## Against this backdrop, Latin America and the Caribbean is facing a lackluster outlook for growth...

#### Latin America and the Caribbean: Real GDP Growth

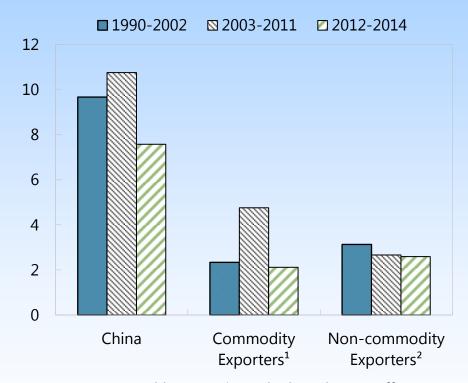

1980 1983 1986 1989 1992 1995 1998 2001 2004 2007 2010 2013 2016 2019 Sources: IMF, *World Economic Outlook*; and IMF staff calculations.

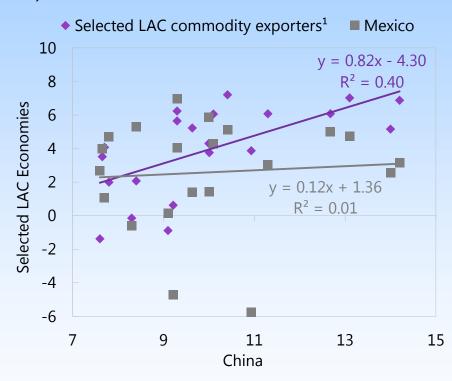

# ... partly reflecting softness in global commodity markets, amid China's slowdown...

### **Latin America and China: Annual Real GDP Growth**

(Percent)

Sources: IMF, World Economic Outlook; and IMF staff calculations.

Sources: IMF, World Economic Outlook; and IMF staff calculations.

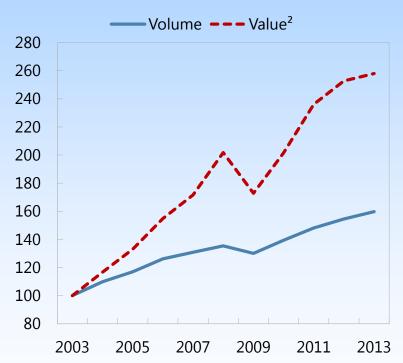

<sup>1</sup> Simple average of Argentina, Brazil, Chile, Colombia, Peru, and Uruguay. Real GDP growth rates are for the period 1993-2013.

<sup>&</sup>lt;sup>1</sup> PPP-weighted average of Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, and Venezuela.

<sup>&</sup>lt;sup>2</sup> PPP-weighted average of Costa Rica, El Salvador, Guatemala, Honduras, Mexico, and Nicaragua.

# ... following a terms-of-trade boom that had brought extraordinary income windfalls.

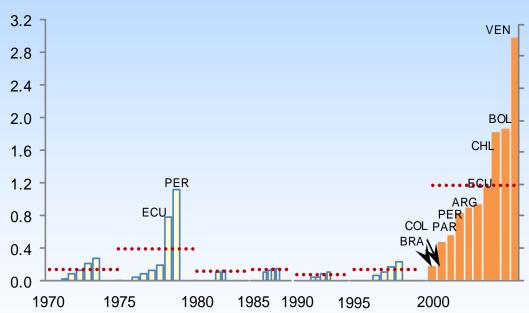

### Latin America: Total Exports<sup>1</sup> (Index: 2003=100)

Sources: IMF, World Economic Outlook.

#### Latin America: Commodity Income Windfall, 1970–2012<sup>1</sup>

(Cumulative windfall as share of annual GDP)

Sources: IMF, *International Financial Statistics;* and IMF staff estimates.

