held in the Post-SCA-2 Administered Account are held separately from the assets and property of all other accounts of, or administered by, the IMF and may not be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

#### 2. Summary of significant accounting policies

#### Basis of accounting

The financial statements of the PRGF-HIPC Trust and Related Accounts are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices, as set out below, are in accordance with and comply with IFRS and have been applied consistently for all periods presented.

#### Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors, such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Unit of account

The functional and presentation currency of the PRGF-HIPC Trust and related accounts is the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in November 2005 and the new composition of the SDR valuation basket became effective on January 1, 2006. The currencies in the basket as of April 30, 2007, and 2006 and their amounts were as follows:

| Currency       | Amount  |
|----------------|---------|
| Euro           | 0.4100  |
| Japanese yen   | 18.4000 |
| Pound sterling | 0.0903  |
| U.S. dollar    | 0.6320  |

As of April 30, 2007, one SDR was equal to 1.52418 U.S. dollars (one SDR was equal to 1.47106 U.S. dollars as of April 30, 2006).

#### Foreign currency translation

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rates. Exchange differences arising from the settlement of transactions at rates different from those at the originating date of the transaction and unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities are included in the determination of net income.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other highly liquid short-term investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

#### Investments

#### Financial assets at fair value through profit or loss

Investments are managed by external investment managers and their performance is measured on a fair value basis. The Trust has designated its investments in fixed-income securities, other than fixed-term deposits, as financial assets held at fair value through profit or loss. Such designation may be made only upon initial recognition and cannot subsequently be changed. The designated assets are carried at fair value on the balance sheet with the change in fair value included in the income statement in the period in which they arise.

#### Recognition

Investments are recognized on the trade date at which the Trust becomes a party to the contractual provisions of the instrument.

#### Derecognition

Investments are derecognized when the contractual rights to the cash flows from the asset expire, or in transactions where substantially all the risks and rewards of ownership of the investment are transferred.

#### Fair value measurement

The determination of the fair values of the investments, other than fixedterm deposits, is based on quoted market prices for financial instruments traded in active markets. The carrying amount of fixed-term deposits, which typically have maturities of 12 months or less, approximates the fair value.

#### Investment income

Investment income comprises interest income, realized gains and losses, and unrealized gains and losses, including currency valuation differences arising from exchange rate movements against the SDR.

#### Contributions

Bilateral contributions are reflected as increases in resources and are subject to bilateral agreements stipulating how the resources are to be used.

#### Administrative costs

The expenses of conducting activities of the Trust and related accounts were paid for by the General Resources Account of the IMF.

#### Adoption of new International Financial Reporting Standards

In August 2005, the International Accounting Standards Board (IASB) issued a new standard, IFRS 7 "Financial Instruments: Disclosures," which requires enhanced quantitative and qualitative risk disclosures for all major categories of financial instruments. IFRS 7 will become effective for financial year 2008, and its implementation is not expected to have an impact on the PRGF-HIPC Trust and Related Accounts' financial position or results of operations.

#### 3. Financial risk management

In providing financial assistance to eligible country members and conducting its operations, the Trust is exposed to various types of risks, including interest rate and exchange rate risks.

Credit risk on investment represents the potential loss that the Trust may incur if the obligors or counterparties default on their contractual obligations. Credit risk is managed by limiting eligible investments to marketable securities rated AA or higher by a major credit rating agency, and for deposits, the Trust may invest only in obligations issued by institutions with a credit rating of A or higher.

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. Interest rate risk on the Trust's investments is managed by limiting the investment portfolio to a weightedaverage effective duration that does not exceed three years.

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on the Trust's financial position and cash flows. Exchange rate risk on the Trust's investments is managed by investing in securities denominated in SDRs or in the constituent currencies, with the same composition, of the SDR valuation basket.

#### 4. Investments

Investments consisted of the following at April 30:

|                         | 2007        | 2006        |
|-------------------------|-------------|-------------|
|                         | (In thousan | ds of SDRs) |
| Fixed-term deposits     | 772,517     | 897,128     |
| Fixed-income securities | 315,700     | —           |
| Total                   | 1,088,217   | 897,128     |

The maturities of the investments are as follows at April 30:

|                  | 2007                   | 2006    |  |  |  |
|------------------|------------------------|---------|--|--|--|
|                  | (In thousands of SDRs) |         |  |  |  |
| Less than 1 year | 423,940                | 897,128 |  |  |  |
| 1–3 years        | 587,947                | _       |  |  |  |
| 3–5 years        | 53,377                 | _       |  |  |  |
| 5–10 years       | 22,953                 | —       |  |  |  |
| Total            | 1,088,217              | 897,128 |  |  |  |
|                  |                        |         |  |  |  |

