

Statistical Appendix

The IMF's Middle East and Central Asia Department (MCD) countries and territories comprise Afghanistan, Algeria, Armenia, Azerbaijan, Bahrain, Djibouti, Egypt, Georgia, Iran, Iraq, Jordan, Kazakhstan, Kuwait, the Kyrgyz Republic, Lebanon, Libya, Mauritania, Morocco, Oman, Pakistan, Qatar, Saudi Arabia, Somalia, Sudan, Syria, Tajikistan, Tunisia, Turkmenistan, the United Arab Emirates, Uzbekistan, the West Bank and Gaza, and Yemen.

The following statistical appendix tables contain data for 31 MCD countries. Data revisions reflect changes in methodology and/or revisions provided by country authorities.

A number of assumptions have been adopted for the projections presented in the *Regional Economic Outlook: Middle East and Central Asia*. It has been assumed that established policies of national authorities will be maintained, that the price of oil¹ will average US\$43.0 a barrel in 2016 and US\$50.6 in 2017, and that the six-month London interbank offered rate (LIBOR) on U.S.-dollar deposits will average 1.0 percent in 2016 and 1.3 percent in 2017. These are, of course, working hypotheses rather than forecasts, and the uncertainties surrounding them add to the margin of error that would in any event be involved in the projections. The 2016 and 2017 data in the figures and tables are projections. These projections are based on statistical information available through early September 2016.

Somalia is excluded from all regional aggregates due to a lack of reliable data.

2011 data for Sudan exclude South Sudan after July 9; data for 2012 onward pertain to the current Sudan.

All data for Syria are excluded for 2011 onward due to the uncertain political situation.

All data refer to the calendar years, except for the following countries, which refer to the fiscal years: Afghanistan (March 21/March 20 until 2011, and December 21/December 20 thereafter), Iran (March 21/March 20), Qatar (April/March), and Egypt and Pakistan (July/June) except inflation.

Data in Tables 7 and 8 relate to the calendar year for all aggregates and countries, except for Iran, for which the Iranian calendar year (beginning on March 21) is used.

Data for West Bank and Gaza are included in all tables except in 3–6, 8, 10, 13, and 14.

In Tables 3, 6, 13, and 14, “oil” includes gas, which is also an important resource in several countries.

REO aggregates are constructed using a variety of weights as appropriate to the series:

- Composites for data relating to the domestic economy (Tables 1, 3, 7–8, and 10–17), whether growth rates or ratios, are weighted by GDP valued at purchasing power parities (PPPs) as a share of total MCD or group GDP. Country group composites for the growth rates of broad money (Table 9) are weighted by GDP converted to U.S. dollars at market exchange rates (both GDP and exchange rates are averaged over the preceding three years) as a share of MCD or group GDP.
- Composites relating to the external economy in nominal terms (Tables 18–20 and 22) are sums of individual country data. Composites relating to external economy in percent of GDP (Tables 21 and 23) are weighted by GDP in U.S. dollars as a share of MCD or group GDP in U.S. dollars.
- Composites in Tables 2, 4, and 5 are sums of the individual country data.

The following conventions are used in this publication:

- In tables, ellipsis points (. . .) indicate “not available,” and 0 or 0.0 indicates “zero” or “negligible.” Minor discrepancies between sums of constituent figures and totals are due to rounding.

¹Simple average prices of U.K. Brent, Dubai, and West Texas Intermediate crude oil.

¹Central government.

²New definition includes SWF assets.

³Consolidated accounts of the federal government and the emirates Abu Dhabi, Dubai, and Sharjah. From 2010, includes extra-budgetary funds.

⁴Includes oil revenue transferred to the oil fund, as well as public enterprise and central bank debts.

⁵Debt figures include IMF obligations.

⁶West Bank and Gaza is not a member of the IMF and is not included in any of the aggregates.