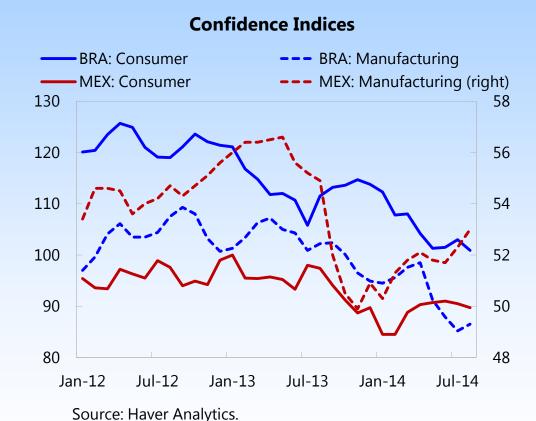

<sup>&</sup>lt;sup>1</sup> Simple average of Latin American countries.

<sup>&</sup>lt;sup>2</sup> Total exports in U.S. dollars deflated by the U.S. producer price index .

<sup>&</sup>lt;sup>1</sup> Cumulative income windfall from start to peak of each identified episode.

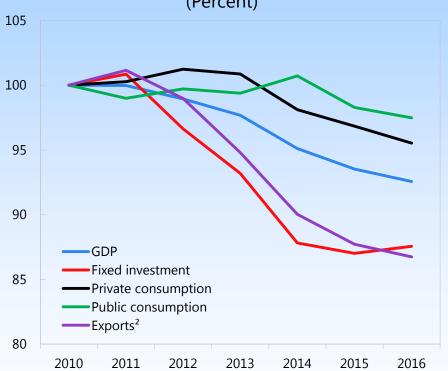

## Beyond weaker commodity prices, domestic policy uncertainties have also dampened confidence lately.

- In some countries, shortterm uncertainty is a price worth paying for reforms with high longrun payoff (e.g., Mexico)
- In other cases, however, investor confidence has weakened amid perceptions of policy drift and lack of reform momentum

## Growth expectations have been revised downward significantly, led by investment...

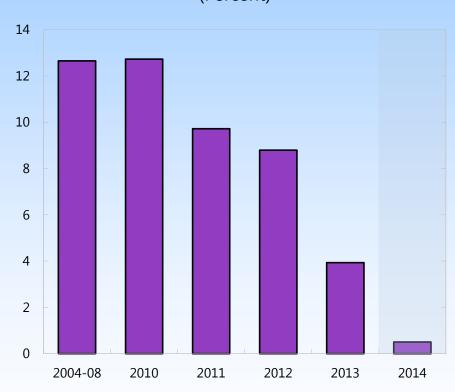

#### LAC: Current WEO Path for GDP and Components Relative to Sep. 2011 WEO Projections<sup>1</sup> (Percent)

Sources: IMF, *World Economic Outlook*; and IMF staff calculations. <sup>1</sup> Ratio of GDP levels between October 2014 and September 2011 WEO projections. A value of 100 indicates no difference between the two projections; values below 100 indicate downward revisions.

<sup>2</sup> Weighted by the value of exports of goods and services in U.S. dollars. Excludes Dominica, Grenada, Guyana, Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, and Suriname due to data constraints.

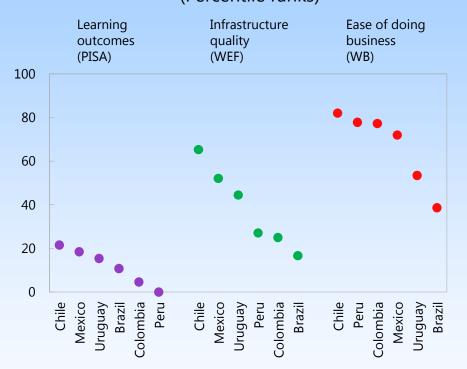

### LA6: Real Investment Growth<sup>1</sup> (Percent)

Sources: IMF, *World Economic Outlook*; and IMF staff calculations. <sup>1</sup> Simple average of Brazil, Chile, Colombia, Mexico, Peru, and Uruguay.

## ... underscoring the need for structural reforms to ease supply bottlenecks and boost productivity.

### LA6: Structural Indicators<sup>1</sup> (Percentile ranks)

Sources: OECD, PISA (2012); World Bank, Ease of Doing Business database (2013); World Economic Forum, Global Competitiveness Report (2014–15); and IMF staff calculations.