#### 5. Borrowings

The Trust borrows on such terms and conditions as agreed between the Trust and the lenders. Interest rates on borrowings at April 30, 2007, and 2006 varied between 0 percent and 2 percent a year. The principal amounts of the borrowings are repayable in one installment at their maturity dates. Scheduled repayments of borrowings are summarized below:

#### Financial year ending April 30

|                 | (In thousands of SDRs) |
|-----------------|------------------------|
| 2008            | 20,066                 |
| 2009            | 25,000                 |
| 2010            | 288,926                |
| 2011            | 70,842                 |
| 2012            | 26,090                 |
| 2013 and beyond | 190,599                |
| Total           | 621,523                |
|                 |                        |

There were no new borrowings, net of the effect of foreign currency fluctuations, during the financial years ended April 30, 2007, and 2006. Repayments for the financial year ended April 30, 2007 amounted to SDR 0.3 million (none for the financial year ended April 30, 2006).

#### 6. Multilateral Debt Relief Initiative

Effective January 5, 2006, the IMF adopted the Multilateral Debt Relief Initiative (MDRI) to provide debt relief to qualifying Heavily Indebted Poor Countries (HIPCs) and non-HIPC members with an annual per capita income of \$380 or less and to qualifying HIPCs with an annual per capita income of more than \$380, and for this purpose established the MDRI-I and MDRI-II Trusts, respectively. Grant assistance from the MDRI Trusts (together with assistance under the HIPC Initiative) provides debt relief to cover the full stock of debt owed to the IMF (including the PRGF-ESF Trust) as of December 31, 2004, that remains outstanding at the time the member qualifies for such relief.

For the financial year ended April 30, 2007, four HIPC members upon reaching the completion point received Multilateral Debt Relief Initiative (MDRI) grant assistance of SDR 189 million, of which SDR 67 million was disbursed from the PRGF-HIPC Trust.

For the year ended April 30, 2006, 18 HIPC members and 2 non-HIPC members received MDRI grant assistance of SDR 2,503 million, of which SDR 330 million was disbursed as HIPC Initiative Assistance from the PRGF-HIPC Trust. Since the IMF adopted the MDRI, eligible debt covered by the grant assistance under the MDRI and the HIPC Initiative included GRA and PRGF-ESF Trust obligations of SDR 101 million and SDR 2,591 million, respectively.

Since the stock of debt owed to the IMF as of December 31, 2004, decreases over time, the actual debt eligible for MDRI assistance for the remaining potentially eligible members depends on the timing of their completion points. The IMF periodically reviews the qualification of members for MDRI debt relief as these members make progress toward reaching the completion point under the HIPC Initiative.

#### 7. Investment income

Investment income comprised the following for the financial years ended April 30:

|                          | 2007         | 2006        |
|--------------------------|--------------|-------------|
|                          | (In thousand | ds of SDRs) |
| Interest income          | 46,406       | 33,489      |
| Realized losses, net     | (1,862)      | (15,865)    |
| Unrealized gains, net    | 709          | 14,720      |
| Exchange rate gains, net | 6            | 1           |
| Total                    | 45,259       | 32,345      |

#### 8. Transfers receivable and payable

The HIPC subaccount had been accumulating a negative balance to the PRGF-HIPC subaccount arising from past disbursements under the HIPC Initiative. Following the MDRI-related transfers during the financial year ended April 30, 2006, the inter-subaccount balance of SDR 1,182 million, including accrued interest, was eliminated.

#### 9. Related-party transactions

The expenses of conducting the business of the Trust were paid by the General Resources Account of the IMF.

Cumulative transfers from the SDA of the IMF to the PRGF-HIPC Trust amounted to SDR 1,167 million as of April 30, 2007, and 2006. The PRGF-HIPC Trust also receives contributions from member countries that had placed deposits in the Poverty Reduction and Growth Facility Administered Accounts. Net investment income transferred from the Poverty Reduction and Growth Facility Administered Account to the PRGF-HIPC Trust amounted to SDR 0.5 million each for the financial years ended April 30, 2007, and 2006.

