

Annex Figure 2.2.4. Effects of Involuntary Part-Time Employment on Compensation and Wages, 2000–16
(Percentage points)

Source: IMF staff calculations.

Note: Markers show estimated coefficients, and lines display 90 percent confidence intervals. Involuntary part-time workers are those working less than 30 hours a week because they could not find a full-time position. The involuntary part-time employment share is calculated as the total number of involuntary part-time workers divided by total employment. Groups are as defined in Figure 2.11. Figure is based on Annex Tables 2.3.4 and 2.3.5.