Priorities differ by country, but generally include:

- Addressing infrastructure bottlenecks
- Enhancing educational outcomes
- Improving the business environment

<sup>&</sup>lt;sup>1</sup> The scale reflects the percentile distribution in all countries for each respective survey; higher scores reflect higher performance; PISA: Program for International Student Assessment; WB: World Bank; WEF: World Economic Forum.

### In a few countries, citizenship-by-investment programs have provided relief...

- CBI inflows have surged in recent years
- Impact on St. Kitts and Nevis and Dominica is already large
- New programs just launched in Antigua and Barbuda and Grenada could also yield significant resources
- These inflows have already led to a robust recovery in St. Kitts and Nevis and could help support an economic recovery and improve macro balances in a few other economies

Sources: National authorities; and IMF staff calculations.

## ... but prudent management is key to containing the risks associated with these programs.

### Large, volatile CBI inflows may increase macro vulnerability

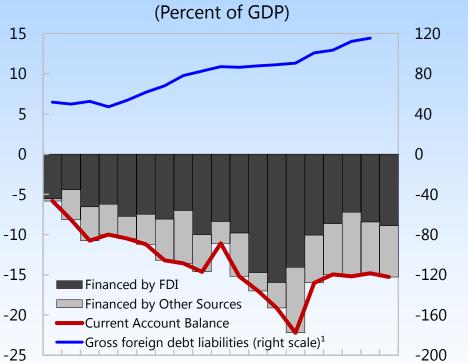

- Economic overheating creates risks of Dutch Disease
- Reduced fiscal discipline leading to increased dependence
- Higher external vulnerability with risks of sudden stops

### A prudent CBI framework is critical

- Pacing and regulating inflows into the private sector
- Saving a significant share of public sector inflows to build fiscal buffers and reduce debt, while allowing for sustainable use of resources consistent with absorptive capacity
- Enforcing a strict due diligence process and a prudent governance framework to reduce sustainability risks

# Fiscal vulnerabilities are mirrored by very weak external positions, both public and private...

  - Financial

### –Going Forward

## To address these challenges, a multi-pronged strategy is needed, combining fiscal adjustment...

 Fiscal adjustment must be at the heart of any permanent solution, and underpinned by structural changes:

# ...with financial sector clean-up and steps to boost competitiveness.

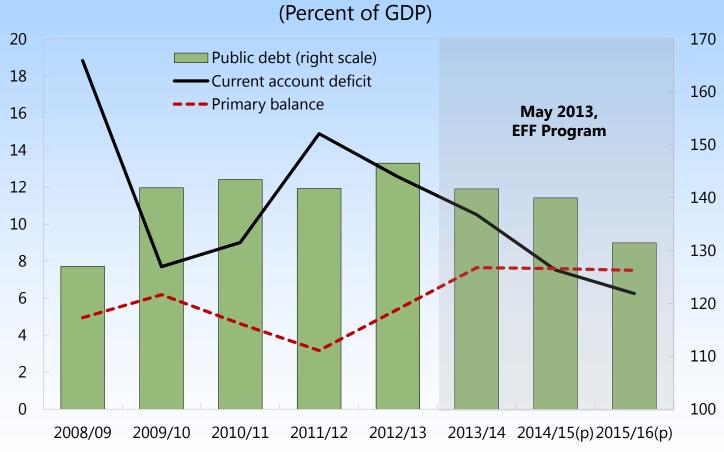

- Financial sector priorities in the ECCU:
  - Upgrade supervision and regulation to international norms
  - Asset quality reviews of banks
  - Strengthening banks' financial positions
- Improved competitiveness is key to restoring growth and external sustainability:
  - Intensify efforts to improve the business climate
  - Liberalize labor markets and improve training
  - Prioritize public investment to address infrastructure bottlenecks

# A difficult road ahead, but some reasons for optimism....

- Policymakers' increasing willingness to take decisive action to make fundamental changes: e.g., Jamaica, Grenada, St. Kitts and Nevis
- Promising opportunities in health and education tourism, that offer high potential for growth and employment
- A lower oil bill?
- Potential "game-changing" opportunities to reduce energy costs, via increased use of natural gas and renewable energy

## Jamaica's recent progress in strengthening fiscal and external positions is an encouraging example.