# 10. Combining balance sheets and statements of income and changes in resources

The balance sheets and statements of income and changes in resources for the accounts and subaccounts in the PRGF-HIPC Trust and Related Accounts are presented below.

|                                 |           |                      |                                       | -          |                        |                                     |           |                    |                     |                            |           |
|---------------------------------|-----------|----------------------|---------------------------------------|------------|------------------------|-------------------------------------|-----------|--------------------|---------------------|----------------------------|-----------|
|                                 |           |                      |                                       | (In thousa | (In thousands of SDRs) |                                     |           |                    |                     |                            |           |
|                                 |           |                      |                                       | 2007       |                        |                                     |           |                    | 20                  | 2006                       |           |
|                                 |           | Umk                  | Umbrella                              |            |                        |                                     |           |                    | Umbrella            |                            |           |

#### **Independent Auditors' Report**

To the Board of Governors of the International Monetary Fund Washington, DC

We have audited the accompanying balance sheets of the Multilateral Debt Relief Initiative-II Trust (the "Trust") as of April 30, 2007 and 2006, and related statements of income and changes in resources and cash flows for the years then ended. These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Multilateral Debt Relief Initiative-II Trust at April 30, 2007 and 2006, and the results of their operations and their cash flows for the years then ended in conformity with International Financial Reporting Standards.

The accompanying notes are an integral part of these financial statements.

#### Multilateral Debt Relief Initiative-II Trust Notes to the financial statements for the years ended April 30, 2007, and 2006

#### 1. Nature of operations

Effective January 5, 2006, the IMF adopted the Multilateral Debt Relief Initiative (MDRI) to provide full debt relief to qualifying low-income countries. For this purpose, the IMF established the Multilateral Debt Relief Initiative-I (MDRI-I) Trust and the Multilateral Debt Relief Initiative-II (MDRI-II) Trust. The IMF acts as Trustee for both trusts.

Under the MDRI, the IMF provides debt relief to HIPC and non-HIPC members with annual per capita income of \$380 or less and to HIPCs with annual per capita income of more than \$380. Qualifying members at or below the per capita income threshold receive grant assistance from the MDRI-I Trust, which was initially funded by resources transferred from the Special Disbursement Account (SDR 1.5 billion). Grant assistance to the remaining HIPC members with per capita income above the threshold is provided from the MDRI-II Trust by resources contributed by individual members. The initial contributions to the MDRI-II Trust were received through the transfer of a portion of members' contributions to the PRGF-ESF Trust Subsidy Account (SDR 1.12 billion). Grant assistance from the MDRI Trusts (together with assistance under the HIPC Initiative) provides debt relief to cover the full stock of debt owed to the IMF (including the PRGF-ESF Trust) as of December 31, 2004, that remains outstanding at the time the member qualifies for such relief.

#### 2. Summary of significant accounting policies

#### Basis of accounting

The financial statements of the MDRI-II Trust (the Trust) are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices, as set out below, are in accordance with and comply with IFRS and have been applied consistently for all periods presented.

#### Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, such as accrued MDRI grant assistance, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors, such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Unit of account

The functional and presentation currency of the MDRI-II Trust is the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the SDR valuation basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in November 2005, and the new composition of the SDR valuation basket became effective on January 1, 2006. The currencies in the basket as of April 30, 2007, and 2006 and their amounts were as follows:

| Currency       | Amount  |
|----------------|---------|
| Euro           | 0.4100  |
| Japanese yen   | 18.4000 |
| Pound sterling | 0.0903  |
| U.S. dollar    | 0.6320  |

As of April 30, 2007, one SDR was equal to 1.52418 U.S. dollars (one SDR was equal to 1.47106 U.S. dollars as of April 30, 2006).

#### Foreign currency translation

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rates. Exchange differences arising from the settlement of transactions at rates different from those at the originating date of the transaction and unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities are included in the determination of net income.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other highly liquid short-term investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

#### Investments

Investments are made in fixed-term deposits. For these deposits, the Trust may invest only in obligations issued by institutions with a credit rating of A and above. The carrying amount of fixed-term deposits, which typically have maturities of 12 months or less, approximates the fair value. The Trust may also invest in obligations issued by an agency of a government and a multilateral organization with a minimum credit rating of AA.

Investment income comprises interest income and currency valuation differences arising from exchange rate movements against the SDR.

#### Contributions

Contributions are reflected as increases in resources and are subject to bilateral agreements stipulating how the resources are to be used.

#### Administrative costs

The expenses of conducting the business of the MDRI-II Trust were paid by the General Resources Account of the IMF.

