Note on the data: The charts in this article rely on data from the Worldwide Governance Indicators (WGIs), which are described in "The Worldwide Governance Indicators: Methodology and Analytical Issues, by Daniel Kaufmann, Aart Kray, and Massimo Mastruzzi." These indicators are constructed through an aggregation method using dozens of sources from organizations around the world. Any indicator on governance is subject to a margin of error,

which the WGIs also estimate (along with country scores). Thus, the data should be interpreted with caution. The full WGI data set is at <a href="http://www.govindicators.org">http://www.govindicators.org</a>.
