Index

References are to chapter and paragraph or appendix numbers (not to pages). The notation *(g)* indicates an entry in the glossary or glossary appendix; a *(t)*, *(f)*, or *(b)* appended to paragraph numbers indicates a table, figure, or box adjoining relevant text; addition of "*" (for example, *(t*)*) indicates that the table, etc., is located immediately after, but is not relevant to, that paragraph (the paragraph number is merely a locator).

compilation of elementary price indices, 9.18–9.38*(t)*
economic approach, 1.161, 1.164, 1.166
elementary index, 1.264, 20.18, 20.30, 20.41
final-demand commodities, 19.8–19.9*(t)*
in imputations, 7.91–7.92
Jevons formula, 9.18, 16.78, 20.83
relationships with other elementary indices, 1.143–1.144, 20.24–20.30
treatment of missing prices, 9.52–9.54*(t)*
treatment of missing products, 9.55–9.63*(t)*
uses of, 1.83
Judgmental sampling, 1.317, 4.49

Konüs and Byushgens price index, 15.90, 15.92
Konüs-type hedonic output price index, 21.36

Lagged prices, 6.115
Laspeyres price index, *(g and g appendix)*
aggregation, 18.32–18.38
annual chain link index, 22.36–22.44*(t)*
chained, 1.58–1.59
chained rolling-year index, 22.47–22.54*(f)(t)*
decomposing current value changes, 1.29–1.30
for elementary aggregates, 9.65–9.66
elementary index, 20.56
equations, 15.12–15.18
final-demand commodities, 19.8*(t)*
formulas, 1.25, 1.66, 9.65, 15.42
geometric, 1.46–1.49, 9.33, 9.47, 9.65–9.66, 16.126, 19.12–19.14*(t)*
index of net output prices, 18.29
intermediate input price index, 1.117–1.119, 18.25
national Laspeyres output price index, 18.19
Paasche and Laspeyres bounding test, 1.62, 1.99, 16.52, 17.25*(f), (g)*
quantity index, 1.29, 15.16
quantity weights, 4.9
ratio of two Laspeyres indices, 1.33
relationship with Fisher index, 1.39
relationship with Lowe index, 1.39, 15.102–15.104
relationship with Paasche index, 1.36–1.39, 15.99–15.101
special case of Lowe index, 1.24–1.28
test performance, 1.66, 1.76, 16.61
value-added deflators, 18.46–18.48
year-over-year index, 22.22–22.34*(t)*
Laspeyres-type hedonic output price index, 21.39
Legal services industry
model pricing, 10.289
standard specifications, 10.289
treatment of products, 10.9, 10.272–10.289
Levels approach to index number theory, 16.11–16.30
Linear functional form, 21.83
Linking
backward, 1.271, 9.118
forward, 1.271, 9.117
with overlapping prices, 9.60
quality adjustment, 1.219–1.220, 7.108
Linking coefficients
chaining indices, 9.117–9.118*(t)*
partial reweighting, 9.127
List price, 1.178, 6.21–6.24, *(g)*
LKAU. *See* Local kind of activity unit
Lloyd-Moulton price index, 1.116, 9.70, *(g)*
Local kind of activity unit, 14.14, *(g)*
Long-term links, 9.131–9.134

Lowe, Joseph, 2.4
Lowe price index, *(g and g appendix)*
with annual base-year quantities, 15.34–15.49
chained, 1.57–1.58
formula, 1.22, 15.15
interrelationships, 1.39–1.41
midyear indices, 15.50–15.54
with monthly price indices, 15.34–15.49
ratio of two Lowe indices, 1.31–1.32
relationship with Fisher index, 1.39–1.40
relationship with Laspeyres index, 1.39, 15.102–15.104
relationship with Paasche index, 1.39, 15.49
relationship with Young index, 9.89–9.93
representativity bias, 1.110–1.112
seasonally adjusted, 22.91–22.97*(f)(t)*
test performance, 1.67–1.69
test properties, 16.133–16.137
time reversal test, 1.67–1.68
updated, 1.34–1.35
uses of, 1.20–1.23
Lower-level index, *(g)*. *See also* Elementary aggregates
Lower-level substitution bias, 11.43–11.44

Unilateral index number theory, 16.4
Unilateral price indices
  axiomatic approach, 16.11–16.30
Unimportant industries and products, 4.21–4.22
Unique product, *(g)*
  price collection, 6.83–6.86
Unit revenue function, 17.40
Unit value bias, 1.179, 11.45
Unit value index, 9.71–9.72, *(g)*
Unit value method, 10.192
Unit value "mix" problem, *(g)*
Unit value price, 6.8–6.9
Unit values, 1.154, 6.87, 20.10
United Nations
  Fundamental Principles of Official Statistics, 13.3, 13.48–13.51
  Statistical Commission, 2.17, 2.21
  website, 13.3
Units of measurement test, 9.25, 16.110
Universe, *(g)*
Unweighted hedonic index, 21.70–21.71
Unweighted index number formula, 20.20, 21.70–21.71
Unweighted stochastic approach, 16.77–16.82
Upper-level index, *(g)*
Upper-level substitution bias, 11.41–11.42
Use of income account, 14.16, 14.28*(t),* 14.37–14.38*(t)*
User consultation, 13.69–13.80
  advisory committee role, 13.75–13.77
  explanation of PPI uses, 13.69–13.70
  index quality issues, 13.78–13.80
  presentation of methodology, 13.71–13.74
User cost price, 10.203
User-value quality adjustment, 7.43