# Adoption of new International Financial Reporting Standards

In August 2005, the International Accounting Standards Board (IASB) issued a new standard, IFRS 7 "Financial Instruments: Disclosures," which requires enhanced quantitative and qualitative risk disclosures for all major categories of financial instruments. IFRS 7 will become effective for financial year 2008, and its implementation is not expected to have an impact on the MDRI-II Trust's financial position or results of operations.

#### 3. Financial risk management

In providing grant assistance to eligible country members and conducting its operations, the Trust is exposed to various types of risks, including exchange rate and liquidity risks.

Exchange rate risk is the exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on the Trust's financial position and cash flows. Exchange rate risk on the Trust's investments is managed by investing in securities denominated in SDRs or in the constituent currencies, with the same composition, of the SDR valuation basket.

Liquidity risk is the risk of non-availability of resources to meet the Trust's obligations. The IMF, as trustee, conducts periodic reviews to determine the adequacy of the resources accumulated to meet liquidity needs.

#### 4. Investments and investment income

Investments at April 30, 2007, and 2006, consisted of fixed-term deposits maturing in one year or less. Investment income for the financial year ended April 30, 2007, and from inception to April 30, 2006, comprised interest income of SDR 1.68 million, and interest income of SDR 2.19 million and exchange rate losses of SDR 0.04 million, respectively.

#### 5. MDRI grant assistance

For the financial year ended April 30, 2007, four HIPC members upon reaching the completion point received MDRI grant assistance of SDR 189 million, of which SDR 30 million was disbursed from the MDRI-II Trust. From inception to April 30, 2006, 18 HIPC members and 2 non-HIPC members received MDRI grant assistance of SDR 2,503 million, of which SDR 1,053 million was disbursed from the MDRI-II Trust.

MDRI grant assistance to the remaining eligible members is subject to the availability of resources and is accrued when it is probable that a liability has been incurred and the amount of such grant assistance can be reasonably estimated. The amount of liability recorded (SDR 32 million and SDR 69 million as of April 30, 2007, and 2006, respectively) is based on the evaluation of currently available facts with respect to each individual eligible member and includes factors such as progress made toward reaching the completion point under the HIPC Initiative, and the capacity to meet the macroeconomic performance and other objective criteria after reaching the completion point. As the qualification of members for MDRI debt relief is assessed, the amounts recorded are reviewed periodically and adjusted to reflect additional information that becomes available.

The reconciliation of accrued MDRI grant assistance for the financial year ended April 30, 2007, and from inception to April 30, 2006, is as follows:

|                          | Financial year<br>2007 | Inception to<br>April 30, 2006 |
|--------------------------|------------------------|--------------------------------|
|                          | (In million            | ns of SDRs)                    |
| Beginning of year/period | 69                     | _                              |
| Additions                | 1                      | 218                            |
| Amounts utilized         | (30)                   | (149)                          |
| Reversals                | (8)                    | —                              |
| End of the year/period   | 32                     | 69                             |

#### **Independent Auditors' Report**

To the Board of Governors of the International Monetary Fund Washington, DC

We have audited the accompanying balance sheets as of April 30, 2007 and 2006, and the related statements of income and changes in resources and of cash flows for the years then ended of the following entities:

Other Administered Accounts (the "Accounts")

- Administered Account Japan
- Administered Account for Selected Fund Activities Japan
- Framework Administered Account for Technical Assistance Activities
- Supplementary Financing Facility Subsidy Account
- The Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account
- Administered Account Austria-II

These financial statements are the responsibility of Accounts' management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with International Standards on Auditing and auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Accounts' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Other Administered Accounts at April 30, 2007 and 2006, and the results of their operations and their cash flows for the years then ended in conformity with International Financial Reporting Standards.

Other Administered Accounts

#### Other Administered Accounts Notes to the financial statements for the years ended April 30, 2007, and 2006

#### 1. Nature of operations

At the request of members, the IMF has established special-purpose accounts to administer contributed resources and to perform financial and technical services consistent with the purposes of the IMF. The IMF is the Trustee of each account. The assets of each account and each subaccount are separate from the assets of all other accounts of, or administered by, the IMF and are not to be used to discharge liabilities or to meet losses incurred in the administration of other accounts.

#### Administered Account Japan

At the request of Japan, the IMF established an account on March 3, 1989, to administer resources made available by Japan or other countries with Japan's concurrence that are to be used to assist certain members with overdue obligations to the IMF. The resources of the account are to be disbursed in amounts specified by Japan and to members designated by Japan.

