

STATISTICAL APPENDIX

This issue of the *Global Financial Stability Report* introduces a statistical appendix that presents data on financial developments in key financial centers and emerging markets. It is designed to complement the analysis in the text by providing additional data that describe key aspects of financial market developments. These data are derived from a number of sources external to the IMF, including banks, commercial data providers, and official sources, and are presented for information purposes only; the IMF does not guarantee the accuracy of the data from external sources.

Presenting financial market data in one location and in a fixed set of tables and charts, in this and future issues of the *Global Financial Stability Report*, is intended to give the reader an overview of developments in global financial markets. The statistical appendix reflects information available up to February 19, 2003, unless otherwise specified.

Mirroring the structure of the chapters of the report, the appendix presents data separately for key financial centers and emerging market countries. Specifically, it is organized into three sections:

- Figures 1–14 and Tables 1–9 contain information on market developments in key financial centers. This includes data on global capital flows, and on markets for foreign exchange, bonds, and equities, and derivatives as well as sectoral balance sheet data for the United States, Japan, and Europe.
- Figures 15 and 16 and Tables 10–21 present information on financial developments in emerging markets, including data on equity, foreign exchange, and bond markets, as well as data on emerging market financial flows.
- Tables 22–25 report key financial soundness indicators for selected countries, including bank profitability, asset quality, and capital adequacy.

¹All figures are adjusted for double-counting. Notional amounts outstanding have been adjusted by halving positions vis-à-vis other reporting dealers. Gross market values have been calculated as the sum of the total gross positive market value of contracts and the absolute value of the gross negative market value of contracts with non-reporting counterparties.

²Single-currency contracts only.

³Adjustments for double-counting are estimated.

⁴Gross market values after taking into account legally enforceable bilateral netting agreements.

Note: The countries above include the 27 constituents of the Emerging Markets Free index as well as Hong Kong SAR and Singapore. Regional breakdowns conform to Morgan Stanley Capital International conventions. All indices reflect investible opportunities for global investors by taking into account restrictions on foreign ownership. The indices attempt to achieve an 85 percent representation of freely floating stocks.

World Economic and Financial Surveys

This series (ISSN 0258-7440) contains biannual, annual, and periodic studies covering monetary and financial issues of importance to the global economy. The core elements of the series are the *World Economic Outlook* report, usually published in May and October, and the quarterly *Global Financial Stability Report*. Other studies assess international trade policy, private market and official financing for developing countries, exchange and payments systems, export credit policies, and issues discussed in the *World Economic Outlook*. Please consult the IMF *Publications Catalog* for a complete listing of currently available World Economic and Financial Surveys.

World Economic Outlook: A Survey by the Staff of the International Monetary Fund

The *World Economic Outlook*, published twice a year in English, French, Spanish, and Arabic, presents IMF staff economists' analyses of global economic developments during the near and medium term. Chapters give an overview of the world economy; consider issues affecting industrial countries, developing countries, and economies in transition to the market; and address topics of pressing current interest.
