New Fiscal Transparency Code & Evaluations: Outline of the Presentation

- I. Background and Context**
- II. New Fiscal Transparency Code**
- III. New Fiscal Transparency Evaluations**
- IV. Next Steps**

I. Background and Context:

a. Origins of the Global Fiscal Transparency Effort

- **A concerted effort to improve fiscal transparency since the late 1990s**
 - Asian crisis highlighted weakness in public and private financial reporting
 - Also underscored the risks associated with undisclosed linkages between the two
- **New fiscal reporting standards were developed**
 - **General:** IMF's Code & Manual on Fiscal Transparency
 - **Budgeting:** OECD Best Practices for Budget Transparency
 - **Statistics:** EU's ESA 95, IMF's GFSM 2001, & UN's SNA 08
 - **Accounting:** IFAC's International Public Sector Accounting Standards (IPSAS)
- **New tools for monitoring compliance with standards were introduced**
 - **Multilateral:** Fiscal and Data ROSCs, GDDS/SDDS, & PEFA
 - **Regional:** Eurostat, WAEMU & CEMAC harmonization of fiscal reporting
 - **Civil Society:** Open Budget Survey and Index, GIFT Principles

I. Background and Context:

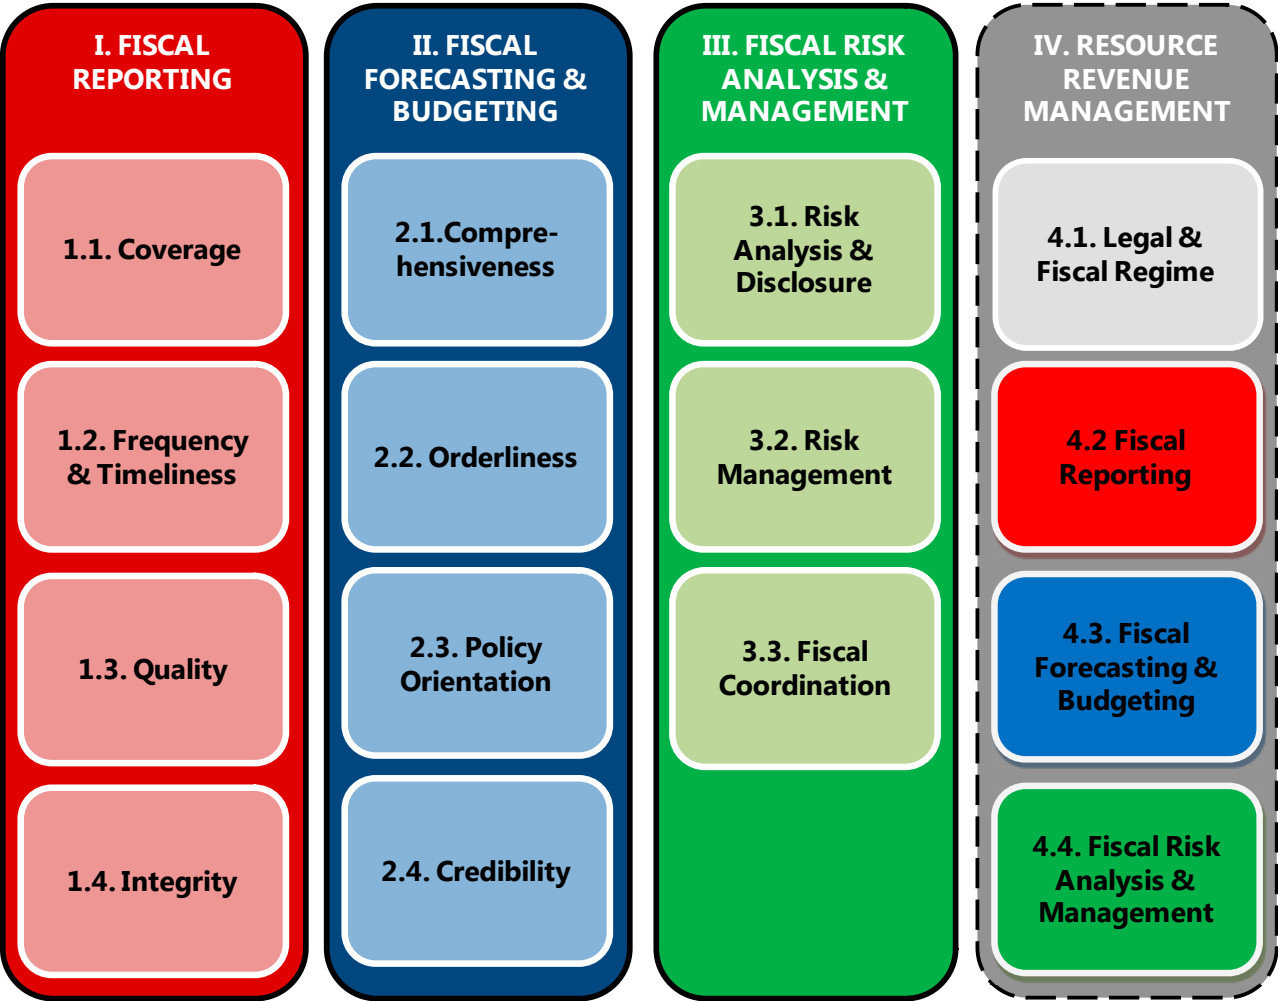

b. Weakness of Old Fiscal Transparency Code & ROSC

- **Code & ROSC evaluate clarity of reporting procedures not quality of reports**
 - Code’s 4 “Pillars” reinforce focus on formal laws, institutions, and processes
 - i. Clarity of Roles and Responsibility
 - ii. Open Budget Processes
 - iii. Public Availability of Information
 - iv. Assurances of integrity
 - ROSCs pay too little attention to the content of fiscal reports themselves
- **Code & ROSC adopt a “one-size-fits-all” approach to evaluating countries**
 - Do not take into account different levels of institutional capacity
 - Do not provide milestones to full compliance with international standards
 - Make it difficult to benchmark against comparator countries
- **ROSC assessments tended to be exhaustive rather than risk-based**
 - Place equal weight on all elements of the Code
 - Difficult to judge relative seriousness of different fiscal reporting gaps
 - Include a large number of unprioritized recommendations

II. New Fiscal Transparency Code

a. Architecture of the New Code

Four Pillars of the New Code

II. New Fiscal Transparency Code:

Take account of different levels of country capacity	"Code of Good Practices"	Basic, Good, and Advanced Practice
Greater emphasis on fiscal risk disclosure and management	1 principle on fiscal risk 5 others risk-related	12 principles focused on fiscal risk
Align with recent advances in standards & practices	Institutions: General Government Stocks: Financial Balance Sheet Frequency: Quarterly Classification: GFSM 2001 Accounting: GAAP Budgeting: N/A	Institutions: Public Sector Stocks: Full Balance Sheet Frequency: Monthly Classification: GFSM 2014 Accounting: IPSAS Budgeting: PEFA & OECD