# Administered Account for Selected Fund Activities—Japan

At the request of Japan, the IMF established the Administered Technical Assistance Account—Japan on March 19, 1990, to administer resources contributed by Japan to finance technical assistance to member countries. On July 21, 1997, the account was renamed the Administered Account for Selected Fund Activities—Japan and amended to include the administration of resources contributed by Japan in support of the IMF's Regional Office for Asia and the Pacific (OAP). The resources of the account designated for technical assistance activities are used with the approval of Japan and include the provision of scholarships. The resources designated for the OAP are used as agreed between Japan and the IMF for certain activities of the IMF with respect to Asia and the Pacific through the OAP. Disbursements can also be made from the account to the General Resources Account to reimburse the IMF for qualifying technical assistance projects and OAP expenses.

## Framework Administered Account for Technical Assistance Activities

The Framework Administered Account for Technical Assistance Activities (the Framework Account) was established by the IMF on April 3, 1995, to receive and administer contributed resources that are to be used to finance technical assistance consistent with the purposes of the IMF. The financing of technical assistance activities is implemented through the establishment and operation of subaccounts within the Framework Account. Resources are to be used in accordance with the written understandings between the contributor and the Managing Director. Disbursements can also be made from the Framework Account to the General Resources Account to reimburse the IMF for its costs incurred on behalf of technical assistance activities financed by resources from the Framework Account. As of April 30, 2007, the Framework Account comprised the following subaccounts:

#### Japan Advanced Scholarship Program Subaccount

At the request of Japan, this subaccount was established on June 6, 1995, to finance the cost of studies and training of nationals of member countries in macroeconomics and related subjects at selected universities and institutions. The scholarship program focuses primarily on the training of nationals of Asian member countries, including Japan.

Rwanda—Macroeconomic Management Capacity Subaccount

At the request of Rwanda, this subaccount was established on December 20, 1995, to finance technical assistance to rehabilitate and strengthen Rwanda's macroeconomic management capacity.

#### Australia—IMF Scholarship Program for Asia Subaccount

At the request of Australia, this subaccount was established on June 5, 1996, to finance the cost of studies and training of government and central bank officials in macroeconomic management so as to enable them to contribute to their countries' achievement of sustainable economic growth and development. The program focuses primarily on the training of nationals of Asian countries.

#### Switzerland Technical Assistance Subaccount

At the request of Switzerland, this subaccount was established on August 27, 1996, to finance the costs of technical assistance activities of the IMF that consist of policy advice and training in macroeconomic management.

#### French Technical Assistance Subaccount

At the request of France, this subaccount was established on September 30, 1996, to cofinance the costs of training in economic fields for nationals of certain member countries.

#### Denmark Technical Assistance Subaccount

At the request of Denmark, this subaccount was established on August 25, 1998, to finance the costs of technical assistance activities of the IMF that consist of advising on policy and administrative reforms in the fiscal, monetary, and related statistical fields.

#### Australia Technical Assistance Subaccount

At the request of Australia, this subaccount was established on March 7, 2000, to finance the costs of technical assistance activities of the IMF that consist of advising on the design of policy and administrative reforms in the fiscal, monetary, and related statistical fields, as well as to provide training in the formulation and implementation of macroeconomic and financial policies.

#### The Netherlands Technical Assistance Subaccount

At the request of the Netherlands, this subaccount was established on July 27, 2000, to finance projects that seek to enhance the capacity of

members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### The United Kingdom Department for International Development (DFID) Technical Assistance Subaccount

At the request of the United Kingdom, this subaccount was established on June 29, 2001, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### Italy Technical Assistance Subaccount

At the request of Italy, this subaccount was established on November 16, 2001, to finance projects that seek to enhance the capacity of certain members to formulate and implement policies related to fiscal, financial, and statistical standards and codes, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### Pacific Financial Technical Assistance Centre Subaccount

At the request of Australia and New Zealand, this subaccount was established on May 22, 2002, to finance activities of the Pacific Financial Technical Assistance Centre that seek to enhance the capacity of Pacific island countries and territories to formulate and implement policies related to macroeconomic, fiscal, monetary, financial, and statistical fields, including training and activities that strengthen the legal and administrative frameworks in these core areas.

#### Africa Regional Technical Assistance Centers Subaccount

At the request of France, Germany, Italy, the Netherlands, Norway, Sweden, and the United Kingdom, this subaccount was established on August 9, 2002, to finance activities of the Africa Regional Technical Assistance Centers that seek to support the Poverty Reduction Strategy Paper process in sub-Saharan African countries by fostering the capacity for sound macroeconomic management, strong fiscal institutions and financial systems, and timely and accurate collection and dissemination of economic data, including training and activities that strengthen the legal and administrative frameworks in these core areas. The resources of this subaccount are contributed by the above governments and other governments or official agencies, including those of China, Luxembourg, the Russian Federation, and Switzerland, that reached an understanding with the IMF subsequent to the subaccount's establishment.