Validation checks, 12.21
Valuation basis, 1.293
Valuation principles, 14.19–14.20
Value, *(g)*
Value added, *(g)*
  aggregation, 1.121–1.122
  defined, 17.1
  GDP estimation, 1.93
Value-added deflator, 1.93, 1.117–1.119, 14.46–14.48
  aggregation, 18.39–18.56
  for the agriculture sector, 19.36–19.39*(t)*
  double deflation method for constructing real value added, 18.49–18.56
  for and establishment, 17.77–17.87
  for the manufacturing sector, 19.40–19.43*(t)*
  for the services sector, 19.44–19.47*(t)*
Value-added PPI, *(g)*
  uses of, 1.3
Value-added tax, *(g)*
Value aggregates, 14.1. *See also* Elementary aggregates
  product test, 15.7–15.11
Value function, 21.16, 21.21
Value updating, *(g)*
Value weights, 1.189, 4.5–4.8, *(g)*
Van Ijzeren additive percentage change decomposition, 19.28–19.29*(t)*
Van Ijzeren decomposition factor, 19.28–19.29*(t)*
Variance, 5.6, 5.10, 5.56–5.61
VAT. *See* Value-added tax
Virtual corporation, 1.183, 3.13–3.14, 3.53–3.54, *(g)*
Volume index, *(g)*
Voorburg Group, 2.33

Wages
  index linking, 2.11
Walsh price index, *(g)*
  defined, 1.52
  final-demand commodities, 19.16*(t)*
  midyear price indices, 17.89, 19.23–19.25*(t)*
  pure price index theory and, 15.25–15.32
  representativity bias, 1.110–1.111
  superlative index, 1.104–1.109, 17.48
  test performance, 16.62
  Walsh formula, 15.19
Weight property, 16.48
Weight reference period, 1.269, 4.23–4.27, 9.83, *(g)*
Weighted arithmetic-average price index, *(g appendix)*
Weighted stochastic approach, 16.83–16.96
Weighted least squares estimator, 7.172
Weighting
  deriving pattern, 1.303–1.314
  elementary aggregates, 1.139–1.140, 9.11–9.15
  hedonic regressions, 21.86–21.90
Weighting tests, 16.117–16.122
Weights, *(g)*
  classification system, 4.17–4.20

Weights *(continued)*
coverage of, 4.28–4.31
within elementary aggregates, 9.11–9.15
from establishments, 4.58–4.59
explicit weights, 4.48–4.52
frequency of reweighting, 9.110–9.113
household enterprises, 4.65–4.66
implicit weights, 4.48–4.52
introduction of new weights, 9.107–9.109
net output weights, 4.12–4.16
new products, 4.62–4.64
partial reweighting, 9.124–9.130
probability sampling, 4.57–4.58
product weights, 4.47–4.66
quantity weights, 4.9–4.11
role of, 4.2–4.4
selecting and determining, 4.67–4.76
sources of, 4.32–4.46, 4.53–4.66
transaction weights, 4.47–4.66
unimportant industries and products, 4.21–4.22
update, 1.57, 4.21, 5.86, 9.143. *See also* Reweighting
value weights, 4.5–4.8
Wholesale price index, *(g)*
origins of, 1.13
uses of, 1.14, 2.49–2.50
Wholesale turnover, 1.255, 4.43, 4.45
Wireless telecommunications industry
treatment of products, 10.9, 10.182–10.198 (*Worksheet 10.1*)
WLS. *See* Weighted least squares estimator
WPI. *See* Wholesale price index

X-11 seasonal adjustment, 22.91, 22.93*(f)*
XPI. *See* Export Price Index

Year-over-year annual indices, 22.35–22.44*(t)*
Year-over-year monthly indices, 22.7–22.9, 22.16–22.34*(t),* 22.98
Young index, 1.42–1.45, 15.55–15.65, *(g and g appendix)*
factoring, 9.94–9.96
formula, 1.42, 15.55
geometric, 1.46–1.49
limitations, 15.63
rebased Young index, 15.61
relationship with its time antithesis, 15.105–15.108
relationship with Lowe index, 9.89–9.93, 15.55
seasonally adjusted, 22.91–22.97*(f)(t)*
test properties, 16.133–16.137
time antithesis of Young index, 15.64
YPI. *See* Total output price index