#### Sweden Technical Assistance Subaccount

At the request of Sweden, this subaccount was established on November 25, 2002, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### China Technical Assistance Subaccount

At the request of the People's Republic of China, this subaccount was established on May 23, 2003, to finance projects that seek to enhance

the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### Technical Assistance Subaccount for Iraq

At the request of Australia, Canada, Italy, and the United Kingdom, this subaccount was established on July 22, 2003, to finance technical assistance activities that seek to enhance the capacity of Iraq to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and activities that strengthen the legal and administrative frameworks in these core areas. The resources of this subaccount are contributed by the above governments and the Government of Sweden, which reached an understanding with the IMF subsequent to the subaccount's establishment.

#### Canada Technical Assistance Subaccount

At the request of Canada, this subaccount was established on January 28, 2004, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### Middle East Regional Technical Assistance Center Subaccount

At the request of France and Lebanon, this subaccount was established on August 20, 2004, to finance the technical assistance activities of the Middle East Regional Technical Assistance Center (METAC). METAC seeks to support the efforts of the participating countries/territories to achieve effective macroeconomic management, strong fiscal institutions and financial systems, and timely and accurate collection and dissemination of economic data, including training and activities that strengthen the legal and administrative frameworks in these areas. The current METAC's participating countries/territories include the Islamic Republic of Afghanistan, Iraq, Jordan, Lebanon, the Socialist People's Libyan Arab Jamahiriya, Sudan, the Syrian Arab Republic, West Bank and Gaza, and the Republic of Yemen. The resources of this subaccount are contributed by the above governments and other governments or official agencies, including Egypt and Kuwait, that reached an understanding with the IMF subsequent to the subaccount's establishment.

#### Technical Assistance Subaccount to Support Macroeconomic and Financial Policy Formulation and Management

At the request of Norway, this subaccount was established on September 29, 2004, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas. The activities to be financed from the subaccount will seek in the first instance to enhance the capacity of Poverty Reduction and Growth Facility—eligible countries to formulate and implement the strategies needed to achieve the goals described in their Poverty Reduction Strategy Papers in those core areas of competence of the Fund, including strengthening their anti-money-laundering and combating-the-financing-of-terrorism legislation and implementation capacity, and improving central bank functions and operations in lowincome countries.

#### Spain Technical Assistance Subaccount

At the request of Spain, this subaccount was established on March 2, 2005, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### European Commission Technical Assistance Subaccount for the Middle East Regional Technical Assistance Center

At the request of the European Commission, this subaccount was established on June 13, 2005, to finance technical assistance activities of the Middle East Regional Technical Assistance Center.

#### European Investment Bank Technical Assistance Subaccount

At the request of the European Investment Bank, this subaccount was established on June 29, 2005, to finance projects that seek to enhance the capacity of members to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### Central Africa Regional Technical Assistance Center Subaccount

At the request of France, this subaccount was established on November 10, 2006, to finance the technical assistance activities of the Central Africa Regional Technical Assistance Center (Central AFRITAC) that seek to enhance the capacity of members in the sub-Saharan African region to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs, seminars, and projects that strengthen the legal and administrative frameworks in these core areas.

#### Islamic Development Bank Technical Assistance Subaccount

At the request of the Islamic Development Bank, this subaccount was established on March 30, 2007, to provide financing for projects that seek to enhance the capacity of members of the IMF that are also members of the Islamic Development Bank. The resources of the subaccount will be used for projects to formulate and implement policies in the macroeconomic, fiscal, monetary, financial, and related statistical fields, including training programs and projects that strengthen the legal and administrative frameworks in these core areas.

#### Supplementary Financing Facility Subsidy Account

The Supplementary Financing Facility Subsidy Account administered by the IMF was established in December 1980 to assist low-income developing country members to meet the costs of using resources made available through the IMF's Supplementary Financing Facility and under the policy on exceptional access. All repurchases due under these policies were scheduled for completion by January 31, 1991, and the final subsidy payments were approved in July 1991. However, two members (Liberia and Sudan) overdue in the payment of charges remain eligible to receive previously approved subsidy payments of SDR 2.2 million when their overdue charges are settled. Accordingly, the account remains in operation and has retained amounts for payment to these members after the overdue charges are paid.

#### The Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account

The Post-Conflict Emergency Assistance Subsidy Account for PRGF-eligible members was established in May 2001 to administer contributed resources for the purpose of providing assistance to PRGF-eligible members in support of their adjustment efforts. The account was amended on January 21, 2005, to provide for the subsidization of emergency assistance for natural disasters for PRGF-eligible members. Contributions to this account will be used to provide grants to PRGF-eligible members that have made post-conflict and natural disaster emergency assistance purchases in the General Resources Account of the IMF, effectively subsidizing the basic rate of charge on these purchases to ½ of 1 percent per annum. The subsidy to each eligible member will be prorated if resources are insufficient to reduce the basic rate of charge to ½ of 1 percent.

#### Austria-II Administered Account

At the request of the Austrian National Bank, the IMF established this account on April 3, 2006, to provide resources to subsidize charges on purchases under the policy on emergency assistance for natural disasters ("ENDA") by PRGF-eligible countries. The account had no assets or liabilities as of April 30, 2006. The Austrian National Bank made a deposit of SDR 7 million on May 2, 2006, for a period of five years at an interest rate of ½ of 1 percent per annum. The resources in the account are to be invested, and the difference between the investment earnings and the interest due on the deposit is to be transferred to the ENDA subaccount of the Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account for PRGF-eligible members.

#### 2. Summary of significant accounting policies

#### Basis of accounting

The financial statements of the Other Administered Accounts are prepared in accordance with International Financial Reporting Standards (IFRS). Specific accounting principles and disclosure practices, as set out below, are in accordance with and comply with IFRS and have been applied consistently for all periods presented.

#### Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors, such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Unit of account

#### Administered Account Japan and Administered Account for Selected Fund Activities—Japan, Framework Administered Account for Technical Assistance Activities

The functional and presentation currency of these accounts is the U.S. dollar. All transactions and operations of these accounts, including the transfers to and from the accounts, are denominated in U.S. dollars, except for transactions and operations in respect of the OAP, which are denominated in Japanese yen, or transactions in other currencies as agreed between Japan and the IMF. Contributions denominated in other currencies are converted into U.S. dollars upon receipt of the funds.

#### Supplementary Financing Facility Subsidy Account, Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account, and Austria-II Administered Account

The functional and presentation currency of these accounts is the SDR. The value of the SDR is determined by the IMF each day by summing the values in U.S. dollars, based on market exchange rates, of the currencies in the basket. The IMF reviews the SDR valuation basket every five years. The latest review was completed in November 2005 and the composition of the SDR valuation basket became effective from January 1, 2006. The currencies in the basket as of April 30, 2007, and 2006 and their amounts were as follows:

| Currency       | Amount  |
|----------------|---------|
| Euro           | 0.4100  |
| Japanese yen   | 18.4000 |
| Pound sterling | 0.0903  |
| U.S. dollar    | 0.6320  |

As of April 30, 2007, one SDR was equal to 1.52418 U.S. dollars (one SDR was equal to 1.47106 U.S. dollars as of April 30, 2006).

Transactions and operations of the accounts are denominated in SDRs. Contributions denominated in other currencies are converted into SDRs upon receipt of the funds.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other highly liquid short-term investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

#### Investments

As at April 30, 2007, the investments in the Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account and Administered Account Austria-II consisted of short-term fixed-term deposits with maturities of less than one year. The carrying amount of these fixed-term deposits approximates the fair value.

#### Contributions

Bilateral contributions are reflected as increases in resources after the achievement of specified conditions and are subject to bilateral agreements stipulating how the resources are to be used.

#### Payments to and on behalf of beneficiaries

Payments to and on behalf of beneficiaries are recognized when the specified conditions in the respective agreements are achieved.

#### Transfers

Internal transfers of resources within the IMF are accounted for under the accrual method of accounting.

#### Foreign currency translation

Foreign currency transactions are recorded at the rate of exchange on the date of the transaction. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are reported using the closing exchange rates. Exchange differences arising from the settlement of transactions at rates different from those at the date of the transactions and unrealized foreign exchange differences on unsettled foreign currency monetary assets and liabilities are included in the determination of net income.

#### Administrative expenses

The expenses of conducting the activities of the Other Administered Accounts are paid by the IMF from the General Resources Account. Partial reimbursements were made by several Administered Accounts. For the Administered Account for Selected Fund Activities—Japan, the reimbursements were \$2.4 million and \$2.1 million for the financial years ended April 30, 2007, and 2006, respectively. The administrative expenses of the Framework Account that were reimbursed amounted to \$2.4 million and \$1.9 million for the financial years ended April 30, 2007, and 2006, respectively. These reimbursements are included in payments to and on behalf of beneficiaries in the statements of income and changes in resources.

#### Adoption of new International Financial Reporting Standards

In August 2005, the International Accounting Standards Board (IASB) issued a new standard, IFRS 7 "Financial Instruments: Disclosures," which requires enhanced quantitative and qualitative risk disclosures for all major categories of financial instruments. IFRS 7 will become effective for financial year 2008, and its implementation is not expected to have an impact on the Other Administered Accounts' financial position or results of operations.

#### 3. Cumulative contributions and disbursements

The cumulative contributions to and disbursements from these Administered Accounts are as follows:

| Account  | April 30, 2007                        |  | April 30, 2006                        |                             |
|--|---------------------------------------|--|---------------------------------------|-----------------------------|
|  | Cumulative contributions <sup>1</sup> | Cumulative<br>disbursements <sup>2</sup> | Cumulative contributions <sup>1</sup> | Cumulative<br>disbursements |
|  | (In millions of U.S. dollars)         |  |                                       |                             |
| Administered Account Japan   | 135.2                                 | 72.5                                     | 135.2                                 | 72.5                        |
| Administered Account for Selected Fund   |                                       |  |                                       |                             |
| Activities—Japan   | 286.7                                 | 273.8                                    | 267.4                                 | 251.9                       |
| Technical assistance   | 250.6                                 | 241.5                                    | 235.3                                 | 223.3                       |
| Scholarships   | 23.4                                  | 20.8                                     | 21.0                                  | 18.4                        |
| Office of Asia and the Pacific   | 12.7                                  | 11.5                                     | 11.1                                  | 10.2                        |
| Framework Administered Account for Technical                                   |                                       |  |                                       |                             |

<sup>1</sup>Net of refunds of contributions to donors owing to termination of projects financed by resources in the Administered Account. <sup>2</sup>Disbursements had been made from contributed resources as well as from interest earned on these resources.

#### 4. Transfer of resources

#### Supplementary Financing Facility Subsidy Account

Resources of the Supplementary Financing Facility Subsidy Account in excess of the remaining subsidy payments are to be transferred to the Special Disbursement Account. At April 30, 2007, and 2006, subsidy payments totaling SDR 2.2 million had not been made to Liberia and Sudan and were being held pending the payment of overdue charges by these members.

#### Administered Account Austria-II

The difference between investment earnings and the interest due on the deposit is transferred to the ENDA subaccount of the Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account for PRGF-eligible members.

#### 5. Accounts termination

#### Administered Account Japan

The account can be terminated by the IMF or by Japan at any time. Any remaining resources in the account at termination are to be returned to Japan.

# Administered Account for Selected Fund Activities—Japan

The account can be terminated by the IMF or by Japan at any time. Any resources that may remain in the account at termination, net of accrued liabilities under technical assistance projects or in respect of the OAP, are to be returned to Japan.

# Framework Administered Account for Technical Assistance Activities

The Framework Account or any subaccount thereof may be terminated by the IMF at any time. The termination of the Framework Account shall terminate each subaccount thereof. A subaccount may also be terminated by the contributor of the resources to the subaccount or, in the case of a subaccount comprising resources from more than one contributor, by all the contributors participating in the subaccount at the time of termination, provided that a contributor to such a subaccount may cease its own participation in the subaccount at any time without termination of the subaccount. Termination shall be effective on the date that the IMF or the contributor, as the case may be, receives notice of termination. The disposition of any balances, net of continuing liabilities and commitments under the activities financed, is governed by the conditions agreed between the IMF and the contributor, or contributors in the case of a subaccount with more than one contributor. Absent such agreement, the balances are returned to the contributor(s).

# The Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account

The account can be terminated by the IMF at any time. Any balances remaining in the account after discharge of all obligations of the account upon its termination are to be transferred to each contributor in the proportion that the SDR equivalent of its respective contribution bears to the total contributions. In the case of earmarked contributions that have been fully used, no such transfer shall be made. A contributor may also designate its share or a specified portion for such other purposes as may be mutually agreed between the contributor and the IMF.

#### Austria-II Administered Account

The account will be terminated upon completion of its operation. Any assets remaining after the repayment of the deposit and interest due thereon will be transferred to the Natural Disaster Emergency Assistance subaccount of the Post-Conflict and Natural Disaster Emergency Assistance Subsidy Account for PRGF-eligible members.
